

## The Next Crisis...It has already been game-planned!

It seems we are through the pandemic, but there is now another serious crisis on the horizon. Are you ready for it? As we watch debt climb, it appears the world is now preparing for a financial crisis and The Great Reset.

We do not approach this from a spirit of fear but of hope and solutions. It is important you land on the right side of The Great Reset and this week's briefing is designed to help as you develop your personal financial **Game Plan**.

**For additional context, let's review what the World Economic Forum has been doing as we anticipate their next crisis:**

In October 2019, we learned of a special World Economic Forum exercise known as Event 201.

The purpose of this was a war game to see how the world might respond to a coronavirus pandemic.

- » Less than six months later, global governments were following the course laid out before them.

Next, they war gamed the long-term after effects of COVID.

- » They did this as they pumped trillions of dollars into the economy-boosting inflation. Most people have been so focused on the virus that they missed the trillions of dollars shoved into the economy.

**Now, the World Economic Forum's most recent war game is built around a financial crisis to usher in The Great Reset. Interestingly, it seems a cyber event could be the trigger for all this to happen. Could there be a cyber-attack in response to the war in Ukraine?**

What does this all mean? Are you prepared for what may be planned ahead? Is your investment advisor aware of how these new geopolitical threats might impact your savings and your money? Do you have a financial advisor to help with what could be some difficult financial times and not business as usual?

In this week’s briefing, Kevin Freeman lays out a plan to not let the serious crisis they created go to waste. Instead, it’s time to shift the power, and prepare for a positive Great Reset.

**Your Mission:** To find a Financial Advisor that understands these geopolitical threats and develop your financial Game Plan.

“The World Economic Forum and the Davos crowd are planning to use a financial crisis to usher in the Great Reset. Read this briefing all the way through and learn how we can stop them.” –Kevin Freeman

Ep. 5-179 (OSINT) Open-Sourced Intelligence Report. This briefing is part of the Economic War Room teaching series exclusive with Kevin Freeman. Kevin Freeman is considered one of the world’s leading experts on the issues of Economic Warfare and Financial Terrorism. He has consulted for and briefed members of both the U.S. House and Senate, present and past CIA, DIA, FBI, SEC, Homeland Security, the Justice Department, as well as local and state law enforcement. His research has been presented in critical DoD studies on Economic Warfare, Iran, and Weapons of Mass Destruction presented to the Secretary of Defense and the Under Secretary of Defense, Intelligence. He has traveled extensively with research trips to Russia and China and throughout Europe and the Americas. He is also a Senior Fellow at the Center for Security Policy and a Contributing Editor to The Counter Terrorist magazine.

Kevin Freeman is the author of two best-selling books. His book, *Secret Weapon, How US Terrorism Brought Down The US Stock Market and Why It Can Happen Again* was a New York Times Best Seller. In *Secret Weapon*, Kevin outlines what our enemies know and what Washington has chosen to ignore – that our financial system is profoundly vulnerable to financial terrorism and that we are being targeted for further and even more destructive attacks by our enemies, who want to cripple America as the world’s leading economy. If you want to protect yourself and protect our country, then you need to read *Secret Weapon* to understand how we have entered a new age of warfare – an age our enemies want to make the Dark Ages of the United States.

In his book, *Game Plan - How to Protect Yourself From the Coming Cyber-Economic Attack*, Kevin Freeman outlines the potential threats against our economy and how Americans can be prepared to protect their savings and investments. With America’s rising debt, multiple cyber economic attacks, and the weakening of the dollar, the potential economic threats are documented and real. What Americans see as the marketplace, our enemies now view as the battlespace. Contrary to many financial newsletters and advertising claims, there is not a silver bullet to these threats and investors need to be prepared to strategically adjust. This is the first “how-to” investment book of its type and provides the game plan to succeed.

**1. An Economic Risk Analysis – The unsustainable fiscal path!**

Is this the Economic Forum’s financial crisis to usher the Great Reset?

“At the end of last year, Reuters reported on a new World Economic Forum exercise. This one had a different crisis. It wasn’t about a pandemic. Rather, this one was based on one of the after-effects that we’re now experiencing. Call it a long-haul COVID symptom. Most people have been so focused on the virus that they missed the trillions of dollars shoved into the economy. So what does the World Economic Forum predict will happen next? You got it. A financial crisis?” – Kevin Freeman

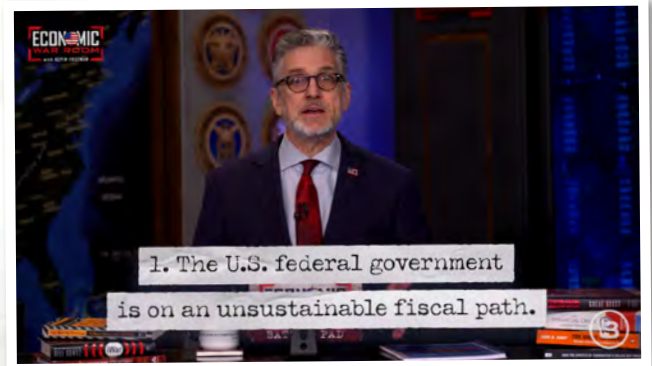

**An Economic Risk Analysis:**

Seven years ago, Kevin Freeman was hired by the state of Utah to do an economic risk analysis. Kevin’s report was published and presented in January 2016. It was 125 pages long, with 323 footnoted citations and lots of charts and graphs. You can see the link to it here <https://le.utah.gov/interim/2019/pdf/00004600.pdf> and read it for yourself.

Kevin summarizes the key learnings from the Utah Study he wrote:

“Over the past 14 years, I’ve written quite a few government reports, starting with the Pentagon’s seminal report on economic warfare, and contributions to a Secretary of Defense Weapons of Mass Destruction study, a report on Iran as a threat, and so forth.

**What was so important about this Utah study comes down to two critical points.**

**First, the U.S. federal government is on an unsustainable fiscal path.**

We can’t print money fast enough to keep up with their spending. That’s proven true and my very dire warnings they’ve turned out to actually understate the problem.

**The second point I made is that it will be up to the states and local governments to prepare to address the problem.**

That is absolutely proven true, even though most states have grown more, not less dependent on the federal dole. Utah, as a state, is particularly at risk because so much of the state is owned by the federal government."

When this report was presented, the official federal debt was a little over \$18 trillion. That was January 2016.

- › Today, federal debt is just past \$30 trillion, and it's accelerating.
- › What's worse, this debt has grown even at a near-zero interest rate.
- › The debt is changing even you read this briefing because interest rates are rising.

"It's like our entire nation had a teaser credit card with no interest and we maxed it out. Then the promotional no-interest period expires. Pretty soon, we'll be making huge interest payments. With inflation now reported at 7.5%, we would expect interest rates above that. Otherwise, you lose money when you buy American bonds." -Kevin Freeman

### **If Interest rates go up, what does that really mean to our national debt?**

- › If interest rates went to 5%, still below 7.5% inflation, we would be paying \$1.5 trillion per year in interest alone.
- › What if interest rates went to 8%? The cost would be \$2.4 trillion per year.
- › If interest rates went back to 10%, a level that's happened in the late '70s and '80s when inflation was high, we would pay \$3 trillion per year in interest alone.

**CAUTION:** Since we're already running a budget deficit, that means an extra \$3 trillion of borrowing. Raising the debt even further, it really gets insane very quickly.

- › That's the sort of death spiral that destroyed Germany after World War One and gave rise to Hitler.
- › That's the sort of economic death spiral that Venezuela, Argentina, and Zimbabwe have all gone through recently.

To put it in context, in the year 2020, the entire U.S. federal tax collection totaled just a little over \$3 trillion.

- » In this case, a 10% interest rate on our existing debt would require nearly 100% of the income the federal government takes in every year just to pay interest by itself, not counting spending on welfare, Social Security, roads, bridges, government salaries, and all those programs and everything else the government pays for.

The World Economic Forum says in 10 years, you'll own nothing and like it. America will have another financial crisis, it is now inevitable!

## 2. What's going to happen? Kevin Freeman outlines four possible impacts in his report.

- » **One: We are due for a financial crisis.**
  - Our history teaches that we have a financial crisis every decade or two.
- »  **CAUTION: It is different this time: The debt is so high that we will face one sooner rather than later and it will be a serious crisis.**
- » **Two: The impact could require a serious reduction in federal spending.**
  - That would be the responsible approach. Responsible does not mean painless, though. Lower spending and higher interest rates will challenge our economy in major ways.
- » **Three: We might see a substantial increase in taxation.**
  - The government will continue to pay for things but charge you extra for it. Taxes would have to more than double from current levels just to make up for the increased interest.
- » **Four: There are out-of-the-box ideas and circumstance-altering threats.**
  - This is a big one because there may be opportunities to alter course, but there are also serious threats that we will have to look out for. Cyber Attacks would be one force multiplier.

**WARNING: A massive cyber-attack that would freeze the financial system.**

"We're clearly vulnerable to a cyber-attack. In fact, I've been talking about this for years and early on mentioned a cyber-Pearl Harbor in a private report to then Secretary of Defense Leon Panetta. I knew his neighbor, who handed my research to him through the fence at his ranch. Google it. Look up Leon Panetta and Cyber-Pearl Harbor, and you'll see that my message did get through.

Here's an Oct. 2012 article in New York Times about the first time he used the term.

"Defense Secretary Panetta warned Thursday that the United States was facing the possibility of a Cyber Pearl Harbor." It's right here in this link:

<https://www.nytimes.com/2012/10/12/world/panetta-warns-of-dire-threat-of-cyberattack.html>

**Why is it important? Kevin Freeman highlights two reasons:**

**1. First, a financial crisis is inevitable and it will invite cyber-attacks.**

In Kevin's first book on economic warfare, which made the *New York Times* bestseller list was titled, **Secret Weapon How Financial Terrorism took down the U.S. stock market and Why It Could Happen Again.**

The whole story is about how foreign actors took advantage when we were vulnerable during a financial crisis in 2008. A good hunter knows that you wait for the prey to be in your sights before you start shooting. The coming financial crisis will clearly make us an easy target.

**2. The second point is equally important. When a serious crisis comes, domestic enemies are ready to use it to usher in their agenda.**

Remember, it was Obama's chief of staff, Rahm Emanuel, who said, "never let a serious crisis go to waste."

- » Anyone who watched the government force us into lockdowns, masks, and mandates knows that a crisis is an opportunity for a power grab.

- » That means that we'll be facing more than one enemy during the financial crisis. This isn't new.
- » We face the CCP coronavirus and also power-hungry politicians in the pandemic.

**ALERT: Have a Game Plan for these three scenarios.  
We will likely face:**

- **A financial crisis.**
- **A foreign cyber-attack,**
- **Elitist wanting to control you and everyone else.\***

\*It's the third enemy, THE POWER-HUNGRY ELITIST, that is the most dangerous!

- This is the plan for the next phase of the Great Reset.
- They will be playing for all the marbles.

**WARNING! – WARNING! – WARNING! – WARNING! – WARNING! – WARNING!**  
The above is how we get from where we are, and where the World Economic Forum says, "In 10 years, you'll own nothing and like it." Their goal is that America will no longer be a superpower, just one nation among many.

### 3. When the world ends. What happens when the financial markets crash?

The Roadmap to protect your family and save the day.

"We're going to face a financial crisis. Our debt makes it inevitable, and when it happens, it will seem obvious at the time, even though everyone ignores it now. We're already seeing the narrative start to form." –Kevin Freeman

The Economist magazine on February 12th published a cover story titled, *When the Ride Ends; What would happen if the financial markets crashed?*

Basically, they're telegraphing what comes next. They always do, by the way. It's sort of like James Bond villains who feel compelled to explain their diabolical plot before they execute it.

- » The good news is that their plot provides us a roadmap to protect our families and maybe even save the day.
- » Everything we're talking about is economic warfare, plain and simple.

- » Our strategy is also pretty simple. First, in an economic war, the weapon is money, and we will see some crazy things happen with money.

### Case Study – Protecting yourself from the next financial crisis

Take a look at the Zimbabwe \$100 note from the year 2008. It had no real value, about \$20 US. Ten years later, they were printing \$100 trillion notes that weren't worth pennies.

“Now I’m not saying that’s going to happen here. We’re a long way from Zimbabwe, at least at this point. But I do want you to know that strange things happen in a financial crisis. For example, did you ever expect that a virus would cause a near-total worldwide shutdown, or that city managers could lock you in your home to be prepared?” –Kevin Freeman

### The key is to be prepared - YOU’LL NEED A GAME PLAN.

That’s the title of Kevin Freeman’s second book on Economic Warfare. *Game Plan: How to Protect Yourself from the Coming Cyber Economic Attack*.

We published this in 2014. A lot has happened since then, but Kevin has been doing more research and still believes the book is spot-on in its advice.

### Here are a few of the key topics and chapter titles:

- » We’ve got a world of risk.
- » This time is different, making it personal.
- » What to do when crisis strikes the gold rush?
- » What about stocks? What’s a bond bubble beyond the dollar? Why money in the mattress is a bad idea.
- » Guaranteed investments, hedge funds, and other out-of-the-box investments.

- » A sane strategy for an insane world.
- » There is hope.
- » Plus, an Appendix titled, Protecting Your Family.

"I read through it again while preparing for this briefing. It's a good book, and it's more applicable today than when I published it eight years ago." -Kevin Freeman

**To give you an example of how accurate the book has been, Kevin highlights the following:**

- » In Chapter 1, starting on page 16, there's a section titled "What Comes Next?" There are seven pages warning about a disruptive cyber-attack on our financial system and who could be doing it.
  - This is the very threat that the World Economic Forum is suggesting will happen soon.
  - Kevin Freeman was a part of several legitimate war games on this subject. He shares that the best outcome was not a great reset government takeover of the economy. But he fears that's what will be attempted.
- » Chapter 2 starts with the inflation threat on page 26. It speaks of reckless money printing and debt hell. It even discusses the possible end of the dollar as reserve currency.
  - I wrote this over eight years ago, and it's playing out in the headlines right now. None of this should come as a shock. Unfortunately, our government has done the opposite of preparing us.
  - They've actually made us more vulnerable, and the pandemic has made things even worse.

**DC told us, "China is not our enemy." - ITS TIME TO THINK AGAIN!!:**

When **Game Plan** was first published, the number one objection to the entire book was that people could not believe that China was an enemy.

- » On page 46: "A common objection to my warning is that the Chinese are so connected to our economy that they would never harm us. The idea that the Chinese would never harm us is ridiculous on its face. There are Chinese who continually hack our systems and who manipulate and undermine our markets."
- » But don't the Chinese hold too much in dollar debt? They couldn't afford to see the dollar go down.
  - China's military doesn't care and has a much larger view of things than the next quarter's export sales.
  - The smug response of those who believe China needs us so much that it remains our friend is another example of American arrogance.
  - It may seem hard to believe, but when I went on a roadshow with Game Plan, people regularly challenged me over China.

"They would not, they could not, China can never be our adversary."

- Even when we warned about Chinese control of our pharmaceuticals industry with Rosemary Gibson (in episode 6 of Economic War Room®), there was pushback.
- Economic War Room warned of Chinese bioweapons several years ago, but nobody wanted to notice.

**Question: What are people not noticing now?**

**Watch what's happening with Modern Monetary Theory**

- In our recent Economic War Room with Glenn Beck, we discussed modern monetary theory as the government's response to just about everything. It's the sort of thing that people who win the lottery do.

- They spend money like crazy.
- The elitists are now in power, so they're on a spending spree.

**4. The Elitists are on a spending spree! The big problem is that it's our money that they're spending.**

**Kevin Freeman believes it's all part of the plan.**

**Own nothing and be happy! The government and corporations will take care of you.**

- › That's how you get to the prediction that in a decade you will own nothing and be happy.
- › The government and big corporations will own everything and take care of you in a nanny state sort of way.
- › They'll pay for it with modern monetary theory or MMT for short. MMT basically says that if you own a printing press, you can print as much money as you want.

"That's true until people stop taking your monopoly money. With \$30 trillion of debt and counting, that's a lot of paper money. The debt will hit \$50 trillion before this decade is out." -Kevin Freeman

\$50 trillion in debt! That's a shocking number and will result in a great deal of pain and tears. But as we discussed with Glenn Beck, **it will open the door for even greater government control.**

## 5. A look at how this new programmable money could be used:

- › Instead of paper money, the government will create a digital dollar. That way you don't have to print anything.
- › We explain the dangers of a digital dollar in Episode #146 on programmable money. Imagine if the government can control everything you buy or sell.
- › They can decide where, how and if you're allowed to use your money.
- › If there's too much inflation, they'll just use their algorithms to control your spending.
- › They can reward what they see as good behavior and punish bad.
- › If your cholesterol seems too high, you might not be allowed to buy a cheeseburger.
- › Or if there's a lockdown, you might not be allowed to spend money more than a couple of miles from your home.
- › It's a digital lockdown and it's a tracking mechanism.

"You think I'm exaggerating? Get a copy of Game Plan and read it. Many people thought I was exaggerating years ago, but they've seen it all happen." -Kevin Freeman

## 6. Free speech under attack, it could even determine how much money you get.

- › The next step in the crazy world is realizing that your thoughts and your speech will be subject to the same draconian controls as they're doing with your money.
- › You already know that people were punished and de-platformed for saying the wrong thing about where COVID came from, whether or not Ivermectin works, or if the vaccine has side effects.
- › Even discussing natural immunity to Covid could get you into trouble.

### Truth vs. Control??

"Even though the truth eventually came out, have you seen any remorse? Have you seen anyone apologize to the people who shared what we now know to be true, but were totally de-platformed? No! The beast of censorship is on the loose. We've had videos taken down and have been demonetized despite accurate reporting in a truthful way. And this is the problem, in a financial crisis, the government will want to control information like never before." -Kevin Freeman

**Other likely scenarios might look like this during a financial crisis:**

- » What if you knew a bank was failing? If you told somebody you might be charged with causing a run on the bank.
- » You would not be allowed to buy or sell because you were peddling misinformation.
- » What if you warned that debt levels were too high in the government or even with a favored company? We're facing a financial crisis. Those in government have the philosophy of never letting a serious crisis go to waste.

**ALERT: Instead of dealing with the crisis and using the strategies we've laid out; it seems likely the government will use the serious crisis to usher in the Great Reset and total economic control.**

**7. Get ready for the Great Reset. We built A War Room for you!**

Our plan is for a positive Great Reset! Think of us as the conservative version of Devos.

**A. Let's review the weapons of the left's warfare:**

The weapons of their warfare are things we warn about all the time in the Economic War Room®:

- » ESG
- » Climate agenda
- » Green New Deal
- » Modern Monetary Theory
- » Control of currency
- » Programmable money
- » Financial crisis
- » Cyber-attacks

**These are the tools they intend to usher in Act Two of the Great Reset and it is important to understand the real agenda behind each of these.**

**B. The good news is that you are not helpless and there is a path forward. We can shift the power back in the direction of "We the People."**

- » Did you see the Canadian trucker convoy? They stood up and banded together. Standing together we can have a positive impact on America.
- » Do you remember the small ships of Dunkirk? It was the local citizens, with their small ships that were part of a miracle that saved the world from Adolf Hitler.
- » It's time for everyday Americans to stand together. If Main Street America is united, we can make a difference in helping America with its founding values.

## 8. We need a Game Plan for our side!

### How to develop your personal financial game plan.

Kevin Freeman wrote the book **Game Plan, How to Protect Yourself from the coming Cyber Economic Attack** eight years ago. It's more relevant than ever! Today, the threat's widened, and we have added to our response within the Economic War Room and the NSIC, but the principles still apply.

**Starting at the Personal Level, let's look at how you can better protect your money and why you need an NSIC advisor.**

First, You need to get a good financial advisor to walk through the minefield ahead. Kevin Freeman has said this from the beginning. Here is a quote from page 217 of the book **Game Plan**.

**"Make a diligent search for a trained investment professional who understands how to develop a proper strategy."**

**Unfortunately, few investment pros have gone beyond traditional financial training to study the kind of risks we now face. That's why we established the National Security Investment Consultant Institute (NSIC).**

- » The NSIC Institute trains investment professionals to recognize economic warfare threats and prepare strategies to combat the problem.
- » Clients interested in protecting their investments, as well as finding new ways to promote America's national security interests through their investments, will gravitate toward advisors who have earned the NSIC credential.
- » We started with small in-person classes at Oklahoma Wesleyan and Hillsdale College. It quickly became obvious that we would have to scale our efforts for more rapid development.

**To scale our efforts, we focused on two strategic priorities:**

- » **A public effort to educate America on key threats - We launched the Economic War Room** on BlazeTV to provide direct information to the public. We built the War Room for you to understand the Geopolitical threats and provide solutions to the challenges we face. Also, to help clients understand how their money is being weaponized against them, how they can respond, and better be prepared with their investments. **In addition, we wanted to help clients connect their current financial advisor with the NSIC Institute, or help you find an NSIC financial advisor that better understands the challenges ahead.**
- » **We aligned the NSIC training with Liberty University's online training curriculum.** **Starting in April**, Liberty University will provide the NSIC online financial advisor training. This allows us to accommodate larger classes and move quickly to better equip advisors for all that is happening today.

**Through these efforts, we found a large and growing number of clients wanting help.**

**In the Economic War Room, we predicted:**

- » **The China threat before most people saw it.**
- » **The ESG investment risks and woke capitalism well ahead of the curve.**

Clients are clearly ready for NSIC help and want an advisor that understands and can help navigate through all of the minefields ahead.

## Don't Wait:

**The NSIC classes are starting in April with Liberty University. Get involved now!**

- » If you're a client, talk with your advisors and nominate your current financial advisor so they can join our inaugural online class starting in April!
- » If your advisor refuses, let us know. There are plenty of advisors who would love your business.
- » If you're an advisor, sign up now. Whether client or advisor, go to [www.economicwarroom.com/advisor](http://www.economicwarroom.com/advisor).

**The NSIC institute will be walking through all the threats, with briefings from the many experts who join us regularly in the Economic War Room.**

- » We have China experts, financial experts, money managers, experts on ESG, and our alternative LSV, experts on alternative assets such as farmland, art, gold, and cryptocurrencies.
- » We do not provide clients with specific advice. That's what advisors are for. But we do provide training, education, and information on the threats and how to combat them.

**The goal is to help you weaponize your money, your spending, giving, and investing, and for all of us to push back before it's too late.**

**9. We have to stand up now against tyranny. Working local and at the state level will be critical.**

**Stand for personal liberty. Find local relationships you can trust.** Use a local financial advisor. Find a local banker. Work at the state level.

**Economic War Room and the NSIC serve as a think tank for advisors, their clients, and the investment community. We are working on some Big Ideas, some examples include:**

**Our Digital Texan plan.** Other states are interested in this as well:

- » Imagine if you could have your checking account backed by gold and you could spend it as easily as with a debit card.
- » What if we had extraordinary digital security and it was backed by the blockchain?
- » What if the state made it legal tender and stood behind it?
- » What if your state protected your privacy by contract, agreed not to monkey with your money?
- » What if that meant you could own gold with the ultimate convenience? And yet you could pay a fraction of an ounce with someone you could trust keeping track of it.
- » What if the gold you held wasn't taxable, even if it went up in value compared to paper dollars?
- » Do you think people would want that? Or would they prefer paper money?

All the ideas above are Constitutional. We outlined it in Game Plan and on our show about programable money, and we're holding some private summits on it as well.

---

"Think of these and other ideas we develop as conservative versions of Davos, and our plan is for a positive Great Reset." –Kevin Freeman

---

**The above is just one of the many solutions developed in the Economic War Room.**

- » We're going to dedicate an entire upcoming episode to powerful solutions because we know a serious crisis is coming.
- » We know the other side has evil plans for their enrichment and our loss of liberty.
- » That's why we've crafted our own plans.

### Closing Thoughts From Kevin Freeman:

*"We shouldn't let a serious crisis go to waste. In 2008, I offered the Pentagon some solutions for the economic crisis. They were ignored. The answer? We're talking to the people now. 'We the people' are supposed to be the government's boss. It's time we acted that way. Let's start with our constitutional rights of freedom of speech. Let's continue with state's rights under the Constitution. States can push back on the monetary craziness. They can derail the ESG Great Reset agenda. They can solve the border problem. Yes, let me repeat. States can solve the border problem, and we have a solution for that hatched in the Economic War Room. We believe that the local financial advisor trained by the NSIC can be a huge part of the solution. We've identified 10,000 advisors to train that will represent \$1 trillion of capital. That's enough money to make an enormous difference.*

*If Twitter cancels you? We can spring up an alternative that's better with free speech that makes it non-cancelable. We'll have alternative cloud hosting, alternative emails, alternative banks. It's a big vision, but it's not impossible. \$1 trillion can cover it. When Americans see an alternative, they'll run to it. We need to bathe all of this in prayer.*

*The Bible says that you should not say, 'I will enter such and such a city, do business there and make a profit. Instead, you ought to say if the Lord wills, I will do this'. The Bible teaches us to submit our plans to the Lord and he will bring them pass. But he does it His way, we just need to remain willing listening to His voice, ready to obey. That's our commitment. That's the purpose of the Economic War Room. We have a big vision and we're looking for those who are willing to help." –Kevin Freeman*

### 10. Much of The "Make America Great Again" Vision was defined in the book *Game Plan* in 2014.

One of the readers of Kevin Freeman's books was none other than Donald J. Trump and whether he knew it or not, a lot of his Make America Great Again vision matched with *Game Plan*, written in 2014.

In fact, Kevin published an eight-step plan that might sound familiar. The steps included in the book are:

1. **Recognize the global war underway**, and that meant recognizing China as an adversary.
2. **Take reasonable precautions**, and that meant cyber protection and develop the Digital Texan backed by gold.
3. **Get money moving without money printing**. We've blown that one so far, but we can get back to fiscal discipline.
4. **Achieve energy independence**. We did that under Trump, but Biden threw it away.
5. **Reduce regulation**. Again Trump did it, but Biden is trying to reverse course.
6. **Develop a workable tax code**. Trump did that. We streamlined deductions and we made our corporate taxes competitive. That was good.
7. **Teach what America is all about**. That's the opposite of the 1619 project. That's the opposite of Howard Zinn and Critical Race Theory. America isn't perfect, but America is good and can be better if we follow the Constitution. We need to tell our children the truth.
8. **Return to our spiritual roots**. We need this now more than ever. Second Chronicles 7:14. Let's repent. Let's seek His face. Let's ask God to heal our land. The days ahead can be thrilling and rewarding. That's the challenge. Let's win.

**Remember, what we see as a marketplace, our enemies view as a battlespace.**

## Action Steps:

**The NSIC classes are starting in April with Liberty University. Get involved now!**

1. If you're a client, ask your advisor to participate and nominate your current financial advisors so they can join our inaugural online class starting in April! Go to [www.economicwarroom.com/advisor](http://www.economicwarroom.com/advisor).
2. If your advisor refuses, let us know. There are plenty of advisors who would love your business.
3. If you're an advisor, sign up now. Whether client or advisor go to [www.economicwarroom.com/advisor](http://www.economicwarroom.com/advisor).
4. Get Kevin Freeman's Book Game Plan, How to Protect Yourself from the coming Cyber Economic Attack. [https://www.amazon.com/Game-Plan-Protect-Yourself-Cyber-Economic/dp/1621572005/ref=tmm\\_hrd\\_swatch\\_0?encoding=UTF8&qid=&sr=](https://www.amazon.com/Game-Plan-Protect-Yourself-Cyber-Economic/dp/1621572005/ref=tmm_hrd_swatch_0?encoding=UTF8&qid=&sr=)

5. Interested in the Digital Texan, Sign the Constitution Currency Petition here: [www.economicwarroom.com/money](http://www.economicwarroom.com/money)

**6. You can help by weaponizing your money.** (See Below)

7. Remember, we built the Economic War Room for you. Understanding the geopolitical landscape and threats against your money, your livelihood, and your way of life will allow you to be better prepared for multiple scenarios. Be sure to sign up for our weekly updates at [www.Economicwarroom.com](http://www.Economicwarroom.com).

8. Again, If you have a financial advisor, make sure they have your values and interest at heart. Make sure they really understand what ESG investments mean for our future. Suggest that they become part of the NSIC institute and nominate them to participate in our online certification.

**ATTENTION: Remember if you have not contacted your financial advisor, it is time to make it happen now.**

**9. Weaponize your money toward principles that support Liberty, Security, and Values (LSV).** You control your giving, spending, and investing. Nominate your financial advisor to attend our Founders' class coming soon.

- **Investing.** We suggest you get a like-minded financial advisor. We've done surveys and a clear majority of investors want an advisor who matches with their political and cultural beliefs. Unfortunately, Wall Street is pushing for you to just take what they offer in order to force a leftist agenda on you.
  - o "If your advisor isn't willing to match your investments with your values, send them to us for training and education. If they won't do that, I can promise you that there are lots of other advisors looking for new clients." -Kevin Freeman

**10. It is time to fight the economic war we are facing. Nominate your financial advisor at [EconomicWarRoom.com/advisor](http://EconomicWarRoom.com/advisor) and let them know you think this would be a great opportunity for them. Classes are launching in Spring 2022, and our list is growing fast.**

**11. Also, if you have not already done so, please consider the following:**

Be sure to sign up for our free weekly [Economic Battle Plans™](http://EconomicBattlePlans.com)

- o If you are following Economic War Room you will be on the leading edge as it relates to global threats, geopolitical analysis, and how you can weaponize your money to strengthen America. Your money, livelihood, and way of life are at risk and these tools are designed to mobilize America to protect their economic liberty.

In the **Economic War Room®**, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The small ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.

### Shareable Quote:

**“Think of these and other ideas we develop as conservative versions of Davos and our plan for a positive Great Reset.”**

-Kevin Freeman, CFA

Make No Mistake: Programmable Digital Currencies Are Weaponizable Money

<https://www.zerohedge.com/economics/make-no-mistake-programmable-digital-currencies-are-weaponizable-money>

This is how the "stakeholder capitalism" that the WEF wants will work. You will only be allowed to use or buy from "approved" or "credible" businesses. Eventually even your bank account or credit cards won't work with "unacceptable" businesses.
