

## The Shocking Climate Change Agenda

Climate Change is a hot topic today. Advocates and fearmongers are crying, “The world is coming to an end. Everything is getting worse – more floods, more droughts, more hurricanes.” But when we look at the records, there are a lot of fluctuations, but not any long-term trends.

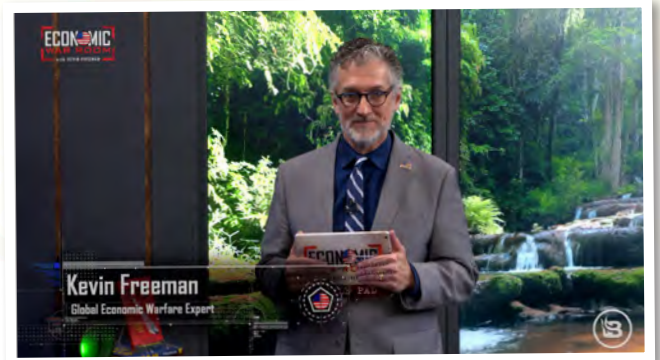

Case in point, hurricanes aren’t getting more intense.

- » They’re not making landfall more often.
- » They’re not becoming more frequent.
- » They go through cycles – periods where there are a lot more, then there are a lot less.

As you’ll see in this briefing, the strategy behind the climate change movement is to socialize leading global economies through deceit and fear-mongering.

Today, we’re going to charge into three potent topics related to climate change:

1. The actual science of global warming, which is the cold science part.
2. The political discussions around climate change, which is the hot talk part.
3. What we should be doing? Regarding – the politics, the energy and the planet.

**YOUR MISSION:** Understand the devious agenda behind climate change and global warming and how they are shamelessly stealing our earnings and our liberties. Together we can expose the lies and protect America from a global, marxist tragedy.

**⚠ ATTENTION:** The climate change movement is largely a scheme to enforce a global redistribution of wealth and power.

Ep. 6-220 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and David Legates, Ph.D. Dr. Legates is a research fellow at the Independent Institute. A retired professor of climatology in the Department of Geography and a retired adjunct professor in the Department of Applied Economics and Statistics at the University of Delaware. He received his Ph.D. in Climatology from the University of Delaware and has taught at Louisiana State University, University of Oklahoma, and University of Virginia.

Dr. David Legates is the former Deputy Assistant Secretary of Commerce for Observation and Prediction and former executive director of the United States Global Change Research Program. He has been research scientist at the Southern Regional Climate Center, Chief Research Scientist at the Center for Computational Geosciences, and visiting research scientist at the National Climate Data Center.

Dr. David Legates has been published more than 125 times in refereed journals, conference proceedings, monograph series, and has made more than 250 professional presentations. He is also co-author of the book, "[Hot Talk, Cold Science: Global Warming's Unfinished Debate.](#)" ([CLICK HERE](#)) We welcome, Dr. David Legates to the Economic War Room®.

## 1. The Actual Science Of Global Warming is not Scientific.

### CASE STUDY:

#### In Northern Delaware, we are seeing more floods and droughts.

- » It has nothing to do with climate change and has everything to do with land use change (which is an environmental planning issue we can address).
- » Over the last 80 years Northern Delaware has gone from being very rural to very urban.
  - It now has urban street flooding, which leads to flooding of the rivers and streams.
  - It has a lot more people demanding water.
  - When they get low on water resources, they have droughts much more frequently.

Did climate change? Or, did our land use patterns change?

“We are seeing more floods and droughts; it has nothing to do with climate change. In fact, most of the variables we look at, we’re not seeing any major change connected to carbon dioxide. Carbon dioxide seems to be only a minor player in climate change.” — Dr. David Legates

“There is a man-made impact on the local climate – land use. But in terms of the broader picture, Mother Earth, so to speak, has not felt the same kind of impact from human activity.” —Kevin Freeman

**⚠ WARNING: The global apocalyptic vision that so many are claiming – telling us the science is 100 percent settled – is not trustworthy.**

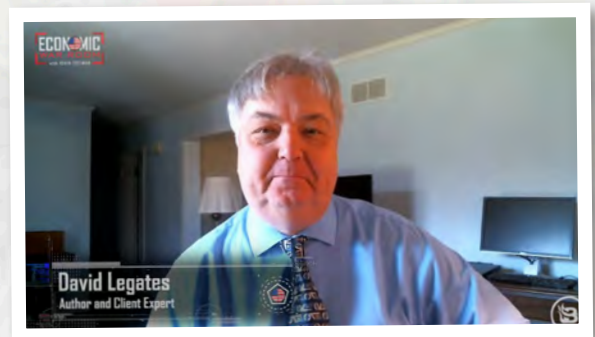

**2. The Climate Change Models Overstate the Conditions.**

Global Warming and Climate Change are Not Backed by Dependable Scientific Research.

- » It’s not backed by the observations.
- » It’s backed by the models which overstate the case because:
  - One, they are tuned to give a much greater signal to a carbon dioxide change in temperature than we see in the real world.
  - Two, they tend to use a carbon dioxide model that says coal, for example, is going to increase about five times between now and 2100.
  - Nobody believes that coal use is going that way.

“There are ridiculously extreme scenarios of where we project the carbon dioxide concentration of the atmosphere to be. That’s why the models tend to give you extreme values that really can’t be trusted.”

—Dr. David Legates

**CO2 Quiz.** (answer key below)

1. **Carbon dioxide is poison to the earth, the evil enemy of all life in existence.**  
True or False
2. **Carbon dioxide is plant food. Plants grow better with more carbon dioxide.**  
True or False

**More Facts about Co2:**

- » Commercial greenhouses often pump two to four times more carbon dioxide ambient levels into their facilities – **because plants grow faster.**
- » Not only do plants grow faster, but they are also more water efficient under higher carbon dioxide because the stomata don't have to open as wide, so they don't let out as much water vapor.
- » Satellites are showing there's a general greening of the planet, except in places where there is urbanization taking place and in places where there is large scale deforestation.
- » Most of the planet is **showing a greening, and that's due to increased carbon dioxide.**

“We need plants to keep the atmosphere clean, keep the atmosphere full of oxygen. So more carbon dioxide is better. In fact, a lot of people have argued that we are carbon dioxide starved in the atmosphere. So, (in that sense) more would be better.” —Dr. David Legates

Answer Key: 1. False, 2. True

3. There is a Treacherous Agenda for Giving False Narratives About Climate Change.

“I got started way back when it was ‘global cooling.’” And my concern has always been that this discussion is not about the science, and it never was. It is a way to enforce a global redistribution of wealth.” — Dr. David Legates

The next question is: How do you **FORCE** global redistribution of wealth between countries?

- » Climate change becomes the agent to get wealthy countries to pay for the sins they have created against the rest of the planet.

“John Kerry is making it a very loud vocal agenda – the purpose of climate change is to pay reparations from one nation to another nation.” —Kevin Freeman

**ALERT: THE GOAL OF THE GREEN NEW DEAL IS TO CHANGE THE ECONOMIC STRUCTURE OF THE PLANET.**

AOC's Chief of Staff (<https://www.nationalreview.com/news/aocs-chief-of-staff-admits-the-green-new-deal-is-not-about-climate-change/>) said the Green New Deal wasn't about climate change, it was about how to change the economy.

“Ottmar Edenhofer, for example, who was at the third working group of the last IPCC report, essentially said this is about changing the way we do the economy, not really about climate change.” —Dr. David Legates

- » “**IPCC stands for Intergovernmental Panel on Climate Change.** The IPCC is the scientific group **assembled by the United Nations** to monitor and assess all global science related to climate change. Every IPCC report focuses on different aspects of climate change.” (<https://www.nature.org/en-us/what-we-do/our-insights/perspectives/ipcc-report-climate-change/>)

#### 4. How the Climate Agenda Really Works:

It's About Fabricating a Crisis.

The climate agenda sounds like "[Rahm's Rule](#)"

Remember this,  
(Rahm Emanuel, former President Obama's White House Chief of Staff): "You never want a serious crisis to go to waste. And what I mean by that [is] it's an opportunity to do things that you think you could not do before." They have invented a serious crisis and now they're trying to capitalize on it.

Look at Hegel's three-fold dialectic.

1. Create a problem.
2. The people react emotionally to the problem and demand a solution.
3. A solution is offered by the fabricators of the problem, which benefits them and usually multiplies more power to the State.

"It's frightening to me because across the spectrum scientifically, we're relegating, we're pushing the truth down and the political agenda up." —Kevin Freeman

MORE ABOUT HAGEL: From Wikipedia:

**Dialectic about Minor Logic, It is about Dispute and Not the Search for Truth**

✳ **Dialectic** (Greek: διαλεκτική, *dialektikḗ*; related to dialogue; German: *Dialektik*), also known as the **dialectical method**, is a discourse between two or more people holding different points of view about a subject but wishing to establish the truth through reasoned argumentation. Dialectic resembles debate, but the concept excludes subjective elements such as emotional appeal and the modern pejorative sense of rhetoric.<sup>[1][2]</sup> **Dialectic may thus be contrasted with both the eristic, which refers to argument that aims to successfully dispute another's argument (rather than searching for truth), and the didactic method, wherein one side of the conversation teaches the other. Dialectic is alternatively known as minor logic, as opposed to major logic or critique.**

Within Hegelianism, the word *dialectic* has the specialized meaning of a contradiction between ideas that serves as the determining factor in their relationship. Dialectical materialism, a theory or set of theories produced mainly by Karl Marx and Friedrich Engels, adapted the Hegelian dialectic into arguments regarding traditional materialism. The dialectics of Hegel and Marx were criticized in the twentieth century by the philosophers Karl Popper and Mario Bunge. Dialectic tends to imply a *process* of evolution and so does not naturally fit within classical logics, but was given some formalism in the twentieth century. The emphasis on process is particularly marked in Hegelian dialectic, and even more so in Marxist dialectical logic, which tried to account for the evolution of ideas over longer time periods in the real world.

**WARNING: Climate Change Agenda Could Lead To A Demand For Fewer People In The World.**

#### 5. The Problem going with 100 Percent Renewables:

The argument is – somehow we think that we can go 100 percent renewable and not have a problem. We’re never going to get there.

We will have:

- » Rolling blackouts.
- » Loss of energy.
- » People without heat.
- » All sorts of disasters that are human created.
- » The opportunity for additional radical solutions to manufactured problems allowing for greater top-down control.
- » This will reduce the population which may be the main goal, at least for some.

**“It seems by preventing a crisis that doesn’t exist, we may be causing another crisis or several crises like food, energy, water and so forth.” —Kevin Freeman**

**6. What Should We Be Doing Regarding The Politics, The Energy, and The Planet?**

**You've got to go back and look at the data with Truth and Real Science.**

The questions are:

- » Are we getting into more floods and droughts that are climate created?
- » Is the planet getting so warm that things aren't going to be able to grow?

The answer to both NO!

**Dr. Legate's book "Hot Talk, Cold Science" teaches us that humans are adaptable:**

**There is good news:**

- » We can physically move if we need to move. (For example, we do not have to live in a desert where there are ongoing historical droughts.)
- » We can create answers and solutions using real science rather than having the scientific elite hammer us over the head telling us, "we must decarbonize, change our lifestyles and stop eating so much food and meat."

**7. The Controlling Power of ESG: Environment, Social, and Government.**

The idea of those three is to essentially control everything you do. It's not just, "What are you doing for the environment?" It's, "You have to be following the governmental playbook."

- » You must be doing what is believed to be socially acceptable.
- » If you're outside that realm, then the government starts to hammer you.
- » The government will start to push you to the back, and that becomes more of a problem for you.
- » It's a hammer to make people follow along and do what the government wants.

- ⚠ WARNING:** If the scientists can say, “This is the way it is, and everybody agrees with us,” even though it’s not true, they now have the ability to regulate:
- » Our energy use, food, and even water.
  - » All the necessary elements of life can be controlled by the elite technological, scientific people, even though they’re not using real data. —Kevin Freeman

To learn more about Dr. David Legates, you can go to the Independent Institute at <https://www.independent.org/>.

He is also working with the Cornwall Alliance, which is found at <https://cornwallalliance.org/>. It’s a Christian organization – with scientists, theologians and economists – that’s interested in finding poverty issues and to promote the gospel that way.

Dr. David Legates’ book that he co-authored is available at Amazon - [Click Here](#)

## WHY SHOULD YOU CARE?

- » The global apocalyptic vision that so many are claiming – telling us the science is 100 percent settled – is not trustworthy
- » There is a treacherous agenda behind giving false narratives about climate change.
  - It is a way to enforce a global redistribution of wealth and power.
- » All the necessary elements of life can be controlled by the elite technological, scientific people, even though they’re not using real data.
- » If we’re going to win this major attack on our wealth and our freedoms, we must take action. Together we can expose the lies and protect America from a global, marxist tragedy.

## ACTION STEPS

1. Uncover the real agenda behind the Green New Deal.
  - a. The Trouble with the Green New Deal <https://www.politico.com/magazine/story/2019/01/15/the-trouble-with-the-green-new-deal-223977/>
  - b. The Green Surrender <https://www.nationalreview.com/2022/09/the-green-surrender/>
  - c. Green Rope-a-Dope: China Watches as America Greens <https://www.nationalreview.com/2022/05/green-rope-a-dope-china-watches-as-america-greens/>
  - d. Economic Growth, Bad Science and Climate Alarmism <https://blog.independent.org/2022/10/27/economic-growth-bad-science-climate-alarmism/>
2. Go back and look at the true scientific data and make conclusions based on solid information.
3. Read Dr. David Legates book “**Hot Talk, Cold Science: Global Warming’s Unfinished Debate.**” ([CLICK HERE](#))
4. Understand that we as humans are adaptable:
  - a. That we can physically move if we need to move.
  - b. That we can create answers and solutions using real science rather than having the scientific elite hammer us over the head with their agenda.
5. Fight against the controlling power of ESG: Environment, Social, and Governance.
6. Forward this to all your friends and loved ones and ask them to sign up for our free Economic Battle Plans™ at <https://www.economicwarroom.com/battleplans>
7. Join us weekly in the Economic War Room. We are building new solutions with thought leaders that come through our doors every week.
8. Watch or Listen to Economic War Room each week (<https://www.economicwarroom.com>) and study the resources to help you understand the geopolitical landscape and threats against your money, your livelihood, and your way of life to better prepare you to enter the battle.

**ATTENTION: Again, if you have not contacted your financial advisor, it is time to make it happen! If you don’t have an advisor, it’s time to consider getting one.**

9. Weaponize your money toward principles that support Liberty, Security, and Values (LSV). You control your giving, spending, and investing. Nominate your financial advisor to attend our next class at Liberty University February 2023.
- **Investing.** We suggest you get a like-minded financial advisor. We've done surveys and a clear majority of investors want an advisor who matches with their political and cultural beliefs. Unfortunately, Wall Street is pushing for you to just take what they offer in order to force a leftist agenda on you.
    - o "If your advisor isn't willing to match your investments with your values, send them to us for training and education. If they won't do that, I can promise you that there are lots of other advisors looking for new clients." –Kevin Freeman
    - o If you are following Economic War Room®, you will be on the leading edge regarding global threats, geopolitical analysis, and how you can weaponize your money to strengthen America. Your money, livelihood, and way of life are at risk and these tools are designed to mobilize America to protect our economic liberty.

**ORDER YOUR COPY TODAY**

AND GET A SECOND BOOK **FREE!**

**LIMITED TIME OFFER**

AccordingToPlanBook.com/ewr

In the **Economic War Room®**, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The small ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.

### Whatever Happened to Global Cooling?

[NOTE: In our research, we found numerous recent articles attempting to dismiss the idea that climate fears of the 1970s were of global cooling and a new ice age. In fact, many of the articles that were once archived from the *Washington Post*, *Newsweek*, *US News*, *NY Times*, have been removed and are no longer available. However, we have provided links to scanned images of articles starting in 1970 and running to 1979. Global cooling/ice age fears dominated science then much the way that global warming and climate change fears exist today. The following links are just a small fraction of the stories published during the 1970s.]
