

Space Race 2.0: How to Win the Economic War of the Cosmos

There is a battleground that often goes unnoticed and unchecked...SPACE.

Americans tend to assume that space wars are either a thing of the future, or of the past. Members of one camp envision sci-fi space battles, while others remember the fall of the USSR and assume the U.S. acquired and has since maintained complete dominance.

However, as our ancestors would turn their gaze toward the heavens, so must we. Nations that have used economic warfare to attack the U.S. are currently rushing into space with villainous intent.

What some have deemed too expensive and unimportant, our enemies have defined as their next opportunity for conquest. When assessing the battleground of Space, we must realize that we face many opportunities but also many threats as the second space race has already begun.

In this briefing we will discuss the following:

- » Space is the economic battleground for our future.
- » The danger of arrogance as the U.S. is unprepared.
- » The Three Foundations of Economic Dominance and how China is using them in Space.
- » Restoration point – ISAM, SkyCorp, and investing patriots.

YOUR MISSION:

To become aware of the opportunities and threats posed by Space Race 2.0 and learn how you can get involved to preserve the American rights to life, liberty, and the pursuit of happiness.

ATTENTION: The Chinese Communist Party is seeking to gain control of the natural resources and strategic battlefields in Space. Western Civilization cannot let that happen.

Ep. 6-229 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and Lieutenant General Steven Kwast. Lt. Gen. Kwast (USAF Ret.) is a good friend of the Economic War Room® and a patriot.

Steven Kwast is the Chief Executive Officer of Skycorp Incorporated, a company pioneering future sustainable space construction and economic development. His military career spanned every major combat operation, from a young Lieutenant Fighter Pilot in Desert Storm, culminating as the Commanding Air Force General at Bagram Air Base in Afghanistan. He subsequently rose to the highest levels of command in the United States Air Force. Before retiring from the Air Force, Lt. Gen. Kwast pushed for the formation of the U.S. Space Force to help the U.S. focus its efforts in Space.

Why Space?

Space, the final frontier. Since the beginning of recorded history, humanity has gazed into the stars with wonder. In the last century technological advances brought about a new era as our species ascended above Earth's atmosphere and pierced the vast unknown of the heavens. Suddenly our world became small and the race for control of this new frontier began. We understand the fascination of our ancestors, but why is space so important today and why should we be concerned with its use?

“The real battlefield... is space, because space is almost unlimited resources, unlimited information, unlimited capability for the human race to reach new heights, save Earth and save our civilizations.” – Steven Kwast

For better or worse, whoever controls space has the potential to control the whole Earth. This is an economic war we must not lose.

Lessons in History

The Cold War Space Race – the fear of Russian space weapons

During the last cold war, American schoolchildren huddled under their desks to prepare for potential nuclear attacks. This fear was only heightened when Russia launched the first man-made satellite into orbit. Could Russia nuke the U.S. from space?

These fears led to the Space Race where Russian and American scientists rushed to develop new space technology. An economic war the U.S. won by bankrupting their Soviet counterparts.

Since the collapse of the Soviet Union, many Americans have assumed that the Final Frontier had been properly secured by the U.S. Sadly, this is not the case. Since

the fall of the Soviet Union, U.S. taxpayers have progressively become less interested in space and have focused their votes and finances on more local issues.

At the same time, some members of the U.S. military and Congress have ignored the final frontier, opting instead for increasing the “wokeness” of terrestrial society.

In some counts this can be attributed to arrogance (believing that the U.S. has already dominated it and it poses no threat to national security) while other cases could be more sinister.

WARNING: Many Politicians and even some in NASA have taken a “kumbaya approach” to space believing it is all a joint peace mission. America’s Adversaries have other plans.

Going further back in time – we see the fall of empires due to arrogance of their dominance i.e., Rome and Byzantine Empire.

In the last century of the Roman Empire (around 400 A.D.) the empire had grown vast, and the city of Rome was known as ‘The Eternal City.’ Many Romans believed Rome was too strong to be

defeated and that the city would never fall into enemy hands. In the year 410 A.D. the Visigoth King Alaric succeeded in his assault on Rome, sacking the city and marking the beginning of the end of the Roman Empire. The arrogance of Roman leadership had allowed for the defenses in the Western Empire to dwindle. The resources that once lined the coffers of Roman legions had been reallocated for use in the far reaches of the empire. As the West began to struggle economically it became prone to attack. Sound familiar? While the enemy may not yet be at the gates, we can be sure they would like to be.

If the fall of Rome were not enough, the Eastern Empire suffered a similar fate. Refusing to learn from their failures in the first millennium, the Eastern Empire, now known as the Byzantine empire, built massive walls around their capital, Constantinople, and felt safe behind them. The greatest technological

advances for walled city defense had been implemented, nobody could possibly penetrate them. Or so the leadership of Byzantine thought until the ottomans arrived in 1453 with gunpowder bombards. They decimated the walls as the story of Jericho echoed through the minds of all its inhabitants. After the dust settled, the capture of Constantinople led to the complete collapse of the Byzantine Empire. Arrogance leaves one unprepared as they underestimate potential enemies who might seek their demise.

IT'S TIME TO LEAD THE SPACE RACE!

1. **Threat of China** – China on dark side of moon – manufacturing battle on Earth has spread to space.

Today, The U.S. feels safe behind its massive military yet remains ill-prepared in the final frontier. Organizations like UNOOSA, which promote international cooperation in the peaceful use and exploration of space, provide a guise of safety where no country could possibly have sinister plans for this extra-terrestrial domain. However, in 2019 China landed a spacecraft on the far side of the moon. This poses multiple threats.

- » This side of the moon never faces Earth, so no one can directly monitor the activity of this spacecraft.
- » China managed to communicate with this spacecraft through another satellite to send lunar images to Earth.
- » China can access, communicate with, and potentially construct or mine on the dark side of the moon... unchecked.

“We have not even built the infrastructure in space to see or know what’s going on. So, whatever China is doing on the dark side of the moon or the back side of the moon, we can’t see it.” –Lt. Gen. Steven Kwast

2. Understanding the Three Foundations of Economic Dominance

Transportation

- » The faster and cheaper you can move people and materials the more efficient your economy can be. Having an edge in transportation on your opponent often leads to victory.
- » In World War II, both Axis and Allied powers attacked transportation routes to prevent the reinforcement of troops or slow the manufacturing and production of military equipment.

Communication

- » The faster and cheaper you can communicate, or move information, the more efficiently you can maneuver and strategize from your front line to your rear guard.
- » Historically the army with the fastest scouts and messengers would have superior access to information and could more easily turn the tide of battle.
- » The introduction of the telegram, telephone, radio, and internet each revolutionized the U.S. and provided Americans with a wealth of information, now at their fingertips.

Energy

- » Energy is the building block of any economy. Without energy transportation and communication are slowed.
- » All technological advance requires energy and with more of it available, greater accomplishments are on the horizon.
- » With more energy factories, you can scale production providing higher outputs.
- » Transitioning from the slow communication and transportation of horseback messengers to the automobile and train required new inventions in coal and steam-powered engines.

ATTENTION: China is using the Three Foundations of Economic Dominance in Space. Transportation, Communication, and Energy will be controlled in space and on earth by whoever controls these areas of economic dominance.

- 3. Space Race 2.0 Has Already Begun.** China has been launching satellites and other spacecraft to begin gaining an advantage in transportation, communication, and energy to win the economic war for Space.

Transportation

- » China is currently moving materials into and out of space cheaper and faster than we can.

Communication

- » China can communicate anywhere between Earth and the moon and has begun to research the back of the moon with potential for manned or unmanned mining or construction operations we are unable to monitor.

Energy

- » China is using solar and nuclear power in space to generate more energy and could easily use this to power new space technology.

China's war on US Businesses

Here on the ground, China has been waging an economic war on American businesses.

- » China has targeted American businesses, especially in the tech industry.
- » China uses spies and controlled assets to gain access to intellectual property.
- » Stolen technology is then recreated in China.
- » Chinese companies flood the market with cheaper versions of the stolen product and limit the original creator's ability to make the profits they need by taking market share.

WARNING: This is especially dangerous in Space Race 2.0, as aerospace technology companies, the backbone of America's space programs, are constantly under threat of Chinese infiltration. Espionage of this kind could put the U.S., and the liberty of people worldwide, in jeopardy as the CCP could gain an edge in the race to control the final frontier.

China may not be the only threat.

4. The Russian Threat? - A [Russian satellite that can destroy other satellites.](#)

In August of 2022, Russia launched Kosmos-2558, a military satellite equipped with a projectile that can shoot down other satellites. Such an action would present the U.S. and the world with the first space conflict and would technically break current space laws. However, international laws can be very difficult to enforce. Taking out military satellites is one thing, but they could also target civilian satellites like StarLink or other networking and communications systems.

5. In addition, we must look at the resources in space, access, and control.

Regardless of threats, space is full of natural resources that can often be the source of disputes and conflicts on Earth.

- » Asteroids often contain sizable quantities of valuable metals that could be harvested and used in manufacturing.
- » Access to these resources will likely be decided by who gets to them first... and has the capabilities to defend them.
- » As with any resource, having it does not necessarily mean keeping it.

**6. A big Idea for US and Western Civilization
Competitive Advantage – ISAM.**

All of this sets up the need for America to lead the space race with a new breakthrough ISAM technology!

In-Space Assembly & Manufacturing - ISAM

While most frontiers only require minor technological advances to gain an edge, Space is a different beast. Each advance into this frontier will require major technological and economical shifts. One of these shifts may already be on the verge of completion, it's called In-Space Assembly & Manufacturing, or ISAM for short.

This concept comes about as a solution to the cost and impracticality of launching satellites from the earth, as the largest cost in the production of satellites is the preparation required to sustain a 7-minute launch through the atmosphere.

THE BIG IDEA: ISAM seeks to remove this wasted capital by completing construction in space and even using materials gathered in space. While human life in space for the purpose of manufacturing is currently untenable, advances in robotics and wireless communication have opened our horizons as unmanned manufacturing in space is now a very real possibility.

7. ISAM and The SkyCorp Monster Garage. While the technology exists to make ISAM happen, further investment is needed. The question is will liberty-minded Americans invest, or will China covertly invest to gain and control the technology?

- » Lieutenant General Steven Kwast who now serves as CEO of SkyCorp, a company seeking to use ISAM technology to make the resources of space more accessible.
- » SkyCorp's patented technology would be able to build, repair, and restore satellites in space at a fraction of the current cost.
- » **While they have the technology, the production of such a large-scale project will require massive amounts of capital.**

NOTE:

In keeping with his values of Liberty and Security for the people, Lieutenant General Kwast seeks to protect SkyCorp from the threats of corporate and political espionage to make sure this technology does not fall into the wrong hands. With fears that China might send large sums of money to American investors in turn for the selling of trade secrets, SkyCorp must be very selective when considering investors.

“People that believe in America... those are the people I want to make rich.”

– Lt. Gen. Steven Kwast

As SkyCorp seeks investments to fund this Space Race 2.0, they are looking to you for help.

“Forensic accountants will be needed to trace money trails and make sure the money has not been passed down from insidious third parties like China or the deep state. While this is very specific, SkyCorp will also need the people of America to invest, not only for possible financial returns but for the future of our nation and our children. With this technology the world our children get to live in could be a more free, secure, and fruitful one than we see now.” –Lt. Gen. Steven Kwast

8. Key Summary From General Steven Kwast

Space Race 2.0, it's an economic war for the heavens. If a competing nation like Russia or China that does not value individual liberty were to win this race, there would be no telling how much control they could have over the future of our children and grandchildren. However, with rising concerns about enemies within our own camp and the growing Marxist liberal agenda within the U.S. government, it begs the question if a government of any kind is worthy of controlling space and its resources. We must win the war for Liberty in the US and the Space War to keep America free.

- » America is a nation founded on the principles of individual liberty and freedom where the government was to be of the people, by the people, and for the people. This was the case throughout the first and second world war as individual Americans came together to make victory possible. Especially in the context of industry.
- » American businesses waged financial war long before the government got involved, as private enterprise prepared the U.S. military to have the technological and industrial power needed to succeed.
- » In this way, the American war machine was not just branches of military, but entire industries owned by American entrepreneurs and their shareholders.

As we look to this final frontier, the resources of space must belong to the people and not any government who could ever seek to use these resources against the people and control each of us from above.

“You can deliver energy from space. You can deliver materials from space. And you can deliver ubiquitous communication from space in ways that do not require any facility, any infrastructure on the ground. So, now, a young woman in Sudan can

communicate in ways she’s never communicated before. She has energy and she has the resources to do something with her life to make it better. It’s powerful.” -Lt. Gen. Steven Kwast

These unlimited resources will be heavily contested as whoever manages to gain control of them will likely have the capability to control the world.

WHY YOU SHOULD CARE?

- » Whoever controls space controls the planet. It will either be in the hands of those that believe in Liberty and Humanity, or those that think they know better and want complete control.
- » Space provides an almost unlimited opportunity as technological advances allow us to explore and understand more of it each year.
- » With the potentially unlimited resources of space, portions of the planet that have had limited access to energy, resources, and communication would be able to receive them.
- » New Innovations in Space will make a better, cleaner world!
- » China is trying to steal our intellectual property to win the Space Race.

ACTION STEPS:

1. Learn more about SkyCorp at <https://www.skycorpinc.com/>.
2. As you invest, consider the three areas of economic dominance, and look at innovations in those areas that could deliver breakthroughs. If you have a financial advisor encourage them to study these areas.
3. Qualified Investors may want to ask their financial advisors if an investment in or around SkyCorp makes sense for their portfolio.
4. Ensure you are not unknowingly supporting the CCP with your investments.
5. Encourage your federal lawmakers about the importance of Space for winning this Economic War being waged against America.
6. If you have a financial advisor, make sure they have your values and interests at heart. Make certain they really understand what ESG investments mean for our future. Suggest that they become part of the NSIC institute and nominate them to participate in our online certification (see below).

7. Start Weaponizing Your Money Today with our new partner, **Patriot Mobile. They make weaponizing your spending easy!**

- **Patriot Mobile is for Economic War Room Patriots!** Patriot Mobile is the ONLY Conservative wireless provider.
- They use a portion of the profits they make to fund causes that align with freedom and liberty and not the progressive leftist agenda! Other carriers support left-wing causes you would never support.
- Patriot Mobile uses the SAME cell towers that all the other carriers use, so your service quality will be the same.
- They have a variety of packages, so one will fit your budget and you will be supporting Liberty, Security, and Values.
- GO to PatriotMobile.com/ewr | Use Promo Code EWR to get FREE Activation!

ATTENTION: Again, if you have not contacted your financial advisor, it is time to make it happen! If you don't have an advisor, it's time to consider getting one.

IMPORTANT: If you have a financial advisor make sure they are aligning your investments with your values and that they understand the economic war being waged against you. (See more on Weaponizing your money below)

1. Financial Advisors sign up for the online NSIC class at Liberty University. If you are a financial advisor, go to www.NSIC.org and sign up for more information. Our next class starts March 20, 2023.
2. **Join us weekly in the Economic War Room®.** We are building new solutions with thought leaders that come through our doors every week. Understanding the geopolitical landscape and threats against your money, your livelihood, and your life will allow you to be better prepared as the Great Reset is waged against America. Be sure to sign up for our weekly updates at <https://www.economicwarroom.com>.
3. It is time to weaponize your money. **We are in an economic war, as you seek ways to Weaponize your Money in your Investments, Spending, and Giving, consider an NSIC-trained financial advisor.**

ATTENTION: Clients already with a Financial Advisor - Make sure your financial advisor has your values and interests at heart. Make certain they really understand what ESG investments mean for our future. Suggest that they become part of the NSIC institute and nominate them to participate in our online certification at <https://www.economicwarroom.com/advisor>

If you do not have a financial advisor, now is a good time to get one. We will soon publish NSIC advisors who have participated in the training and elected to become part of the NSIC Institute.

4. Weaponize your money toward principles that support Liberty, Security, and Values (LSV). You control your giving, spending, and investing. Nominate your financial advisor to attend our next class at Liberty University.
 - Investing. We suggest you get a like-minded financial advisor. We've done surveys and a clear majority of investors want an advisor who matches with their political and cultural beliefs. Unfortunately, Wall Street is pushing for you to just take what they offer in order to force a leftist agenda on you.
 - "If your advisor isn't willing to match your investments with your values, send them to us for training and education. If they won't do that, I can promise you that there are lots of other advisors looking for new clients." –Kevin Freeman

- If you are following Economic War Room®, you will be on the leading edge regarding global threats, geopolitical analysis, and how you can weaponize your money to strengthen America. Your money, livelihood, and way of life are at risk and these tools are designed to mobilize America to protect our economic liberty.

In the **Economic War Room®**, we encourage Americans to be the “little ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The little ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.]

Shareable Quote:

“The real battlefield... is space, because space is almost unlimited resources, unlimited information, unlimited capability for the human race to reach new heights, save Earth and save our civilizations.”

– Lt. Gen. Steven Kwast (USAF ret)

Lieutenant General Steven Kwast’s strategy to protect SkyCorp and its intellectual property from outside sinister forces is a Godsend for the future of Liberty in America and the world. The opportunity that presents itself to become one of the patriots who invests in SkyCorp to help America win Space Race 2.0 is not to be taken lightly. We do not sell investments. However, we do recommend liberty, security, and values (LSV). What SkyCorp intends to do passes the LSV test with flying colors. If you are interested in investing in SkyCorp contact your financial advisor. Every investor should have an individual personal investment advisor, who can help evaluate to see if investments meet their financial, moral, and current life goals. Talk to your advisor and ask them about LSV and how your investments align with these principles of Liberty, Security, and Judeo-Christian Values. If your advisor does not know about these but would be interested in learning how to find great LSV investment opportunities (potentially like SkyCorp) recommend they join the NSIC Institute. At the NSIC Institute we train advisors so they will know what to look for and how to monitor the markets to find you the best LSV investment opportunities. Your money should be actively used to build a better and brighter future for you, your family, and our nation.

*DISCLAIMER: The Economic War Room® and its affiliates do not provide investment, legal, or tax advice. In cases where guests or others may discuss investment ideas or political opinions, these should not be viewed or construed as advice. The sole purpose is education and information. And, viewers should realize that in any case past performance is not indicative of future results. Neither Kevin Freeman, his guests or EWR-Media Holdings, LLC suggests, offers, or guarantees any specific outcome or profit. You should be aware of the real risk of loss in following any strategy or investment even if discussed on the show or any show-affiliated materials or websites.
