

## Background Briefing – Executive Order for US pharmaceutical supplies

This is an Economic Battle Plan™ update with specific next steps to help close the Executive Order being worked on in the White House to get our pharmaceutical business back in the US.

[CLICK HERE](#) and sign the petition to get this done!

Kevin Freeman and Rosemary Gibson covered the risks of China having control of key US medicines in [Episode 6 and the Economic Battle Plan™](#). This has been an Economic War Room strategic priority since 2018 and we are seeing significant progress as it relates to awareness and potential solutions! An Executive Order is in the works, but it is time to push this over the finish line. Please see the link to that economic battle plan™ here as it relates to the China Rx threat and sign the petition above to make this happen.

Your briefing this week highlights the national security threats and potential life and death issues related to Chinese medications being shipped to the US. While we have covered this in detail before, you will also learn more about the real impact of America's job losses as we gave China control of our pharmaceutical industry core chemicals/compounds. Also, we will look at additional national security issues with COVID-19 pandemic creating the perfect storm for America's medical supplies. Unfortunately, it is all happening exactly as predicted and now is the time to close the gap.

**Your Mission: To build momentum and push for a signed Executive Order to address the China Rx problem in America.**

**"We can't make aspirin. We can't make vitamin C. We can't make the medicines to treat coronavirus patients who are hospitalized. And that's because China controls about 80 to 90 percent of the core chemicals and raw materials."** –Rosemary Gibson

Ep. 3-94 (OSINT) Open Sourced Intelligence Briefing. This includes quotes and summaries of conversations in the Economic War Room with Kevin Freeman featuring Rosemary Gibson. Rosemary Gibson is the author of *China Rx: Exposing the Risks of America's Dependence on China for Medicine*. Rosemary has been instrumental at identifying the China Rx threats and creating the need for change within our government.

1. **China's takeover of key medications has impacted the US labor market and our Pharmaceutical Industry more than many realize.**

We can't make the antidotes to treat bacterial infections because we were falsely told these were all low-skilled jobs that Americans did not want but China did.

- » With generic drugs, we were told they had to be made overseas because Americans wouldn't do that work. We were also told that there weren't enough US workers available.

**The Truth:**

These are talented chemist and pharmaceutical engineer positions. If you ever have a chance to go for a pharmaceutical manufacturing facility, these are hugely complex operations and they have to be handled with great care and great expertise.

**CAUTION:** While China was targeting our Rx industry, why did we make it easy for them to steal it? Did Washington politicians, Corporate America, and Wall Street put profits over US National Security and American workers?

**"I went back recently and got some photographs of what a closed pharma plant once was. There were 50 buildings that were demolished. This was Bristol-Myers Squibb in Syracuse, New York. They used to produce 70 percent of the world's supply of penicillin material, and that's just for one drug. This is what we've lost in our country. And in so doing, we've exposed ourselves to the risks of dependence on another country, whatever country it may be, let alone China. And what we've seen now is a preview of what biowarfare can look like. There is no question. We can't make the antidotes to treat bacterial infections." –Rosemary Gibson**

2. **China has limited interest in assuring the quality of products/medicines that are exported to America.**

» One of the many shockers in researching China, was understanding the attitude of the producers over there. **They said one of the reasons that their product is so cheap is because they assume no liability for it.**

It's buyer beware:

- We've seen this with the million masks that they sold to the United States that didn't work and that weren't protecting our health care workers.
- The million test kits that were flawed.
- The nine million gowns that are supposed to be sterile to be used in operating rooms, but were contaminated.

**There's just a lack of caring** about the products. And shame on us for buying this stuff.

3. **The production of key medicines in the US is a national security and a health issue for America.**

**"It is no different than firing a missile, it is a different path, but the effect is that thousands of people die."** –Rosemary Gibson

When every country is trying to protect themselves from a pandemic, we are at risk with outsourced production.

**"It's every country for themselves. We can't turn to our friends and say, can you send some Propofol, you know, a sedative for people on ventilators? We can't turn to our friends and ask them if they have epinephrine when people are crashing. So, we have to have some capability and I think the national security aspects have really come to the forefront here. Without our own supply of medicine, our country would be in chaos." –Rosemary Gibson**

- » During the course of this pandemic, 80 countries have banned exports of medicines and protective gear. **It means it's every country for themselves.**
- » An easy way to destabilize a country and to demoralize the population is to withhold medicine.
- » The Chinese government threatened to withhold medicines from the American people. This is a threat where people will die in large numbers for the lack of access to antibiotics to treat pneumonia, bronchitis, and sepsis.
- » Hundreds of thousands of people would die with untreated infectious disease. We are seeing a preview of biowarfare right now.
- » If China controls the antidote, we will really be in severe situation.
- » Medicines can be used as a weapon of war just like food has been used used in. Go back and look at how food was used as a weapon in World War I and World War II. Medicines can be used as a weapon of war in the same way.

## Why you should care:

- This affects us all.
- You want to make a difference. Pushing this Executive Order across the finish line can make a difference. The American people need to show support and solidarity.
- It is important to stay aware of the status of this major initiative and Rosemary Gibson makes it easy to follow at her Twitter account.
- Your health and your life may depend upon getting the right medicine and efficacy someday.
- As key medicines move back to the US there may be patriotic investment opportunities in this industry.

In the Economic War Room®, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The small ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.]

PAGE 5

## Action Steps:

**IMPORTANT: How to encourage the White House and Congress around the Executive Order to get key pharmaceuticals production back to America.**

Learn more about the American Provisions Executive order for our Federal Government department, Defense or Military Veterans Health and Human Services to buy American generic drugs that we so desperately need in this country. Rosemary Gibson provides key updates and contact information.

1. Follow Rosemary Gibson on Twitter [@Rosemary100](#). Get the updates on what's going on, a specific action step where I encouraged people to contact the White House.
2. Let the White House know that you support an executive order with "buy American" provisions for our Federal Government, Defense Department, Military Veterans and Health and Human Services. They should buy and support American generic drugs desperately needed in this country.
3. There have been hundreds of people already making certain their voice is heard. Let's get even more!
4. Go to this link and urge the president to sign the executive order for "Buy American" for our medicines. [CLICK HERE](#)
5. The White House announced intentions to do this. We'd like to see it as soon as possible. It's time to get this across the finish line now.
6. As we take control of our medicine production in the US, look for new patriotic investment opportunities in the pharmaceutical industry that may open up. Ask your financial advisor to get up to speed on this and other patriotic investments with our **NSIC certificate from Liberty University**.

# ECONOMIC BATTLE PLAN™

EXECUTIVE ORDER FOR US PHARMACEUTICAL SUPPLIES

3.94

CLEARED FOR RELEASE 07/02/2020 (ECONOMIC BATTLE PLAN™ POINTS: 77)

**We need more Economic Patriots on the team!** Consider what you can do now to help strengthen America or even help someone in need. Keep in touch with your congressional representatives. Choose from the list or set your own goals:

- ✓ Get others to sign up on our website (<https://www.economicwarroom.com>) and review our free weekly Economic Battle Plans™. Each of these will address critical solutions to the threats highlighted in this briefing.
- ✓ At our [Economic War Room®](#) website, sign up to TheBlaze for our complete weekly shows. Please use our code (**ECON**) from that link for a discount and FREE trial.
- ✓ Follow, like, comment, and share on [FB](#) and [Twitter](#). Look for short video segments on [FB](#) and make sure those are shared. We recognize these tools may be compromised at times, but if they are not filtered, they are the major platforms available to reach out to the public. [Know that alternatives to the social platforms listed above are under EWR consideration.]
- ✓ Check out XOTV (<https://xotv.me/channels/233-economic-war-room>), a new free speech video platform that Economic War Room is proud to partner with. Access is FREE but consider making a donation to EWR on that website to help with Economic War Room's research and production costs.
- ✓ You are welcome to share this battle plan and our short video segments with friends on [FB](#) or [YouTube](#). We set up the Economic War Room® to be your resource for information, preparation, and mobilization.
- ✓ Do this now! Have a financial action plan based on multiple geopolitical scenarios developed now. Advanced preparation is key. Trying to figure what to do when an economic event happens is usually too late.
- ✓ Talk with your financial advisor as it relates to your savings/investments. Ensure your advisor understand the potential impact economic/geo-political scenarios could have on your portfolio. LOOK FOR ECONOMIC WAR ROOM'S ADVISOR AND INVESTOR ONLINE TRAINING COURSES COMING SOON.

## Shareable Quote:

Regarding China controlling key medications.

**“It is no different than firing a missile,  
it is a different path, but the effect  
is that thousands of people die.”**

–Rosemary Gibson
