

China Threat: War? “Probable”

China has been at war with the United States of America for decades. There is just one problem, America seems to have no idea it is happening. This economic war has been waged in secret as China’s strategy of Unrestricted Warfare has allowed them to sneak into our nation and attack us from within while they ramp up for a hot war within their own nation. Until recently, most of the American military did not even recognize China as a real threat. Now, the US military has admitted that war with China is “probable.”

In this briefing we will discuss the following:

- » Open Borders – China’s Trojan Horse
- » War With China
- » China’s Spies
- » China WHO? China’s Covid Policy
- » China’s Decline
- » Preventing War With China

YOUR MISSION: Understand the threat China poses to our national security and what can be done to protect America.

ATTENTION: We have been in a cold war with China for decades. They have begun to ramp up preparations for a hot war and we are unprepared.

Ep. 7-251 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and Gordon Chang. Gordon is a friend of the Economic War Room® and an American Patriot.

Gordon Chang is the author of “The Great US-China Tech War” and “Losing South Korea,” which were booklets released by Encounter Books. He also authored “The Coming Collapse of China” and “Nuclear Showdown: North Korea Takes On the World.”

Gordon lived and worked in China and Hong Kong for almost two decades. He is a columnist at The Daily Beast, a Forbes.com contributor, and a blogger at World Affairs Journal. He also writes regularly for The National Interest. He has given numerous briefings at the National Intelligence Council, the CIA, the State Department, U.S. Strategic Command, and the Pentagon. Gordon frequently appears on CNN, Fox News Channel, Fox Business Network, Bloomberg, CNBC, MSNBC, and PBS. He is a regular co-host and guest on The John Batchelor Show. He has served two terms as a trustee of Cornell University.

1. Open Borders – China’s Trojan Horse

Everyone knows the story of Troy and how the Greeks were able to take down the famous city using a massive wooden horse as a gift. After the horse was drawn into the city, the troops hidden inside were able to open the gates and allow the Greek army inside the walls during the night. This may be the most famous invasion story in history.

In modern America, we face a similar invasion threat. **The Chinese Communist Party (CCP) has been actively capturing the elite of our nation and tricking or bribing them into working against us.** One example of this is the open border policy of the Biden Administration.

While the final chapter is yet to be written, the evidence suggests that the Biden Administration has been in bed with the CCP, and the pro-China decisions they have made support that shocking conclusion. **Their open border policy has allowed hundreds, if not thousands, of Chinese military-aged men to cross the border illegally.**

“How do you get from China to Central America to enter the United States without permission from the Chinese Communist Party? This is a nation with social credit scores limiting your ability to travel unless you’re toeing the

government line. This is a nation that tells all its citizens, 'You're essentially spies for China.' All the corporations, 'You work for the Chinese Communist Party.' So I can't even imagine that these are all refugees that somehow found their way to Central America without permission of the Chinese Communist Party." –Kevin Freeman

While it is possible that some of these people have good intentions, it is very likely that many of these men crossing our borders are Chinese operatives who were either sent or granted permission by the CCP (which governs every aspect of the lives of the Chinese people).

2. War With China

The migrant threat is not just a theory. China has made multiple statements of its plan to de-Americanize the world and has even declared America to be its primary enemy, whom they intend to destroy. They have declared a "People's War" on America.

As the decades of failed China policy here in the US have weakened our ability to respond, China has ramped up and prepared for war. **Now, even Henry Kissinger, in an interview with Bloomberg, has admitted that war with China is "probable."** This hot war would obviously wage throughout the Pacific region, centering on Taiwan where the conflict would likely begin. However, it would not only be fought on the Pacific front.

"But that war, by the way, is not just going to be in Asia because we are seeing a surge of Chinese migrants coming across our southern border. You know, most of them, almost all of them are just fleeing from a distressed China, China that is failing. But some of them are quite disturbing. We are seeing packs of males between, let's say, five and 15 a group. They are males of military age. They are unattached to family groups. They pretend not to speak English. And US Customs and Border Protection knows that some of them have connections to the Chinese military. So the question is, 'What's going on here?'

I think that these are saboteurs. They are going to be the ones attacking America when there is a war in Asia. They're going to be going after our grid. They're going to poison our reservoirs, assassinate officials, detonate bombs in shopping centers, starting wildfires. This is something that the Biden administration is not paying attention to."

–Gordon Chang

The influx of Chinese military-aged men is likely a Trojan horse. These men would be in the country and could operate using guerrilla warfare tactics to damage our infrastructure, attack civilians, sow unrest, and even assassinate key leaders.

This would be the first modern international war to reach the American mainland.

⚠ Attention: China is already in a cold war with the US and is preparing for a hot war. If war does break out, it will include attacks on American soil.

3. China's Spies

Not all of the Chinese migrants who have crossed the border are agents of the CCP, many of them are fleeing China in hopes of a better and more free life here in the US.

However, all citizens of China are required under Chinese law to serve the CCP. **Espionage is a requirement of all Chinese citizens wherever they live in the world. If the CCP comes knocking, you must obey.**

Kevin explains that **“We have these Chinese police stations here in North America. You wonder, even if you got into America as a legitimate refugee, couldn't you be blackmailed? ‘We still have your family in Beijing and therefore you must do this for us.’”**

Many of these Chinese spies may not even be spying willingly but feel they have no other choice. Blackmail via threats against loved ones, their businesses, or family wealth could coerce many individuals who would otherwise prefer to live without any contact with the CCP.

“China has done that in the past. It has sent out, for instance, its consular officials, ministry of State security agents that have been floating around the US, and they have been blackmailing and intimidating Chinese nationals on our soil. And we got to remember that every Chinese national is not only subject to this blackmail but is under actually a legal compulsion to commit espionage. That's in the 2017 national intelligence law. But that's also, of course, because of the Communist Party's top-down system, where no entity in China, no individual can disobey an order from the Party.”

—Gordon Chang

While these migrants are not all coming with malicious intent, the CCP may still find a way to use them for their sinister plot to destroy America.

- » **This same strategy was employed by the USSR during the cold war when their spies would enter America pretending to be fleeing communism.**
- » They would then take jobs in innocent fields like childhood education and local journalism.
- » They were able to work toward media and educational control.
- » They infiltrated every aspect of society where they could push the culture away from American tradition and toward Marxism.

China picked up where the USSR left off and is now preparing the next phase which is far more threatening.

Attention: China is spying on the US and is preparing for war on our soil.

4. China WHO? China's Covid Policy

Maintaining its Art of War strategy, the CCP aims to conquer the US without the US even knowing it is happening until too late. They are using ancient techniques to subvert our nation into decline so that we destroy ourselves and surrender our own sovereignty without ever fighting a hot war.

Covid provided China with a new strategy, whether it was intentionally released or not. China found that the World Health Organization (WHO) could be used to subdue the whole earth as people were terrified of a new disease.

First, we must analyze China's response to Covid-19. Gordon Chang explains that **"once this pathogen got out into Chinese society, China deliberately spread it beyond its borders.** They lied about transmissibility. They knew it was highly contagious, and told the world it was not. And while they were locking down their own country, they were pressuring others to take arrivals from China without travel restrictions. So clearly, this was a deliberate spread of disease." If China wanted to do this again, they could send diseases across our open border and strike America first.

This does not conclusively prove that China caused the Covid-19 outbreak, but it does prove that **the CCP took advantage of the opportunity to test the effectiveness of a bioweapon and, more importantly, to test the peoples and leaders of other nations to see how they would respond.** They found the exact thing they had hoped for. Panic and fear.

Next, we must understand China's relationship with the WHO.

"We can go to January 2020, which was a critical month. We know that that month the Chinese knew that Covid 19 was highly transmissible from human to human. And what they did was they told the World Health Organization that it was not. And the W.H.O. on January 9th and on January 14th, one in a statement and the other in a tweet, told the world that Covid 19 was not readily transmissible human to human. The doctors, by the way, at the W.H.O. knew that this was highly contagious. Maria Van Kerkhove, an American epidemiologist/virologist, said this looked just like MERS because she was a MERS specialist. So she knew that and she was a senior doctor. But nonetheless, **the political leadership of W.H.O. purposefully spread a narrative that was not only dangerous because it lulled health officials around the world to sleep,** but they had to know that this was false. So, you want to talk about the deliberate taking of life without justification? I call that murder. China murdered nearly 7 million people and they did it through, among other things, the World Health Organization." –Gordon Chang

The relationship between the WHO and the CCP is more thoroughly discussed in [our special episode on the WHO and national sovereignty](#). Ultimately, the WHO has been captured by the CCP as the top leaders of the WHO are all connected to the CCP and have defended the CCP even when they were obviously spouting lies.

China intends to use the WHO to convince nations around the world to surrender their sovereignty to the WHO in the case of another international health crisis... the problem is, the WHO wants to have the power to declare an international health crisis. This would give an organization that has been captured by China the authority to declare an emergency and take control of the world governments.

The worst part: **The Biden Administration is in full support of giving the WHO this power and wants to surrender American sovereignty in the event of another global health crisis.**

Attention: The Biden Administration wants to surrender American Sovereignty to the CCP through the World Health Organization.

5. China's Decline

Why then, if China is so close to succeeding in a secret subversion of America, are they ramping up for a hot war when supposedly America still has the most powerful military in the world?

Desperation?

China is a nation that has seen massive economic growth over the last century as Western industry moved their manufacturing to China because of the low cost of labor. However, in the last few years, China has stepped out on a glass bridge, and it's starting to crack.

- » China's real estate market, which makes up the majority of the investments of a typical Chinese investor's portfolio, has begun to collapse.
- » Major real estate firm Evergrande had a major collapse in 2021 which led to public outrage and forced the CCP to step in.
- » This even deeply weakened the optimistic outlook for the Chinese Market
- » The Chinese birth rate has seen rapid decline, reaching new lows in 2022. (This is blamed on the one-child policy producing a male-heavy generation)
- » China's population crisis also hinges on the rapidly aging population.
- » Only about 30% of China's population is military-aged, and that number is declining rapidly

"We're a far stronger society than China. And as I mentioned before, China is in a state of distress right now... they need us so much more than we need them. And we can make that clear to China.." –Gordon Chang

China's list of internal issues has led to multiple protests and the CCP seems to have recognized that if they do not succeed soon, they may no longer have the ability to try.

Without a large Chinese military, there is no way China could succeed in governing the world. To accomplish their goals they will have to act soon and transform the culture of their people to inspire high birth rates so the next generation is large enough.

As the aging population phases out of military age, China will not have the manpower to succeed in a hot war. Their cold-war strategy only works if the threat of a hot war is real. For this reason, **the CCP has recognized they may not have much time left to try and dominate the world and they do not want to miss the window of opportunity.**

Warning: China's leaders are becoming desperate as their nation is in rapid decline and if they do not attack now, they may never get the chance to.

6. Preventing War With China

As China ramps up for war, America must be prepared. But, more importantly, war must be prevented.

America is still the strongest nation on earth. We need to act like it. America's China policy has been one of weakness and appeasement, much like Hitler was appeased before World War Two. If we are to prevent war, playing nice will only take us back to Ardenne and Iwo Jima, instead, we must wield our power to challenge the CCP and show them this is not a war worth fighting.

Gordon Chang claims "We need to do everything differently." Here is his list of possible changes America could make to help prevent war or at least prepare for it.

- » "We need to close down those six or seven additional [CCP] police stations that are now operating.
- » We need to close the four Chinese consulates that are being used as bases for subversion and espionage.
- » We need to strip down the embassy staff in Washington, just down to the ambassador.
- » We need to close their state banks because they've been laundering money for criminals, Chinese criminals as well as others.
- » We need to stop investing in China because all of those companies are linked according to their military-civil fusion doctrine. So we're financing the Chinese military. Even when we put money into a nominally private company.

- » We need to stop trade to the greatest extent possible and get our factories off Chinese soil.
- » We can say we will defend Taiwan, and we can offer them a mutual defense treaty.
- » We can pre-position munitions on the island, something by the way, we didn't do in Ukraine.
- » We could put a tripwire force of US personnel in Taiwan.

“People will say, yeah, all of this is incredibly risky. And I say [that] is not a meaningful objection at this time because, after more than three decades of truly misguided China... policies, we have no safe options. So we have got to consider those things which were considered to be unacceptable... because that's how dire the situation is. We can rescue it, but we need to have political will. We need to defend ourselves... The Chinese are fast preparing to go to war. Xi Jinping can't stop talking about it. He's also [focused on] rapid military buildup, trying to sanction-proof his regime, stockpiling grain, purging the Chinese military of officers who don't want to go to war, and he's mobilizing civilians for war. They want to go to war.” –Gordon Chang

The time for risk aversion is long past, those strategies failed. Now, as China gears up for war, we need to present our strength and strip them of any upper hand they have been working to form.

Putting pressure on the CCP to back down, and showing a strong face that dares anyone to challenge the greatest nation in the world, will put the CCP in a weaker position where war would be less likely. Their goal is to attack an unprepared and unaware America, like a tiger pouncing on its prey. If we, instead, make it abundantly clear that we are watching and are ready to crush them, they are more likely to retreat than dare to fight.

Most importantly, Gordon Chang calls for PRAYER!

 **Attention: War with China is probable, but there are things our nation can do to prevent war and save millions of lives.**
