

## Ambassador Carla Sands: The War On The West

Ambassadors hold an integral role in American politics and culture, though many Americans don't know who they are or what they do.

In Ancient Rome, ambassadors (Apostolos) were trained and educated in Roman culture and then sent into newly conquered regions to Romanize them. They would convince the people to dress Roman, use Roman currency, eat Roman foods, enjoy Roman pass-times, etc. The idea was to assimilate the people of the Roman Empire into Roman culture.

Modern Ambassadors take this a step further as their role is to build relations with the leaders of other nations and gain a better understanding of how these relationships can benefit America in that nation and the region. Ultimately, the role of an ambassador has always been to prioritize the needs of your home nation and fight for the interests of your own people.

### In this briefing we will discuss the following:

- » Carla Sands' Experience As Ambassador
- » Different Ambassadors
- » Contrasting Administrations
- » War On The West – De-Industrialization
- » Killing Carbon – A World Without Us & How To Fight Back

**YOUR MISSION:** Learn about the essential role our ambassadors play in securing America, the difference between Biden's and Trump's ambassadors, the plot to destroy the Western world, and what you can do to help save America.

**ATTENTION:** America and Western culture are under attack as weak leaders allow foreign powers and globalist elites to push their evil agendas.

Ep. 7-256 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and Carla Sands. Carla Sands is a friend of the Economic War Room® and an American Patriot.

Carla Sands is an 8th-generation Pennsylvanian whose ancestors fought in the American Revolution and the Civil War. She is currently serving as the Vice Chair of the Center for Energy & Environment at America First Policy Institute. In 2021-2022 she ran as a GOP candidate for US Senate in Pennsylvania. Carla was appointed by President Trump in 2017 to represent the United States as Ambassador to Denmark, Greenland, and the Faroe Islands.

Prior to her ambassadorship in 2017 to 2021, Carla became the first woman to serve as the chairman and CEO of Vintage Capital Group. She also served on the boards of Pepperdine University, the Los Angeles Police Foundation, the Museum of Contemporary Art in Los Angeles, UCLA School of Arts and Architecture, as well as the Los Angeles Philharmonic and Music Center.

## 1. Carla Sands' Experience As Ambassador

In America's early years, the leaders of our nation sought to remain uninvolved in the wars and politics of the European continent. This practice became known as isolationism. Until World War I, America had succeeded in having minimal involvement in international affairs. Since then, America has consistently been involved in and directly impacted by the geopolitical climate of the world.

After World War II, America became the world leader, rebuilding Europe and spreading liberty around the world.

- » During that era, **America made agreements that directly benefited other nations more than the US because the US was more concerned with beating the Soviet Union in the Cold War.**
- » A few trade agreements could favor other nations as long as they chose America and Democracy.
- » Now that the Soviet Union has been dissolved, these agreements no longer benefit the US and a good leader would seek to replace them with modernized agreements that better reflect the world we are in today so America benefits as well.

This is a responsibility that ambassadors know well.

“My team and I worked every day to create jobs here at home in the United States and to secure our country from Russia and China. And we actually increased US exports while I was the US ambassador by 43%... Also, we worked to ban Huawei, The Chinese made 5G, from the Kingdom. It was the first EU foreign minister. The Danish foreign minister came out and said, we’re not going to use 5G equipment from non-democratic nations. And then we also blocked, working with the White House, the Russian gas pipeline, Nord Stream 2. The only place it was never completed was my area of responsibility, and we were very proud of that. And we had the first year it was in Danish waters, the second year in their exclusive economic zone, and the third year I had the threat of sanctions. And so it was a success.” –Amb. Carla Sands

**Carla Sands, and the other ambassadors under Trump, were tasked with restoring America-first principles in their offices to ensure that American interests were secured in their relations with the nation they were sent to.**

Due to the ongoing economic war with China and the other BRICS nations, Carla and her team worked to prevent Russia and China from gaining political or economic power in the kingdom of Denmark. Carla and her team succeeded multiple times in preserving the integrity of Denmark so they would not be dependent on Russia or China.

## **2. Different Ambassadors**

Sadly, times have changed. The wonderful America-first practices of the Trump administration have been cast aside for what seems to be America-last under Biden.

**In the first few months of the Biden administration, many of the changes made by President Trump and his administration were overturned or replaced with bad policies and weak agreements.**

“You put America first, which is kind of an interesting position. I mean, that’s what we would expect our ambassadors to do. But it doesn’t seem to be the case [under the Biden administration].” –Kevin Freeman

Ambassador Sands and her team have studied the public documents from the current ambassadors and those who served under the Obama administration. Here is what they found:

- » Ambassadors under Biden and Obama tended to have no private sector experience and were not properly equipped for the role.
- » Their offices tended to be more chaotic than those under Trump.
- » Russia and China tended to gain more influence in foreign nations.
- » Policy, agreements, and all other relations tended to favor America less than those created under President Trump.

In stark contrast, the ambassadors under Trump functioned in their role with great success. They established American culture and fought for American values and interests in the nation to which they were assigned.

**⚠ Attention: American ambassadors to other nations are supposed to put America first and fight for America’s interests around the world but under the Biden administration, this has not been the case.**

### 3. Contrasting Administrations

Trump made it one of his main campaign claims that he would restore an America-first style of leadership in international politics. He spoke about the failure of older policies and agreements that favored other nations and left America with the shortest straw.

“The point is not to be the most loved. The point is not to be the most feared. The point is to be the most respected... we were more respected under President Trump than we are under President Biden and probably more than we were under President Obama.” –Kevin Freeman

**Under President Trump's leadership, NATO received almost 400 billion in new dollars from our NATO allies.** Those nations were abusing old agreements where America would supply them with defense and security as long as they were democracies.

As years progressed they decided they would rather use their tax-payer money to fund comforts like education while they left the cost of the defense of their nation to the American taxpayers. **Trump renegotiated those deals and ensured that nations who use the US for their national security also help pay the US for that service.**

Sadly, the respect Trump had earned, which secured peace in critical parts of the world, has since been squandered by the Biden administration. The Afghanistan withdrawal made America look weak and Putin took advantage by invading Ukraine.

“Biden, and his administration, starting on day one, undid all of the great Trump policies that made us energy independent.

And that was for the first time in many, many years. And we were on our way to being energy-dominant. We want to be energy-dominant. This is important for our economic success, but also for our national security. We are now once again beholden to foreign nations like Saudi Arabia and even, believe it or not, Venezuela, with that dirty, dirty energy, their energy comes out seven times dirtier than American energy because here in the United States, we're highly regulated. Our harvesting is cleaner than anywhere in the world.” –Amb. Carla Sands

America looks weak on the world stage.

- » Biden regularly allows China to make political, military, and economic moves that threaten US interests.
- » The failure in Afghanistan makes the US military look weak and our leadership foolish.
- » The Ukraine war has proven that Biden's diplomatic teams failed to prevent escalation.
- » The petrodollar arrangement has been ignored by Saudi Arabia which now also transacts in the Chinese Yuan.

- » BRICS has gained popularity and its members have gained confidence as America looks weak.

America has gone from being the most respected nation on earth to being tested and mocked on the world stage by multiple enemies at the same time.

**⚠ Attention: Under Biden, America is no longer viewed as the most powerful and respected nation in the world by many seeking to challenge (like the BRICS).**

#### 4. War On The West – De-Industrialization

How was America able to decline in status so quickly? It was not as fast a descent as it may seem.

Many Europeans, even those from ally nations, love Democrat leaders like Obama and Biden while they openly despise President Trump. This is due in part to the propaganda they are fed on a daily basis, but it is also because they have a limited understanding of the way global politics impact them. Some even seek America's failure as a global leader.

**Since World War II, America has protected Western Europe from the oppressive regimes that have sought to crush the people and strip them of their liberty.**

Europeans have enjoyed the benefits of this protection with no financial burdens. It has been so long, they do not know how much it would cost to protect themselves.

This can also be seen in the medical field. European nations often have “free healthcare” where their taxes are used to provide healthcare as a government service. It sounds great, but when you follow the money, **medical research is primarily funded by the US market. This means Americans pay high prices for medical care because Europe does not.** The Europeans mock the American healthcare system with no idea that the system they mock provides them with all the best technology at a lower price, making their system possible.

Elites have seen this trend of entitlement in Europe and have taken advantage of the European people, making many of them useful idiots who will obey the ideology of the elites.

The current goal of these elites is to crush the industrial powerhouse of the West so they become dependent on the elites for their survival.

“Our civilization right now is on an anti-human deindustrialization pathway led in Europe, but we’re following closely behind. This is the most dangerous time in my lifetime, and perhaps since the Civil War for our nation and for our survivability... There’s a de-industrialization agenda. And Russia, China, and India want nothing to do with this, right? They intend to grow economically and use every kind of energy at their fingertips that they can buy or steal.” –Carla Sands

**The leadership of the Biden administration has been intelligently designed to lead the American people, and the people of the Western world, into a dystopian future where the Elites control everything, and everyone else is a slave.**

**Attention: The elites are destroying western society by eroding culture and destroying industry so we will all depend on them for survival.**

## 5. Killing Carbon – A World Without Us & How To Fight Back

Once the majority of the people truly depend on the elites for food, shelter, protection, etc. the elites will be able to decide who gets those things, when they get them, and why (much like Stalin or Mao in the 20<sup>th</sup> century).

**The goal is for them to then eliminate any individuals who do not submit to them, regardless of the command. They will be slave owners with loyal slaves, and any who would dare question them will be removed.**

“Decarbonize, which really means dehumanize the planet because we’re carbon beings ourselves who produce CO2 when we exhale. We are who they really want to eliminate.” –Kevin Freeman

**The Elites envision a world without us, a world where they are free and the people they allow to live do so in squalor, functioning only as a slave labor force.** They want those people to “own nothing and be happy” while eating insects instead of meat.

It is not too late, we can fight back. To do so, we must:

- » Never back down.
- » Never compromise values.
- » Remain on the offensive

**The world has been radically shifting toward the Marxist left because it has been gradually testing the compromise of the conservatives.** The Republican party has conceded far too much ground over the last few decades until they no longer had the strength to resist the major shifts. Now, the fight is harder, but American patriots are waking up and are beginning to fight back.

“What I want to see are Republicans that have a spine that will fight for the everyday man and woman and child in our country. What does it mean? It means fighting so that we don’t have runaway inflation by restricting how much the government is spending and wasting. It means stopping these multi-trillion dollar bills like were passed in the last Congress. It means making sure energy is affordable like it was under President Trump when we were spending less than \$2 a gallon on gas. It means groceries can be afforded by the average middle-class family and the working people seniors on a fixed income. We have to take care of our own. It means not sending billions and billions of dollars to Ukraine. That’s Europe’s war. Europe needs to pay for their war.”

–Amb. Carla Sands

American patriots cannot afford the luxury of relaxing or enjoying life until liberty has been properly secured for generations to come. It is comfort that weakened us for long enough to allow the elites to gain the control they currently have.

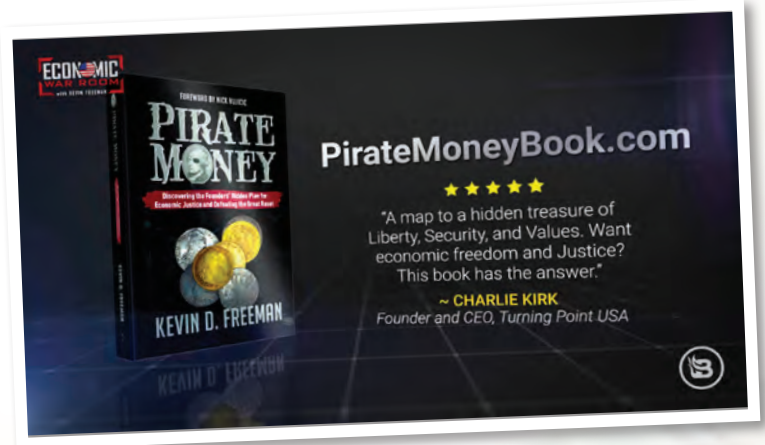

**There are many people who want to fight but do not know how.** Here at the Economic War Room, we have been working on actionable solutions to the problems we face.

**The first solution is discussed in Kevin Freeman's new book [Pirate Money](#)**

which functions as a treasure map leading readers to the secret treasure left by the

Founding Fathers in the Constitution. This is Gold and Silver currency which can be paired with modern technology to create a new method of payment that allows Americans to transact in gold and silver just like they would when using a debit card.

“Pirate money. Article One, Section Ten of the Constitution says that no state shall make anything but gold and silver coins tender within the state. What if you had gold and silver on deposit in a state and you had an alternative monetary system where you could use a debit card and you could spend your gold and silver, or you could exchange it freely?” –Kevin Freeman

**The second solution is called LSV which stands for Liberty Security and Values investing.** This is a direct challenger to ESG (Environment, Social, Governance) investing which is a tool the elites have implemented to use the money of the American people against them by investing in China and changing corporate policy from the top down to support Woke agendas.

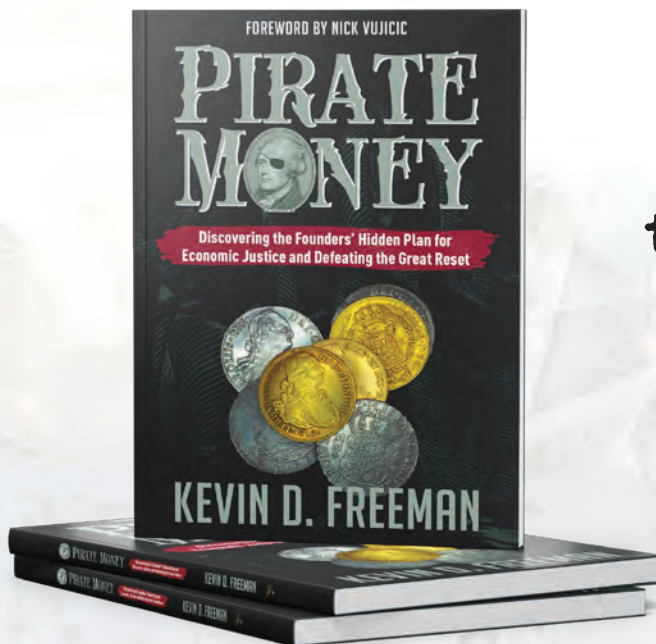

“ESG is a serious problem. So we offer LSV, liberty, security, and values. All this money that investors have put into BlackRock is their money. It’s not BlackRock’s money, but BlackRock has been voting their shares to further the ESG agenda to defund and de-bank our American energy industry and so forth. So if we get the American people to wake up, they can take their money out of bad investments and put it into liberty, security, and value.” –Kevin Freeman

LSV investing generates wealth by supporting innovation that spurs economic growth and ensures national security without compromising on the Judeo-Christian values upon which this nation was founded.

At the National Security Investment Consultant (NSIC) Institute, we train financial advisors in LSV investing and equip them with knowledge in a variety of topics so they are properly informed on the impacts geopolitics will have on their clients. **These advisors are better equipped to serve you and your family's needs and to ensure your investments align with your values.**

With these strategies and many of the tools being developed by conservative organizations, we will be able to turn the tide and win the culture war to preserve American liberty and defeat the Marxist elites.

**⚠ Attention: If we work together, stand our ground, never compromise, and keep pressing forward, we can secure American liberty and build an even better world for the next generations.**
