

Five Solutions to the 10 Big Challenges Headed for Us

In Greek mythology, Cassandra is the daughter of Priam, King of Troy. She was given an incredible prophetic gift with incredible accuracy as all her predictions came to pass. However, she was also cursed by Apollo so that those she warned would not believe her. This tragic story speaks to the pain one feels when warnings are ignored, and people end up suffering the consequences.

Today, Cassandra is a term regularly attributed to a person whose predictions, generally warnings, are not believed.

In this briefing we will discuss the following:

- » Secret Weapon – Kevin Freeman’s accurate predictions
- » Things Have Changed – Rising Inflation
- » Ten Risks in the Coming Years – Kevin’s Predictions
- » Five Solutions to Save America

YOUR MISSION: Learn about the 10 big risks we face as a nation and the five solutions we can implement to stand a fighting chance.

 **ATTENTION:** There are many dangers on the horizon, but with the right preparation we can surmount these obstacles and build a better and brighter future for America and the world.

Ep. 7-265 (OSINT) Open-Sourced Intelligence Report. This briefing is part of an exclusive teaching series by Kevin Freeman. It also addresses one of the strategic priorities we have been working on with Transactional Gold and Silver as Currency.

Kevin Freeman is considered the father of the LSV investing movement and one of the world's leading experts on the issues of Economic Warfare and Financial Terrorism. He has consulted for and briefed members of both the U.S. House and Senate, present and past CIA, DIA, FBI, SEC, Homeland Security, the Justice Department, as well as local and state law enforcement. His research has been presented in critical DoD studies on Economic Warfare, Iran, and Weapons of Mass Destruction presented to the Secretary of Defense and the Under Secretary of Defense, Intelligence. He has traveled extensively with research trips to Russia and China and throughout Europe and the Americas. He is also a Contributing Editor to Tactics and Preparedness magazine.

Kevin is a Co-Founder of the NSIC Institute; Deputy Speaker of the Cherokee Community of North Texas; a Senior Fellow at the Center for Security Policy; a Trustee at Oklahoma Wesleyan University; and a member of the Advisory Board of First Liberty Institute.

1. Secret Weapon – Kevin Freeman's Accurate Predictions

For those who identify with Cassandra, it can be quite painful to watch loved ones, or even a nation you love, ignore the warnings and fall into the pit. This has been the case quite regularly for Kevin Freeman as many of his geopolitical and economic predictions have come to pass... often sooner than he had expected.

Before the financial collapse in late 2008, Kevin predicted an economic attack on the nation's banks.

Kevin was hired by the Department of Defense and wrote a book about his journey titled *Secret Weapon: How Economic Terrorism Took Down the US Stock Market and Why It Could Happen Again*.

"Everything I feared would happen has happened almost like clockwork. At the time of my first warnings, our debt was about \$10 trillion. Now it's over \$33 trillion. And central banks have responded exactly as predicted. In *Secret Weapon*, I even had a section in here on page 174 called the BRICS Danger. I mean, in 2008 very few people had even

heard of what the BRICS nations were. I said they would target the US dollar. And guess what? That's exactly what they're doing. We also have this is a report I wrote in January 2016 for the state of Utah. You know, the sad thing is I met Representative Ken Ivory (who sponsored the report) recently, and we talked about that. And he said, 'Kevin, you scared our pants off, and yet (in hindsight) you understated the problem.' Well, a little bit. I did understate the problem. Things have gotten worse faster than we ever expected." –Kevin Freeman

In *Secret Weapon*, Kevin outlines a myriad of threats and predictions, many of which have already transpired... ahead of schedule.

⚠ Attention: Kevin Freeman has predicted many of the economic and geopolitical occurrences of the last few decades, DO NOT ignore what's next.

2. Things Have Changed – Rising Inflation

One of Kevin's predictions was about the return of inflation and crushing national debt.

Between the Great Recession and Covid, there were massive government stimulus programs and bond buying which drove interest rates to near zero.

Central banks created what was known as ZIRP or Zero Interest Rate Policy, which meant money in the bank did not accrue interest. In some nations, it became NIRP where people faced negative interest rates. This meant that lenders paid the bank interest just for holding their money.

"\$16 trillion was lent at negative interest rates. That's just crazy where you're lending your money and you're having to pay for the privilege of lending it. Then Covid hit and things really accelerated. We went from \$20 trillion in federal debt to \$30 trillion in debt in a blink of an eye. We told you that was going to happen in the early months of Covid. Sadly, we were right." –Kevin Freeman

With no alternative location to store their wealth, many people were forced to invest their money in stocks. This resulted in the TINA (there is no alternative) effect, where stock values would increase simply because investors saw no viable alternative locations for their money.

In [Episode 125](#) Kevin predicted a shift from TINA to Things Have Changed. This predicted the rise of inflation after COVID-19 relief.

“Look at our United States federal debt relative to our gross domestic product... we were about \$20 trillion. It rose to where we are now today, almost \$34 Trillion. The debt is growing rapidly. I mean, we were at \$31.8 trillion just in April of this year. We’ve gone up more than \$1.6 trillion since April. All of that, the inflation, all the increased interest rates, the higher amount of money we owe, that’s caused stocks to struggle recently.” –Kevin Freeman

The rising inflation has damaged our nation greatly as a gallon of gasoline for your car rose in cost from \$1.20 to almost \$6 in some places. Inflation like that is devouring the budget of the average American, leaving them struggling to get by from paycheck to paycheck.

Kevin warned that some of these things would happen and has been working to find solutions to these problems to save America.

Attention: Kevin predicted the rise of inflation when everyone else said it would not happen and later that it was “transitory.” Heed his next warnings.

3. Ten Risks in the Coming Years – Kevin’s Predictions

Recognizing the accuracy of Kevin’s predictions, it is essential to heed his next warnings. Here is a list of the 10 risks Kevin foresees us facing in the near future.

1. A slowing economy that will not eliminate inflation.
2. Stock market gains will not be automatic and will be less consistent.
3. Multiple fiscal cliffs.
4. The Housing dilemma.
5. Rush to replace workers with Artificial Intelligence.
6. Increased Labor Strikes.
7. Weakened America on the Global stage.
8. Increased risk of shooting wars.
9. Revolt from failed socialism.
10. Implementation of Central Bank Digital Currency.

Normally when the economy is slowed down, this would curb or even eliminate inflation. This has been the case for over 40 years. However, that will not happen this time because inflation has become systemic.

People are demanding higher wages as prices are going up, this new inflation is here to stay. This means stock market gains are no longer automatic. For over 40 years, the stock market had an upward trend with a few dips (each of which tended to be a good time to buy). Now, we face a period where the stock market has dipped, and bounced around, but remained lower than the peak before the dip.

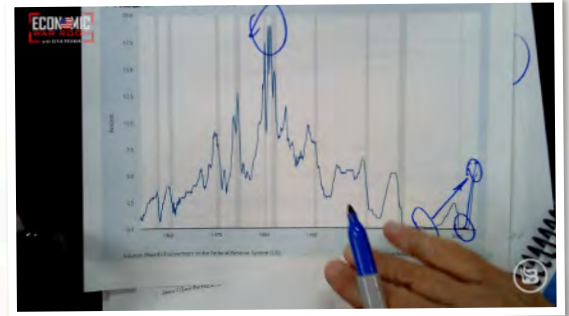

Gains are no longer guaranteed like they were since 1982 when the stock market saw an incredible spike with powerful gains each decade. This was unusual and we cannot expect that trend to continue now.

“We’re going to see multiple fiscal cliffs. We just saw one where the speaker of the House was ousted because of that fiscal cliff. Are we going to close the government and all that? We’re going to see those on an increasing basis going forward.” –Kevin Freeman

On top of that is the housing dilemma. Mortgage rates have increased rapidly at the same time as housing prices increasing. Some of this is driven by supply and demand.

People who refinanced their houses at low rates like 3% will not want to sell and buy a new house with higher interest rates. At the same time, demand is declining due to higher interest rates which has left prices high. With inflation, people cannot afford to buy, so many are not in the market. Yet supply is also locked up as those with low mortgages refuse to sell.

Corporations have begun purchasing housing “en masse,” and renting those properties out.

This fits with the WEF plan to make you “own nothing and be happy.”

“There’s a rush to replace workers with artificial intelligence. Why? Because the labor costs are going up and the cost of artificial intelligence is going down. So that’s the fifth thing to watch out for.” –Kevin Freeman

The threat of replacement by AI has already caused strikes in Hollywood, it will not be long before these labor strikes become a regular occurrence.

While these issues are primarily domestic, they also play into America’s international image. It is not only clear to us that American culture is on the decline. Our allies and our enemies are watching it all unfold.

The economic war with China has erupted into increased tensions over Taiwan. The Chinese are also challenging the legitimacy of the US Dollar as the world’s fiat reserve currency. BRICS nations have already begun the process of shifting away from the Dollar as they work to develop an alternative.

“When America is weak, you see a risk of a shooting war increase. We’ve already seen that with Ukraine. Plus Hamas and Israel. We see potential there with China and Taiwan. And we even see all these people crossing our own border, our southern border coming into America, most of the military age. Could we have a war on our own soil for the first time since the Civil War? I hope not. I pray not. But that’s a risk from a weakened America.” –Kevin Freeman

One reason America has been weakened is the socialist policies on the federal, state, and local levels. This era will be one where people and leaders will revolt against the failed state of socialist policy.

In Dallas, Mayor Eric Johnson has already switched to the Republican party because the socialist policies of the Democrats have been destroying his city and he wants to help the people whom he serves.

The final risk is the implementation of Central Bank Digital Currency. This programmable money would give globalist elites complete control over the wallets of the people. If you can control the money, you can control the people.

Attention: In the coming years we must remain alert, watching these ten risks and preparing for what may come of them.

4. Five Solutions to Save America

Thankfully, Kevin also sees five solutions that could save America and the world from the disasters these 10 risks could cause.

1. Take a new investment approach.
 - a. Find an advisor who understands these threats and can guide you and your family through these complicated times.
 - b. Ask your financial advisor about the National Security Investment Consultant (NSIC) institute. Request for her or him to get trained to advise you and your family better.
 - c. Look for new investment opportunities that promote Liberty, Security, and Values.
2. Pirate Money – Transactional Gold & Silver
 - a. An alternative and personal gold standard.
 - b. Article One Section Ten of the Constitution supports this.
 - c. Watch [Episode 254](#) for more information.

“How do we give our citizens the opportunity to hold their money in gold and silver without fear of capital gains taxation, making it legal tender so we can kind of personally divest a little from the paper money system that’s been set up and thrust upon us?” The advantages are huge. They can protect you against inflation. They can give you an alternative monetary system. It can be state-based. It can protect your privacy against central bank digital currency intrusions. So, if you haven’t seen it, get the book Pirate Money. It explains it all.” –Kevin Freeman

3. State-based solutions – Return to Federalism
 - a. Each State must develop its own protections for its own people.
 - b. State’s rights require State leadership to take authority and use their checks and balances against the federal government.
 - c. States can work together to protect each other.
4. Stay Informed and make your voice heard.
 - a. Watch new episodes of the Economic War Room.
 - b. Keep up to date with our Economic Battle Plans™
 - c. Share these topics with people you know.
 - d. Take the action steps at the end of each Economic Battle Plan™ to partner with us in saving America.
5. Cry out to God
 - a. Watch [Episode 216](#) The Economic War of the Heart.
 - b. Money belongs to God and is given to us to steward.
 - c. This nation and all the Earth belong to Him.
 - d. Jeremiah 18:8 “and if that nation, concerning which I have spoken, turns from its evil, I will relent of the disaster that I intended to do to it.”

“We need to cry out to God. We talk about this all the time... the economic war of the heart. If you make money your ultimate goal and you worry about your money instead of putting your treasure in heaven, I’m sorry. We’re going to lose this war. We’re going to lose the economy. We’re going to lose our society. We’re going to lose our liberty. But instead, you must view money as a weapon, something we can use (through our giving, spending, and investing) to protect our liberty, security, and values. Oh, now we

have a fighting chance. Now we have the opportunity to cry out to God and say, God, please help us. Money is not our goal. You're our goal. Liberty, security, and values." –Kevin Freeman
