

Human Rights & China's Social Credit System

Human rights are under attack. It is no surprise that this is the case in China as the CCP has been known for their violations of human rights since it was founded. However, these human rights violations are no longer just abroad, they have been slowly seeping their way into our great nation and are now threatening to destroy our way of life.

Our founders built this nation to be a land in which all people would be free, where their inalienable rights would be preserved. For centuries, our forefathers fought and died for these ideals and watered the seed of liberty. Now that seed has become a strong tree, and the enemies of liberty are desperate to chop it down. We The People must resist to preserve the gift of liberty that has been passed down by previous generations.

In this briefing we will discuss the following:

- » Human Rights – Women's Rights Without Frontiers
- » China's Surveillance State & the World Economic Forum
- » Digital ID & Central Bank Digital Currency
- » Solutions: The Sovereignty Coalition & Pirate Money

YOUR MISSION: Learn about human rights violations in China and the nefarious plot of globalist elites to attack our rights here in the U.S.

ATTENTION: Globalist elites want to seize total control over the people in every nation on Earth, their greatest challenge is the U.S.

Ep. 7-266 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and Reggie Littlejohn. Reggie is a friend of the Economic War Room® and an American Patriot.

Reggie Littlejohn is the founder and president of Women's Rights Without Frontiers. A graduate of Yale Law School, she's an acclaimed international expert on China's one-child policy. Now it's their three-child policy. Her organization has been called the leading voice in the battle to expose and oppose forced abortion and gendercide-sex-selective abortion of baby girls in China. She's also the co-founder of the Stop Vaccine Passports Task Force.

She is dedicated to sounding the alarm about the dangers of digital IDs, which can be used as tools of mass surveillance and control, similar to China's social credit system. Reggie has testified at the United States Congress, delivered briefings three times at the European Parliament, twice at the British, and has spoken at the Irish and Canadian parliaments, the Hague, the United Nations, the State Department, the White House, and the Vatican as well.

1. Human Rights – Women's Rights Without Frontiers

China has been a hotbed of human rights violations for decades as the CCP has enforced cruel policies and crushed any opposition to their doctrine.

The Uyghur concentration camps have detained over one million Uyghurs and political dissidents.

The persecution of political and cultural opposition is a telltale sign of tyranny. But what China did with its one-child policy up until 2016 (now three-child as of 2021) forced many Chinese women into abortion.

“According to one estimate, there are up to 200 million women and girls missing in the world because of Sex-Selective abortion. That number, 200 million, is greater than all the casualties of all the wars of the 20th century combined. So, for me, this is the true war against women.” –Reggie Littlejohn

There are many stories of women who were forced by family to abort their baby girls because the family wanted a son who could work. Now even if the policy allows for three children per couple, there is still a cultural bias toward sons instead of daughters.

Reggie and her team at Women's Rights Without Frontiers have been working in China to help women who are in these difficult situations.

“One story that is particularly meaningful to me was of this one woman who was being pressured to have an ultrasound, and she drags her feet on the way to the ultrasound and discovered not only did she have one, but she was carrying two baby girls. So even under the two-child policy, she would have used up her entire quota... so her mother-in-law started to pressure her to abort the baby girls. And she didn't want to... Fortunately, our field worker found out about this and went to her door and said, Congratulations on your twin daughters. Girls are as good as boys. And we're not only going to offer you one, but we will offer you two monthly stipends for a year to empower you to keep your daughters. And with the encouragement and the promise of resources she was able to convince her mother-in-law, convince her husband to allow her to give birth to these girls.” –Reggie Littlejohn

Thanks to Reggie and her team, many young women in China have been able to give birth to and raise beautiful little girls who otherwise may never have had the opportunity to live.

Sadly, not all stories end well as many unreached women are forced to abort their daughters, and sometimes the mothers die due to complications with the abortions.

These women are not afforded the right to live and are coerced into committing acts that haunt them for the rest of their lives.

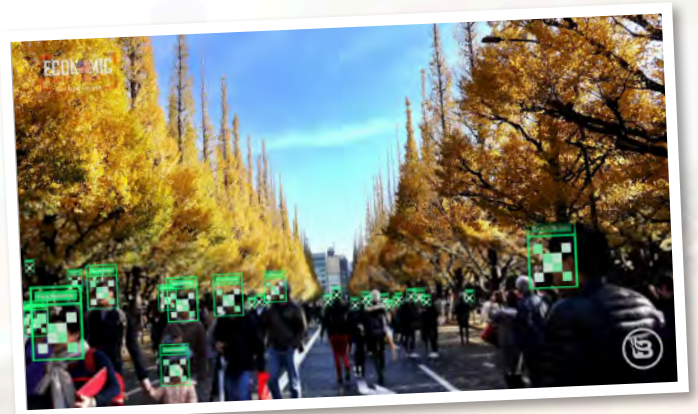

Attention: The policies of the CCP regularly infringe upon the rights of the people but there is hope to resist these atrocities.

2. China's Surveillance State & the World Economic Forum

The Chinese Communist Party maintains its ability to control its people and violate their human rights by managing a powerful surveillance state.

“In China, they surveil everything about you, so they have facial recognition, real-time geolocation... they know what you look like and where you live. And then they also surveil your social media posts, your Internet search history, your Internet spending history, your criminal history, your medical history... They combine it with your bank accounts and your credit cards so that if you have a high score because you are a reliable communist sheep, you can live a normal life. But if you stand up against the government, they will lower your score and you will not be able to buy or sell. You will not be able to travel. You can lose your job and then ultimately, they can just cut you off from your credit cards and your bank accounts.”— Reggie Littlejohn

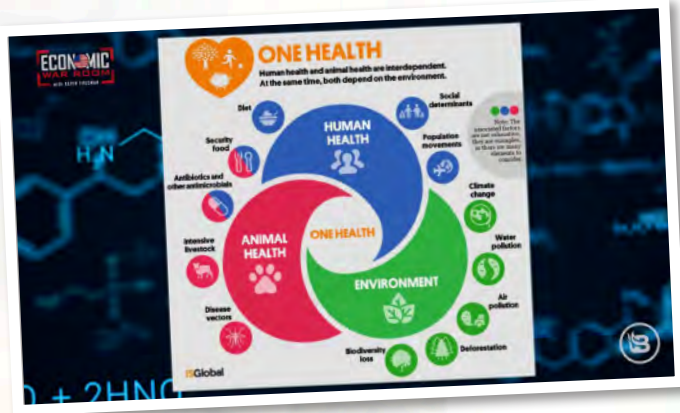

Many have heard the story of a man who jaywalked in a Chinese city and was immediately fined as the government took funds out of his account. There is no trial, there is no jury, there is simply a camera that knows your face.

The threat is so intense that people fear speaking their minds on social media or even in person. People who are deemed by the government to be lesser citizens due to their social credit scores are publicly shamed on social media apps and people are encouraged not to be friends with these offenders.

Those who have deeply offended the government will find their accounts frozen or drained of all funds. They are unable to purchase goods, and those who associate with them will lose social credit score points simply for interacting with a regular offender.

These policies are terrifying, and they are making their way across the Pacific through China's control over the World Health Organization (WHO).

“The World Health Organization is... considering amendments to the international health regulations and a new pandemic treaty. And those together will create a biotech, medical-surveillance police state. And one of the tools that they’re using is called One Health... One Health means all health is connected. It’s human health, animal health, and the environment. And what the W.H.O. wants to do if these amendments pass is

they want to be able to surveil and censor us on every aspect of human health, animal health, plant health, and the environment... so every aspect of life on earth.”

–Reggie Littlejohn

However, the World Health Organization is not the only strategy. Many people already know about Vaccine Passports which also were being pushed globally by governments of many nations.

Now, they are pushing Digital ID, which is simply a rebranding of the same concept. The WHO is calling this Digital ID “smart health cards” or “digital health IDs.”

Globalist elites want to use these Digital IDs to control the people. According to the World Economic Forum’s plans for the future, you will need a digital ID:

- » To access insurance and medical treatment,
- » To open a bank account and carry out financial transactions,
- » To travel,
- » To access humanitarian aid,
- » To shop online,
- » To use social media,
- » To vote,
- » To file your taxes,
- » To collect government benefits like Social Security or Medicare,
- » To use cell phones and computers.

“If you don’t have a digital ID, you’re going to be paralyzed... The World Health Organization is already together with the European Union, to get these digital IDs out all over the world. And the excuse is the pretext of health... it has nothing to do with health. It has everything to do with total control. This is the enforcement. The digital ID is the enforcement. Because if you step out of line, if you criticize the government, if you question the government narrative about Covid vaccines or whatever, if you’re not vaccinated and boosted as much as they want you to be, they can just turn off your digital ID and you will not be able to do anything.” –Reggie Littlejohn

The vision of the WEF and the globalist elites is to create a system by which they can take cancel culture to the next level and entirely remove unwanted individuals from society without the use of force.

⚠ Attention: Globalist elites are taking tips from the CCP to develop similar surveillance systems in the rest of the world.

3. Digital ID & Central Bank Digital Currency

The next step after Digital ID is Central Bank Digital Currency (CBDC). These two work in tandem as Digital ID makes it possible for the elites to track every detail of your life and CBDC makes it possible for them to control your financial standing as they please.

“They’re doing it with Russell Brand now without a digital ID. I don’t know if the guy is innocent or guilty. That’s not the point. The point is he’s never been proven guilty. And under our justice system, you’re innocent until you’re proven guilty. But they’ve cut him off. He’s not on YouTube. He’s cut off on his ability to get money, access his bank- All of those things are happening. And this would give them the mechanism to do it to every individual, not just the famous.” –Kevin Freeman

The combination of Digital ID with CBDC would give the elites an on-demand, scalable cancel culture.

Any citizen who speaks ill of their plans would be instantly punished and those who associate with them would also see their scores go down.

“If we have a central bank digital currency (CBDC), which is programmable money... they can just say, well, we’re just going to turn this off with a click of a button... Then if you step out of line on your digital ID, then you will be paralyzed by the central bank digital currency. And we have to stand up now before this trap snaps shut because it’s rolling down the tracks right now at us.”—Reggie Littlejohn

If Digital ID and CBDC succeed, they will quickly strip the people of their rights to a fair trial and will instead strip them of freedoms for their disobedience to their rulers.

These new systems will be pushed through positive-sounding initiatives to convince the people to allow the trap to be set around them before they realize what has happened.

Attention: We must fight back against Digital IDs and Central Bank Digital Currencies to preserve American liberty.

4. Solutions: The Sovereignty Coalition & Pirate Money

Working with Kevin Freeman and multiple others, Reggie and the Sovereignty Coalition have made massive strides in the battle against the WHO, UN, and WEF.

Their goal is to preserve the sovereignty of the United States of America and the liberty of her citizens.

“I would encourage everybody to go to www.SovereigntyCoalition.org and sign our declaration, which basically says that we are standing up against the WHO and the UN, with the whole idea of needing to defund or withdraw from the WHO. There are

some bills in Congress, but they were stuck in committee... we found out that a couple of those members were on a subcommittee of the Appropriations Committee. And that subcommittee came through with a recommendation that we defund the World Health Organization. We never thought something like that could happen, but we jumped on it and we got over 300,000 emails sent to members of the Appropriations Committee... and the Appropriations Committee voted to defund the WHO and... now in the new appropriations measures, there is no funding for the WHO ... That would have been a pipe dream before we started this on the Sovereignty Coalition. And now it's a reality. It still needs to go through the Senate. It still needs to be approved by President Biden... If God is with us, who can be against us? ... The Sovereignty coalition, I believe, has to do with national sovereignty, personal sovereignty, but also the sovereignty of almighty God. And that's what gives me hope." –Reggie Littlejohn

With the success of the Sovereignty Coalition so far, hope is rising that we may be able to slow or even prevent the push for Digital ID.

However, this does not prevent the arrival of Central Bank Digital Currency.

In a world where CBDCs are becoming common in many nations around the world, people need an alternative that gives them the freedom to transact as they please.

In the Economic War Room, we have been working with legislators and activists to develop a Constitutional alternative to the tyrannical threat of CBDC. We call it Pirate Money.

Pirate Money is an Article One, Section Ten, Constitutional currency that can be declared on a state-by-state basis. This gold and silver currency would provide a great alternative to CBDC.
