Failing Money – Five Undeniable Truths

Money is an incredible tool that has allowed for incredible improvements to civilization and the standard of living for citizens, however, money can also be used for evil.

Kevin outlines five undeniable truths that Americans face.

1. **National Debt Trajectory**

The national debt has already reached unsustainable levels, yet it continues to grow, at a pace of around \$1 trillion every 100 days.

“Our federal government is approaching \$35 trillion in debt... It’s growing like a monster... Federal Reserve Chairman Jerome Powell noted, during a 60-Minutes interview, that in the long-term the government is on an unsustainable fiscal path, which he explained means the debt is growing faster than the economy.” –Kevin Freeman

2. Currency Under Siege by Other Nations

There is a concerted effort by BRICS nations (Brazil, Russia, India, China, South Africa) and their allies to dethrone the dollar.

China has publicly stated its goal to de-Americanize the world. The BRICS nations have already begun to shift away from the petro-dollar arrangement that has maintained the power of the US Dollar on the global market.

“Elon Musk warned that if you weaponize your currency enough times, other countries will stop using it... In 2008, Vladimir Putin said, I want to end the dollar’s reserve currency. In 2013, China’s Xi Jinping came to power and said, I want to end the use of the American dollar around the world. In 2023 BRICS nations Brazil, Russia, India, China, and South Africa, including Saudi Arabia, came together and said they want to end the dollar as a reserve currency of the world.” – Kevin Freeman

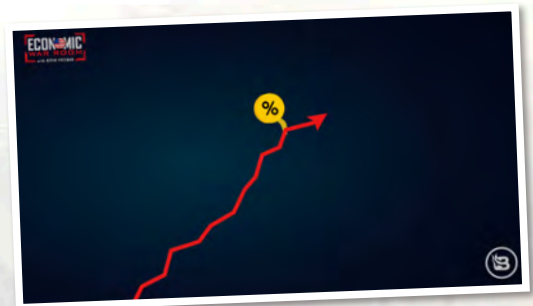

3. Inflation and Societal Destabilization

Inflation and the Cantillon effect create a wealth gap that hurts the poor and will eventually lead to the destabilization of our country.

Inflation: The decrease in purchasing power of a currency, generally reflected as a price increase for goods and services. (McKinsey & Co.)

“We’ve created this massive wealth gap. The rich have gotten richer, the middle income has gone down and the lower income has gone down. This is financial instability. That’s what comes when you have that kind of wealth gap...” –Kevin Freeman

The consequences of losing reserve currency status paired with hyperinflation, paint a devastating picture of the potential future for the American economy and society.

Cantillon Effect: The uneven expansion of the amount of money. If a central bank pumps more money into the economy, the resulting increase in prices does not happen evenly... in the case of a monetary expansion, the ones who profit from it are the ones who are close to the money. (Austrian Economics Center)

“If you’re close to Washington, D.C., or New York, where they’re producing all the money, then it’s easy to get money and it’s easy to protect yourself against inflation. But if you’re sitting as a farmer in Iowa, it’s not so easy. And if you have a collapse of the currency... you’re going to be among the last taken care of.” –Kevin Freeman

4. Governments Weaponizing Currency Through CBDC

Governments globally, including the U.S., are exploring central bank digital currencies (CBDC) as tools for societal control via monetary policy. This could result in the elimination of financial privacy and autonomy.

“Executive order 14067... Biden... decided that all our money should be a control mechanism so that they can implement DEI and ESG and fight climate change... The IMF... released a paper on September 7th of last year, and they talk about coordinating all of our money through central bank digital currency... If you’ve driven too many miles, you can’t buy gasoline. If you’re too heavy, you can’t buy a cheeseburger. This is a control mechanism.” –Kevin Freeman

5. The Evolution of Money

The rapid transformation of money, driven by technology and policy, towards a cashless and potentially controlled system compels a reevaluation of the nature and utility of currency.

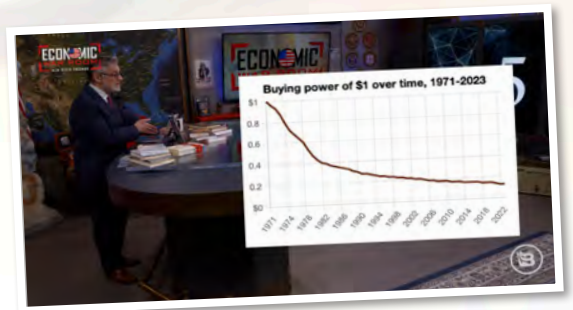

“You use PayPal and Venmo, those didn’t exist 30 years ago. Or tap to pay on your iPhone or Bitcoin or a cashless society where you are told, ‘We don’t take cash here,’ or the reverse ATMs where you put cash in and they give you a debit card out... All those things are happening right now, and the speed of change is accelerating. It’s very easy to slip in an all-digital currency. But I have a question. If money’s changing, shouldn’t the changes be optional and beneficial?” –Kevin Freeman

Attention: These five undeniable truths pose major threats to American liberty and the American way of life.

The Constitutional Alternative – Transactional Gold & Silver

The Founders knew that there needed to be a safety net in the case of a worthless Federal Currency. They ensured the states could protect themselves and their citizens. These protections provide the American people with an alternative that can mitigate the effects of the five undeniable truths.

First, we must answer the question: What is money?

“Money is a unit of account. It’s a medium of exchange. It’s a store of value. According to the Bible, it’s gold and silver. According to the Founders, in the Constitution, it’s gold and silver.” –Kevin Freeman

The Founders wanted gold and silver currency because they had seen the consequences of paper money first-hand.

“Paper money has had the effect in your state that it will ever have, ruin commerce, oppress the honest, and open the door to every species of fraud and injustice.” –George Washington

“Paper is poverty. It’s only the ghost of money and not money itself.” –Thomas Jefferson

To ensure this provision, the founders included **Article 1, Section 10** in the Constitution which allows for states to declare gold and silver legal tender.

This was reinforced by the court ruling for **Briscoe versus Bank of Kentucky in 1837**, which lays out that a state bank or depository can take money on deposit, real money, gold & silver, and produce a certificate like the Bank of Kentucky note.

Kevin’s new book *Pirate Money* explains a way to implement modern technology so that gold & silver, declared as legal tender, can become electronically transactional, like a gold debit card.
