

October Surprise: How BRICS Could End America's Economic Dominance

An October surprise is a news event, often political or economic, that influences the upcoming November election. In 2008, it was a September surprise with sovereign wealth funds in the Middle East attacking American banks, furthering the effects of the housing crisis and crippling the US economy. This cleared the path for Barack Obama to take the White House in the November election. Every election has last-minute surprises, typically sprung by one side or the other.

Events that transpire just before an election can turn the tide in favor of one candidate. As this November election draws closer, the threat of a tide-turning event increases. Will it happen this year?

We've already had a sitting president who earned his party's nomination withdraw from the race after a dismal debate performance, the opposing candidate shot in an assassination attempt which he miraculously survived, the elevation of the least popular Vice President in recorded history into a popular presidential candidate without a single vote, and now a Kennedy who had been polling well as an independent, drops out and endorses the Republican. Can you imagine what would qualify as a surprise? It would have to be BIG!

Lt. General Michael Flynn joins Kevin Freeman in the Economic War Room® and offers his perspective on what could happen this October (2024).

In this briefing we will discuss the following:

- » The Rise of BRICS and the October Surprise
- » The Dying Dollar
- » CBDC – A Growing Threat

YOUR MISSION: Learn about the threat of CBDC, the rise of BRICS, and a potential October surprise.

ATTENTION: Central Bank Digital Currencies are the weapon of choice for the globalist elites who are working to gain total control.

WHY YOU SHOULD CARE

- » BRICS nations are banding together and increasing their influence every day, this is weakening American influence on the world stage.
- » An October surprise event could impact the results of the election and have lasting effects on the American people.
- » The US Dollar is under attack and if it loses reserve currency status we can expect to see rapid inflation, crippling the American dream.
- » Your standard of living could be dramatically reduced by failed monetary policy.
- » The impending doom of Central Bank Digital Currencies could strip you of your freedoms.
- » An alternative system is in the works that can help prepare you and your family for the worst-case scenarios.

Ep. 8-308 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and Lt. Gen. Michael Flynn. Lt. Gen. Michael Flynn is a friend of the Economic War Room® and an American Patriot.

Lt. Gen. Michael Flynn graduated from the University of Rhode Island in 1981, and was commissioned a second lieutenant in Military Intelligence. His first assignment was as a paratrooper of the 82nd Airborne Division at Fort Bragg, North Carolina. Since then, he has served in a variety of command and staff positions to include, Commander, 313th Military Intelligence Battalion and G2, 82nd Airborne Division; G2, 18th Airborne Corps, CJ2, CJTF-180 Operation Enduring Freedom (OEF) in Afghanistan; Commander, 111th Military Intelligence Brigade at the Army's Intelligence Center at Fort Huachuca, Arizona; Director of Intelligence, Joint Special Operations Command with duty in OEF and Operation Iraqi Freedom (OIF); Director of Intelligence, United States Central Command with duty in OEF and OIF; Director of Intelligence, the Joint Staff; Director of Intelligence, International Security Assistance Force-Afghanistan and US Forces-Afghanistan and Special Assistant to the Deputy Chief of Staff, G2. He most recently served as the Assistant Director of National Intelligence for Partner Engagement before becoming the DIA director on July 24, 2012. He also served as National Security Advisor under President Donald Trump in 2017 until the deep state forced President Trump to remove him.

1. The Rise of BRICS and the October Surprise

Over the last few decades, Russia and China have become formidable opponents to US foreign interests. Partnering with Brazil, India, and South Africa, over the past decade they have formed a consortium capable of challenging the US's economic might.

The BRICS consortium's geopolitical gains are significantly altering global power dynamics, reducing America's influence in international affairs. This shift impacts everything from trade agreements to national security.

“The next summit for the BRICS nations is in October, Russia is the lead at the head of the table this go around. So it's an October surprise. Normally it's, the Democrats pulling the rug out from underneath the Republicans or the Republicans pulling out the rug out from underneath the Democrats. In this case, it's this globalist consortium that's going to have an October surprise that will not be controlled by the two-party system that we have in our country. So, it's going to be very interesting, how this plays out. And that is something I think that everybody needs to be prepared for.” –Lt. Gen. Micheal Flynn

America often faces a political surprise in September or October that affects the November outcome. This “October surprise” is generally internal as the two parties vie for power. However, this year may be different.

The BRICS consortium is working on plans to crush the US dollar and move the world onto a CBDC platform that they control. Imagine China having control of the financial decisions of individuals around the world.

Many nations would quickly lose sovereignty and bow to Chinese influence, stripping America of any economic influence in world affairs.

“There are a couple of other potential scenarios that we will see play out between now and the election in November. The likelihood or possibility of another disease such as an h5n6 or something like the bird flu.” –Lt. Gen. Michael Flynn

Whatever the BRICS nations are brewing, we can be sure it will not be for the benefit of the US or American citizens. It will, however, have a dramatic impact on our election and the future of US foreign relations.

⚠ Attention: The BRICS nations are plotting America’s demise and a new world order in which they are in control.

2. The Dying Dollar

The shift away from the U.S. dollar as the world’s reserve currency will cause significant economic instability in America and around the world.

This would result in inflation, higher interest rates, and a possible financial crisis that could impact your savings, investments, and overall economic security.

These changes which would increase the cost of living, from groceries to gas to mortgage rates. Life as we know it may come to a standstill, altering the American way of life for decades to come.

“What you’re describing is maybe the end of the American dollar as the October surprise, which takes us from being the most important nation in the world to just another country.” –Kevin Freeman

If the US Dollar does get replaced, its value will plummet as more and more nations move to other currencies, leaving the US to fend for itself.

The inflation we have already experienced since the Biden administration took office in 2021 will be nothing compared to what the death of the US Dollar would cause.

“I go to fill up my gas tank and I’m paying, three or four or five times as much for gas.” –Lt. Gen. Michael Flynn

The standard of living for many American families has already fallen as families are unable to afford the life they lived just four years ago. Another four years of this would be devastating. If that is multiplied, it would be an economic disaster paralleling that of the Great Depression.

Attention: The US Dollar is on its last legs, as foreign powers seek to dethrone its Reserve Currency status and crush US interests abroad.

3. CBDC – A Growing Threat

The death of the US Dollar is being planned. The globalist elites are clearing the path for CBDC which they will use to gain absolute control over every individual financial decision.

The implementation of CBDC will have significant implications for personal privacy. Unlike cash transactions, all digital transactions are traceable and will be monitored by the government, leading to an inevitable misuse and abuse of power.

“Biden has already signed off on an executive order two-and-a-half years ago. People can go look it up. Executive order 14067 is the number. And it has to do with central bank digital currency.” –Lt. Gen. Micheal Flynn

It is not a question of if, but of when. CBDC is happening, it may be too late to stop it. It is essential then that American patriots prepare for this attack on American liberty.

Without financial freedom, many other freedoms can easily be stripped away. When the elites can shut down any purchase or donation, it will be hard to resist their control.

Now, more than ever, the American people need an alternative monetary system that the elites cannot control or regulate.

Attention: Central Bank Digital Currency is just around the corner; it is time to prepare for this impending threat to liberty.
