

The Green New Deal, Socialism, and Social Media Free Speech

The Green New Deal has become a “cool” mantra to many voters and democrat politicians. While the politicians know what it means, it seems like many of today’s voters assume it is just another government program without considering the real consequences. Not surprisingly many of today’s millennials think socialism is just another fun idea despite historic failure.

“The word socialism has become a kind of blank canvas on which young leftists project their political desires. The reason to call it socialism, the lefty journalist Kate Aronoff has said, is because people are calling it socialism. At least in Brooklyn, and the spiritual Brooklyns of America, calling yourself a socialist sounds sexier than anything else out there, without necessarily advocating anything too risky.” — New York Magazine Intelligencer <http://nymag.com/intelligencer/2019/03/socialism-and-young-socialists.html> By Simon van Zuylen-Wood

Nancy Pelosi is now House Speaker, but others in the group are moving democrats toward a leftist socialist movement. Government continues to spend and spend (unless it is a wall along the Mexican border as part of our National Security). There is agenda to fundamentally change America

YOUR MISSION: Your Mission: To understand what is happening in D.C and recognize what it takes to get the attention of members of congress.

(OSINT) – Open Sourced Intelligence Briefing

Interview with Kevin Freeman and Texas Congressman Louie Gohmert. *Congressman Gohmert is the Vice Chair of the Judiciary Subcommittee on Crime, Terrorism and Homeland Security, as well as the Vice Chairman of the Natural Resources Committee. Prior to being elected to serve in Congress, he was elected to three terms as District Judge in Smith County, Texas and was appointed by then Texas Governor Rick Perry to complete a term as Chief Justice of the 12th Court of Appeals.*

A. The Green New Deal is taking cap and trade to a whole new dimension. It is ultimately political ideology more than an attempt to protect the climate.

The Green New Deal will devastate the poor! It is the working folks that get hurt, and it is only an inconvenience to the rich.

Democrat Congressman John Dingell famously said this cap and trade and the carbon tax on it is not only a tax. It goes on the people that can least afford it. He knew the power to jack up the price of electricity and gasoline and things that people have to have. It's the poor that get hurt.

Due to his beliefs Speaker of the House Nancy Pelosi fired him as committee chairman and appointed Henry Waxman.

Henry Waxman told Republicans "not only do we not want your input, we do not want your vote."

This is NOT your Grandfather's Democrat Party:

1. Previous Democrat congressmen would look to develop bipartisan legislation. Today it is about a radical agenda.
2. There is a difference between Liberals and Progressives. Dennis Prager noted that many Liberals can work with Conservatives because they are honest and love America. Progressives want their way only and want to fundamentally change America.

3. Democratic Socialism (Socialism and Communism) claims to believe that everyone is supposed to share and share alike. Ultimately, there ends up being two classes, the elite and the poor. There is no middle class. Ultimately, everyone gives up their liberty and their rights. It is like 1984 and it is here now.
4. Democrats under the Obama administration started the move toward socialism. It was also the first time in American history where 95 percent of the income went to the top 1 percent of income earners. It is like *Animal Farm* and *1984* and it is coming here now.
5. They talked about being for the middle class, but the middle class shrunk.
6. There were more poor people on government assistance than ever before, while the top 1% took a larger share of overall income. Obama admitted this in 2013. That never happened under a Republican.
7. Progressives have their own agenda. It will not stop with democratic socialism. It is a progressive dream with the elite ruling the masses. The New Green Deal is a tool to radically change America.

What is really happening with Climate change and Global Green movements:

- In the U.S. we are making progress with the environment. The air and water are cleaner. While not confirmed, it has been said the U.S. is the only country achieving the The Paris Climate Accord standards even though we pulled out of that bad deal while the countries that stayed in are failing to meet the standard.
- Liberals don't seem to understand that if you hurt the economy then you are going to hurt the environment. It's only a thriving economy in which people are able to care about the environment.
- When you don't have a job, when your kids are not getting enough to eat, you may be concerned about the environment, but it's not your priority. People are just trying to live, eat, and have shelter.
- Look at what the Third World and emerging nations do. They say we've got to worry about feeding their people and cannot afford to directly combat climate change. The result? They are exempted from the initiatives and the U.S. carries the weight. China uses that against the U.S. even though China has the world's second largest economy (and some say largest).

If they're really concerned about the environment, the best thing Congress can do is help President Trump get this economy going even stronger.

The Paris Climate Accord – Democrats and Leftists were complaining that we didn't sign on to the Paris Climate Accord.

- The countries that did agree to the Paris Climate accord pressured the United States to stay in it and blamed us for any failure.
- The U.S. is the only country that pays nearly every other country in the world for some kind of guilt that they think we should have (even though the U.S. has made the world a better place).
- Regardless of the checks we send from the U.S., we still have to breathe the toxic air coming from China and India floating this way. Things are not going to improve if those countries are always exempt from the climate restrictions they force on us.

"You don't have to pay people to hate you, they'll do it for free. So why should we be sending all this money to countries that hate us?" –Congressman Louie Gohmert

B. U.S. Debt, Spending, and The Wall

We have a 22-trillion dollar debt and it is growing rapidly even under Trump. At the same time we are taxing, and have a greater tax revenues than ever before. The only way to grow out of our current debt is to cut spending and increase revenue.

Medicare for all, free college, and open borders will bankrupt America and we are already headed down the path of unsustainable debt.

The one spending Congress does not like is building a wall to defend our nation, but everything else is fair game.

The Wall is one key spending initiative that is needed for both the U.S. and Mexico.

- The cost of a wall or barrier is minimal compared to the tax dollars needed to support of illegal immigration and potential loss of job opportunities for Americans.
- Tens of billions of dollars are going to drug cartels every year. Drugs are estimated to be \$80 billion a year, and that does not count sex and human trafficking that is connected to the drug trade.

PAGE 7

- A wall would cut the drug cartel's money supply from the U.S.
- Mexico should be one of the top 10 economies in the world, as they have more natural resource than most countries. They have hard working people and a great location. Geographically, Mexico is actually better positioned than North America, because it is between two continents and then two oceans.
- Corruption is the only thing holding Mexico back. The best thing we could do for the Mexican people and those in Central America is dry up the money from the drug cartels. Not an easy solution, but the wall would help in a big way.

Almost Everybody in Congress supported the wall at one time.

PAGE 8

“There was I believe \$8 Billion provided to Homeland Security for a virtual wall under the previous administration and Janet Napolitano. The caveat was that if Homeland Security found that a virtual wall did not work, she did not have to use the money for it. Now the Democrats say we do not need a wall or barrier, we just need high tech drones. Their own Secretary of Homeland Security said it is not going to work. We should have built a barrier or a wall. Where is that money and what happened to it?”

— Congressman Louie Gohmert

C. The Left is weaponizing banks, money and education against free markets

The threat to the Constitution is part of the economic war. Our enemies have decided that they’re going to use our system against us.

Some examples of the economic war tactics being waged against the Constitution and the U.S.

Banks :

- Under the Obama administration, The left used banking regulations so banks wouldn’t loan money to gun manufacturers.
- They used the FDIC to prevent gun manufacturers and gun sellers from even having a bank account.
- Federal agencies were buying up all the ammunition and the prices were skyrocketing.

PAGE 9

Birthright Tourism:

- Well they've been using all kinds of things including you know birthright tourism where people come in and have babies and then take their American citizen home getting benefits from our country.

Economic Terrorism:

- Osama bin Laden created significant economic damage. The 9/11 attack against America cost them approximately half a million dollars to execute, but cost us trillions.
- Other terrorist acts have been plotted to have that kind of widespread fear and terror.
- It cost us trillions economically, but even more in the loss of civil liberties.

"People have just gotten used to it like the frog in warm water getting hotter and hotter. People don't seem to object to having people grope them and feel them up one side down the other at airports. You know it's really outrageous what we've allowed this to become so invasive and it's normalized."

Our Education system has failed children as it teaches socialism and a leftist agenda focused on the evil of America:

- Civil Liberties are under attack and children today don't know any difference. You know President Reagan was famous saying that freedom doesn't pass through the bloodstream. If we don't do something to defend it, in our sunset years we'll be telling our children and our children's children what it once was like in America to be free.

Texas voter insights and who is voting for socialism:

- An analysis of Ted Cruz voter support. Conservatives expected that people moving in from California New York will be making our state more and more liberal. Results showed a lot of those people were fleeing socialism when moving from California, New York, and Illinois. Ted won a majority of those folks that moved into Texas.
- Where Cruz lost the biggest was in home grown Texans educated in our schools age 30 or below. That's where he really lost big. They have been mis-educated to think that socialism is a good idea.
- Young voters seemed to go for the candidate they perceived as friendly. Critical thinking skills were not as evident as it related to the policies that will affect them. This is a dangerous time for America.

- Last year about 40 percent of the money raised for the National Republican Congressional Committee came from Texas. The RNC didn't really help Texas, however.
- Even the RNC does not seem to realize if we lose Texas, we won't have another conservative President ever again.

We just go toward full-blown socialism even though we know that socialism always fails. The only way a free market system fails is when it becomes more socialist.

How Economic Patriots, like you can make a difference! :

People became frustrated when they gave the Republicans control of the House, the Senate, and the White House and yet got no change. Looking at the threats we face today, what does it take to make a difference in Congress?

Congressman Louie Gohmert shared that you can change people's positions on issues when their phones and e-mails are just lighting up. A thousand e-mails from the people in their district would make a huge difference.

Even if a your representative's initial position was opposite of the calls received, a large enough volume of calls would force reconsideration of a position.

"And every day I would have to go back and be sure that I was taking the right position. You've got that kind of outpouring. So I encourage people to let their member of Congress and their Senators know not only when they're concerned but also when they are doing the right thing. If the only thing you ever hear is negative, you may assume that those that you don't hear from aren't happy with what you're doing." —Congressman Louie Gohmert

**Good News: Economic Patriots like You
Can Make A Difference!**

Why You Should Care:

1. The New Green Deal is part of an economic war. It will hurt, not help most Americans.
2. There is a national emergency crisis at our border. Look at the cartels and now their influence within Mexico. A wall could help both America and Mexico.
3. Our constitution is being used against us as part of the economic war. It is time to help Congress understand the economic war being waged against us.
4. Those that think socialism is just something cool and not risky are being deceived. Educating America is critical and it is up to you to protect America's legacy of freedom.

Economic Patriot Action Plan

Despite the obstacles facing America, we are developing plans to compress ideas and impact America quickly.

Step 1: We need to hold our members of Congress accountable. Be an Economic Patriot, and stay in touch with your representatives. Be one of a thousand emails or calls that lets them know what they are doing whether right or wrong.

Step 2: Take time to read through some of our Economic Battle Plans™ and understand the economic attacks being waged against America.

Step 3: Recognize and share that The Green New Deal is not a vision for a cleaner environment. Without Economic Liberty and Prosperity, the earth will get dirtier. The real goal is to change America and this puts America at significant risk.

Step 4: Consider sharing highlights of the battle plans and links with pro American Democrats. There is a difference between what the democrat party represented previously versus today. It is a progressive dream of tyranny of the elite over the masses. The Green New Deal is a tool to radically change America.

Step 5: What is a short sprint you can do to help strengthen America? Choose from the list or set your own goals.

→ Get others to sign up and review our weekly Economic War Room [Economic Battle Plans™](#). Each of these will address critical solutions to the threats highlighted on this briefing.

Subscribe to our weekly Economic War Room show on TheBlaze at EconomicWarRoom.com.

→ Subscribe to our weekly [Economic War Room show on TheBlaze](#). We need to break the digital ghetto that is limiting free speech regarding truth and liberty.

→ Follow, like, comment and share on [Facebook](#) and [Twitter](#). [We recognize these tools may be compromised at times, but when they are not filtered, they can be major platforms available to reach out to the public.]

→ Share this Economic Battle Plan™ and our short video segments on Facebook or YouTube with friends. We set up the Economic War Room to be your resource for information, preparation, and mobilization.

→ Think about ways you can mobilize or weaponize your money towards things that strengthen American. This can be through charitable giving, spending, or investments.

→ **Do this now!** Have a financial action plan based on multiple geopolitical scenarios developing now. Advanced preparation is key. Trying to figure what to do when an economic event happens is usually too late.

Talk with your financial advisor as it relates to your savings/ investments. Ensure your advisor understands the potential impact economic/geo-political scenarios could have on your portfolio. LOOK FOR ECONOMIC WAR ROOM'S ADVISOR AND INVESTOR ONLINE TRAINING COURSE LAUNCHING THIS SPRING.

***Thank you for accepting this mission.
Together, we will make a difference!***

SHAREABLE THOUGHT:

(share this thought with your friends or at the office)

**1,000 emails or phone
calls can impact your
representative's vote.**
