

How Bureaucrats Secretly Control Your Money

America is known for her free-market economy where entrepreneurs start new businesses, and the success of a firm or product is determined by a combination of consumer interest and business acumen. In this way, the consumer has great influence over the market, deciding which products succeed and which fail.

In recent years, the free market has been under attack as federal regulatory agencies use their power to control which businesses are more or less likely to succeed. This complicated the process for entrepreneurs and business leaders, creating barriers to entry that empower certain companies and stifle competition.

In this briefing we will discuss the following:

- » The Weaponization of Financial Regulations - “Reputational Risk”
- » Threat to Small Businesses and Economic Diversity
- » CBDC – The Globalist ‘Death Star’
- » Fighting Back – Defending Liberty

YOUR MISSION: Learn about how bureaucrats are controlling your money, and what can be done to protect your family from their next level of control: CBDC.

 **ATTENTION:** Bureaucrats have abused their positions to coerce and control others, giving them more power and influence.

WHY YOU SHOULD CARE

- » The weaponization of financial regulations threatens you and your family’s ability to access certain products and services.
- » These regulations are sometimes based on a political agenda that does not align with the values or principles of a constitutional republic.

- » Regulatory abuse grants government agencies power where consumers are supposed to have the final say.
- » Small businesses make up a large portion of the US economy and regulatory abuses disproportionately impact their bottom line.
- » Grassroots political organizations are being targeted to prevent political opposition, a financial attack on freedom of speech.
- » Central Bank Digital Currency is on the horizon and will give elites total control over your spending, investing, and giving.
- » There are people working to protect you and your family from these threats, and solutions that need your support!

Ep. 8-316 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and Richard Morrison. Richard is a friend of the Economic War Room® and a patriot.

Richard Morrison is a senior fellow at the Competitive Enterprise Institute, where his work focuses on the relationship between economic and political freedom. He has been widely cited for his research on corporate governance and finance regulation, in particular environmental, social, and governance (ESG) theory. He is also the host of the Free the Economy podcast.

1. The Weaponization of Financial Regulations - “Reputational Risk”

The weaponization of financial regulation is the process through which unjust restrictions on businesses and consumer freedoms, along with targeted financial exclusions are used to control the market based on political biases, which can reach into everyday aspects of citizen’s lives such as banking services or political donations.

These regulations allow bureaucrats to coerce businesses into transforming their company policies and structures to ensure they do not end up on the regulator’s naughty list.

“The main goal of financial regulation in the United States is supposed to be the protection of consumers, investors, and their businesses from deception and fraud. Government agencies such as the Securities and Exchange Commission and the Federal Deposit Insurance Corporation should protect our interests and property rights from

bad actors and criminals. Yet, in far too many cases, the financial regulatory agencies that are supposed to be our useful servants have become arrogant masters.” –Richard Morrison

Regulators use the term ‘reputational risk’ to brand people or businesses they disapprove of as liabilities.

This deters businesses from legitimate activities and stifles their freedom to operate based on contrived pressures while reinforcing a conformist business culture lacking diversity of thought and action and hampering innovation.

This destabilizes trust in financial institutions and limits freedom of commerce and expression within a supposedly free-market economy.

“Regulators are creating this risk out of nothing... they control the levers of power. They’re regulating the banks. So the fact that they say there’s something negative with your clients, by definition, creates reputational risk out of nowhere. Because if the regulators are looking askance at your business, they have the power, even if no one else in the world cares, even if no one else thinks that what you’re doing is negative. The fact that the people holding all the law enforcement power are looking down their noses at you means they have created reputational risk where none existed before, and then they try to force you to follow their preferred policies because of that.” –Richard Morrison

These forms of regulatory control started with Operation Choke Point during the Obama administration.

This operation was secretive, working to force small businesses to conform to a political agenda or lose their ability to do business. One of the primary targets was firearms dealers.

Attention: Regulatory abuse allows politically charged bureaucrats to manipulate American businesses and silence political opposition, directly infringing on the rights of American citizens.

2. Threat to Small Businesses and Economic Diversity

Over-regulation leads to a homogenized economy dominated by larger corporations less susceptible to regulatory retaliation.

Small businesses often depend on financial services, especially banks, to remain operational. Large corporations, on the other hand, are powerful enough that they can often survive these regulations.

Using these regulatory abuses, the Obama administration was able to put pressure on small businesses that did not align with their political agenda, thus incentivizing specific behaviors that favor globalist ideals.

“The regulators in the Obama era (the Treasury Department, FDIC, and other bank regulators like the OCC) decided they simply didn’t like certain kinds of businesses and especially certain kinds of small businesses. So using their influence as regulators of bigger banks, they went to banks and said, ‘You have all these small business clients here and they’re sort of politically controversial. So maybe it would be better if you cancel their accounts and didn’t service them anymore’... This wasn’t a plan that was announced anywhere, and it certainly wasn’t something that was authorized by Congress.” –Richard Morrison

Overreach by financial regulatory bodies jeopardizes democratic principles of fairness, transparency, and accountability, skewing the free market. It fosters, instead, a centralized state with unchecked power, contrary to the foundational principles of our constitutional republic.

Attention: Selective pressures and account closures disproportionately affect small businesses, limiting economic diversity and innovation.

3. CBDC – The Globalist ‘Death Star’

The next big step for the globalists who authorized these regulatory abuses is to develop a Central Bank Digital Currency.

CBDC's will grant globalists centralized financial control, undermining privacy and autonomy over personal finances, including imposing restrictions on spending based on surveillance.

“The ultimate for them, their Death Star is central bank digital currency. If they get that enacted, they completely control everything.” –Kevin Freeman

This would drastically shift the power dynamics between citizens and the state, curbing individual freedom and economic independence.

It would be nearly impossible to oppose the will of the governing party as they could simply empty the accounts of political opponents and grassroots organizations.

Attention: Central Bank Digital Currency is right around the corner as globalist elites are rushing to build their ‘death star’ of financial control.

4. Fighting Back – Defending Liberty

Thankfully, there are people standing up for what is right and refusing to bend their knees to tyranny.

Jim Jordan, the Republican congressman from Ohio, sits as the chairman of the Select Committee on the Weaponization of the Federal Government.

His committee is investigating abuses of federal power so We the People can get the full story of what has been transpiring behind closed doors.

“Federal courts have an extremely important role to play in protecting the rights of American citizens in this area, where government agents are acting outside of their constitutional authority, outside of their legislative statutory authority, and are violating rights.” –Richard Morrison

There is, however, a great need for federal courts to uphold the Constitution and shut down abuses of federal power, including, but not limited to, over-regulation.

These government agencies must be held accountable to perform only the duties designated to them in the Constitution and legally delegated to them by Congress.

These actions would help protect American citizens from overstepping bureaucrats, but there must also be a plan to destroy the ‘death star’ of CBDC.

The solution: Pirate Money, transactional gold and silver currency enacted by State governments in accordance with Article 1 Section 10 of the Constitution.

Attention: In lieu of the abuse of federal power, the American people must fight back to prevent the rise of tyranny and the death of liberty.
