

Background Briefing: Education has officially become economic warfare. Recent surveys show a majority of today's youth favor socialism. Look at the messaging taught in schools, the media, and throughout social media. The ideology of America's youth becomes very concerning.

It is not just public education. Even American universities are being used to indoctrinate students. This is happening with both domestic agendas and foreign efforts. In an unclassified CIA report obtained by The Washington Free Beacon, the CIA states the following:

"The CIA cautions against efforts by the Chinese Communist Party to stipulate funding to universities/policy institutes in exchange for academic censorship."

The Chinese communist government has been bribing American universities to toe the official Chinese line. Similarly, Saudi Arabia and Turkey have been caught promoting their agendas in exchange for University donations. There are clearly domestic and foreign efforts to influence the education of our youth toward anti- American values. The last such periods of intense infiltration were from the Nazis in the 1930s and the Soviet Union during the Cold War.

Your Mission: Globally, education is a trillion-dollar industry. It's impact on society and our economy is even greater. Despite the money or because of the money, true academic teaching and critical-thinking skills are at risk. It is important to understand the agenda and be aware of the consequences for America and your family ahead. You need to take action now!

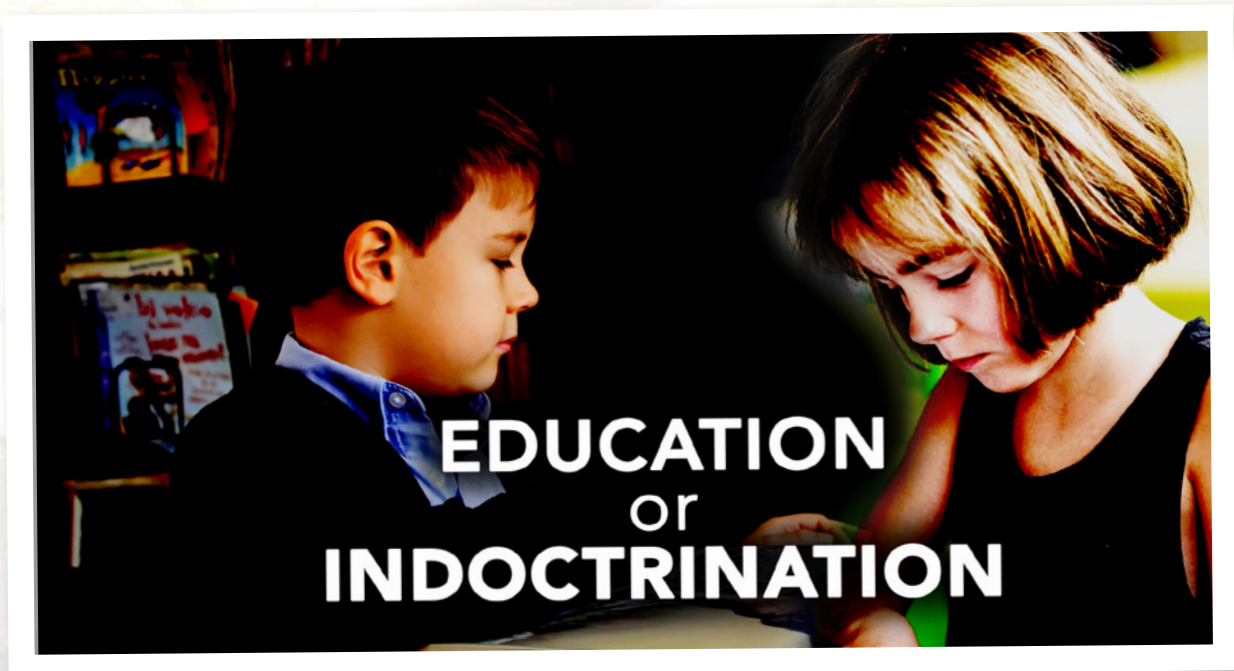

"Education is a weapon whose effects depend on who holds it in his hands and at whom it is aimed."

-Joseph Stalin

PAGE 1

(OSINT)- Open Sourced Intelligence Briefing

Kevin Freeman looks at the importance of education vs indoctrination in history and what is happening in America today. Also, Alice Linahan, joins us in the Economic War Room to talk about the latest education indoctrination within America. Alice is a Vice President of Women on the Wall and host of the Women On the Wall Radio Show. She is an author of the upcoming "A parents journey from #CANiSEE™© to I Can SEE" study on the Common Core. Alice Linahan is a winner of the 2014 UPTON SINCLAIR AWARD with EducationViews.org for her work as an Advocate for Securing the Best of Education Policies for the next generation of American children.

There are multiple efforts behind the indoctrination of our Education system. These key influencers include:

- A. Big Business**
- B. The Snowflake Movement**
- C. Marxists and Secularists**
- D. Increasing reach of the federal government**

To completely understand your mission, it is important to understand some additional history and background.

WARNING: Recent Survey reveals; Are we becoming a Nation of Dunces?

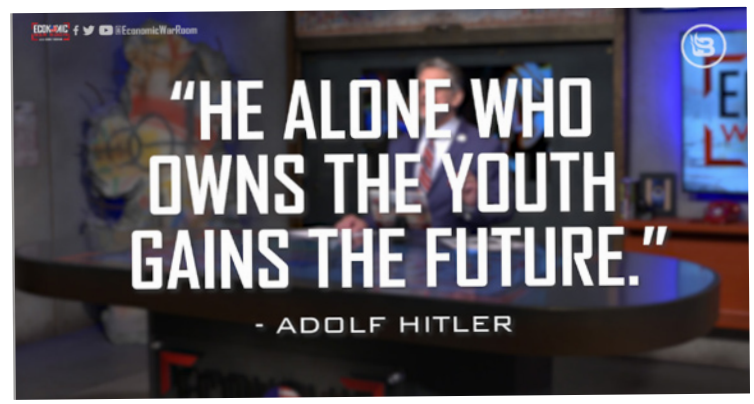

1. Today, 60% of college graduates cannot name a single step necessary to ratify a constitutional amendment.
2. Ten percent of the college graduates surveyed thought that Judge Judy is currently serving on the Supreme Court.
3. For the sake of our nation and our own personal freedom, it is essential that we get back to teaching the basics of American civics. We are failing the founders.

Source: Heritage Foundation Survey

Lessons in History Part I – The World Almost Went Down This Dangerous Path Before:

- **Turning Youth Against Their Parents:** In the late 1930s an eight-year-old girl Elizabeth Vetter attended a Hitler youth rally. Coming home she told her parents I don't belong you anymore. I belong to Herr Hitler. When her parents protested, they made little Elizabeth cry. They were arrested. Young Walter turned in his father to the Nazis. He had only made a comment in the privacy of his own home but was sent to a concentration camp. What could possibly cause otherwise innocent young people to turn against their parents? Adolf Hitler knew that to rise to power he must begin by taking over key youth groups and taking over education.

» **Hitler's Actions:** Nazism began with indoctrinating the youth.*
Source: The History Place

1. Stifle free speech
 2. Shame alternative view points
 3. Vocational training as opposed to critical thinking
 4. Remove all Youth Groups except Hitler Youth
- (By the way, what is happening to the Boy Scouts in America today?)

- **Propaganda is Fact:** “The supreme task of the schools is the education of the youth to the service of the people and the state and the National Socialist spirit.” Schools taught Nazi propaganda as fact. It was then recited back by the students as unshakable points with no room for disagreement or discussion. (Doesn’t this resemble the left’s approach to free speech on some campuses now? A snowflake movement where college students are afraid of being offended and only one viewpoint is allowed.)
- **Infiltrate Universities:** The book, *The Third Reich in the Ivory Tower*, highlights Nazi efforts that existed in the 30’s to infiltrate our universities. American educators helped Nazi Germany improve its image in the West as Germany intensified persecution of the Jews and strengthened its armed forces. Fortunately, there were students and professors that woke up and protested what Nazism was doing in our universities. Those who stood up for free speech on campuses (against Nazi infiltration) were a movement similar to the Tea Party now. Not politically correct but vindicated by history.

It is time to wake up again!

- » **At issue:** What is China doing at home as they invest in our universities? (Persecuting Christians and building their military?)
- » **At issue:** Anti-Zionism on campus. There is an anti-Israel movement among campus elites, and some American corporations. They are trying to tear down free speech, civility, respectful discourse and open research.
- » **At issue:** What are Turkey, Saudi Arabia, Common Core, Tech companies, and Crony Capitalism doing in our schools?

**“I don’t want a nation of
thinkers. I want a nation of
workers.”** —John D. Rockefeller

The Key Threats Driving Indoctrination in our School System:

A. Big Business against Education.* (This does not reflect all large business organizations, but a segment that may be selfishly influencing education today.)

- Big business wants to control the data of young people. Look at how social media companies are using data to track and profit from everything you do. Education is on the same path.
- They want to train workers. They do not necessarily want to educate a population. They are more than happy to put curriculum, computers, and technology in the hands of young people to collect data and profit.
- If they can get the data, they get to create the workers they want. On the surface this sounds like jobs. But think back to the Rockefeller quote above. Do you want your child or grandchild to be programmed like robots to do a task? Or do you prefer your loved ones build academic and critical thinking skills so they can decide on what God has called them to do? It should not be some educator, bureaucrat or corporation dictating what they are going to do.

B. The Snowflake Movement working against education:

- Institutions have created students who are afraid of being offended.
- Words alone are trigger warnings and political correctness is crippling our society.
- Learning institutions have become daycares instead of Universities that teach students to think.

C. Marxists and Secularists in schools have been highly effective:

- The politicization education is obvious.
- Schools no longer teach reading, writing, science, math, and history.
- The focus is on social justice.

University Study Summary Reinforces the takeover of Marxist and Secularist in Universities

A Special Report—*Politicization of University Schools of Education*

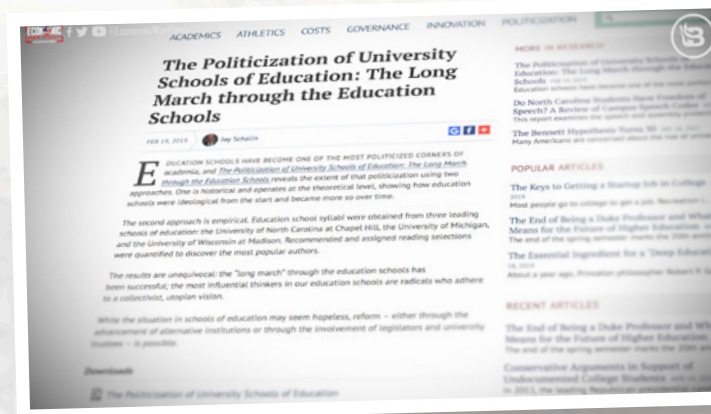

Their Findings: Schools have become one of the most politicized corners of academia

Example Case Study - University of North Carolina

The Faculty Ideology: Of the 52 faculty, most were registered democrat, 2 were republican, several unaffiliated, but most with leftist positions.

Highlights of Current Topics and Research interest from the report included:

- Why America is bad for the world
- The green movement
- Feminist Theory
- Social Inequality
- School Transformation
- Race and Culture
- Social Justice in Education
- Social Theory
- Diversity in Multi Culturalism
- Gender education
- Gender fluidity
- Science that dispels Judeo-Christian Values

ALERT: The above findings were consistent at Universities across America. Is this what our government, what we are funding through massive student loans?

“It is no longer higher education; it is higher indoctrination.”

—Dennis Prager

How is Education an economic war? The cost of indoctrination.

1. Your taxes are being used and waged against you. Education taxes make up the highest percentage of state budgets.
2. Student loans are the largest asset held by the federal government and comprise trillions of dollars.
3. The student indoctrination is fundamentally changing the next generation's understanding of economic freedom. It America's shared vision as a melting pot that keeps our country unified and strong.

One in five millennials expect to die without ever paying off their loans, and 42% regret ever taking loans.

“This is dangerous. If you wanted to control the economy, the citizens, or equalize America in the world, this is the agenda you would follow. When you understand, the investment they see is our children. They're bringing in a whole different financing system to fund our public schools and those investors are not necessarily American investors. These outside groups have access to the next generation of Americans. They have access to the data, and they have access to the software programs to control.”

—Alice Linahan

Our education system has shifted:

FROM: Teaching knowledge-based academics that include reading, writing, math, and history.

TO: Teaching attitudes, values, beliefs, and behaviors.

“It has been incremental, and it has happened over many years. I personally saw it. In math, in the state of Texas my 21-year-old with was taught math by a teacher. My youngest, a 14-year-old, was taught math by the same teacher. They were not taught the same. The old system worked. The new system did not work.”

—Alice Linahan

D. The threat of Federal Government in our education: Alice Linahan’s perspective on what she is seeing within education, Common Core and federal efforts to control education.

- Common Core while is sounds good, is basically a tactic. Is it warfare to dumb down our children, to get them to comply? Who would actually want to see our children not understand math? Two plus two equals four. Four plus four equals eight. Why not continue to teach using proven methods?

- There are direct ties to the United Nations, the Common Core national standards are aligned to the global standards that came out of the United Nations in UNESCO. It was a direct tactic to shift away from how we taught kids to read in the past. We

taught them to read phonetically so they could decode a word and decode a sentence. If you can decode a word, you can come up with the original meaning of the word.

- When you look at these learning theories and in teaching strategies whether they're John Dewey or Grant Wiggins. They're using the learning theories and teaching strategies to shift the education away from true academics and knowledge to behaviors.
- It's important to understand who is financially benefiting from the curriculum products on which your child's teacher is evaluated. These curriculum products are changing how teachers teach. Caution: There a lot of new initiatives coming into schools that are unproven. Do you really want your child to be the guinea pig?
- Large dollars are tied to peoples economic interest over academics. We are creating an education system with the primary purpose of gathering data and forcing conformity in the system.

E. Your US Government wants to help educate - The "Every Student Succeeds Act" Sounds Great! - What could go wrong?

- Formed in 2015, it is 1,060 pages long. Not one congressman read it because the final bill draft was released and passed 48 hours later.
- It is a clear shift away from the critical-thinking academics. It calls for "universal design" for learning. It's a shifting learning from reading, writing, math, and history to the behavioral.
- And when they say every student succeeds, they mean every student from pre-school through the workforce. It's a multi-trillion-dollar global industry. Education is big business.

- The mandates from the federal government are controlling the state and thereby controlling the local schools. It is no longer the local school board, but federal testing is in place to control curriculum.

Lessons in History – Part II – The History of Federal Education in America:

It started with a simple goal: Let's make sure children can read. In 1965 there was a bill passed the Elementary and Secondary Education Act. That was the first federal carrot to control how Title One money went from the federal government back to the state to teach children how to read. That bill was 35 pages long.

And it got worse: That bill was reauthorized in 2001 and called, No Child Left Behind. And when that was put in place, that's the first time that you had state-mandated tests. Remember who whoever controls the test, controls the curriculum and what's being taught.

It is important to note that in 2001, it was illegal to have a national database on children and our students.

The Work Around: What they did is set up 50 separate database systems to start collecting data on children because if we're going to test, we've got to make sure that no child is left behind. In 2009, with the stimulus package, all 50 states got federal dollars to upgrade that database system.

And worse: In 2012, President Obama changed the regulation on the first bill law under The Family Education Rights and Privacy Act.

With Obama's executive order, our children's personally identifiable information can be collected without consent in the name of education research.

"What you're telling me is that there are large dollars with people's economic interests at work. They are creating an education system whose primary purpose is to gather data so it can force conformity from that system with an outcome that sounds like communism." –Kevin Freeman

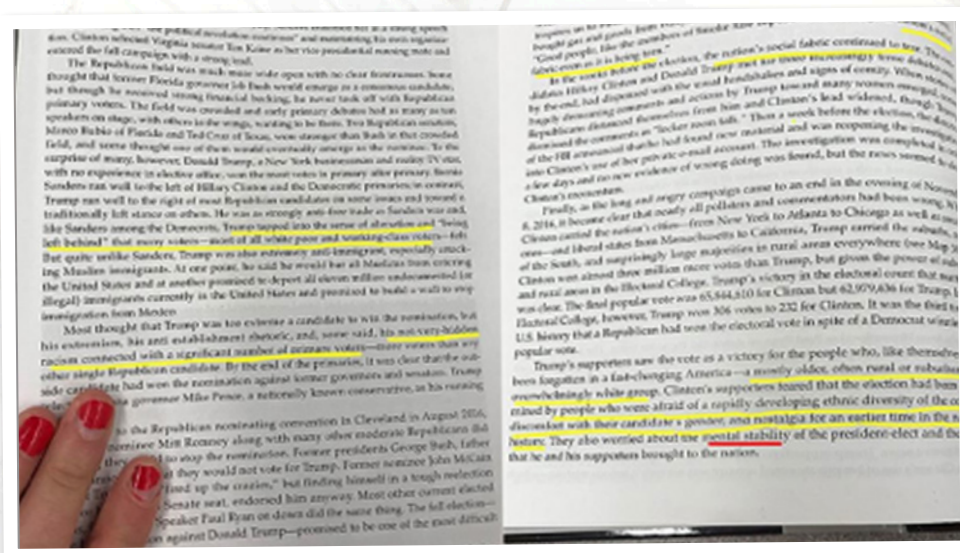

Economic Patriots like You Can Make A Difference!

PAGE 12

Why You Should Care:

1. America is at risk, as we moved from educating our citizens to indoctrinating them with anti-American values
2. Foreign Interests, Big Companies, Globalists Marxists and Secularists are impacting what your child or grandchild is learning. Remember Elizabeth Vetter, who after the German Youth Rally turned against her parents.
3. Your taxes are being used and waged against you. Education taxes make up the highest percentage of state budgets.
4. Student loans are the largest asset held by the federal government and comprise trillions of dollars.
5. Student indoctrination is fundamentally changing the next generation's understanding of economic freedom. It is America's shared vision as a melting pot that keeps our country unified and strong. Today the indoctrination of socialism, identity politics, multiculturalism, and other labels are working to tear America apart.

PAGE 13

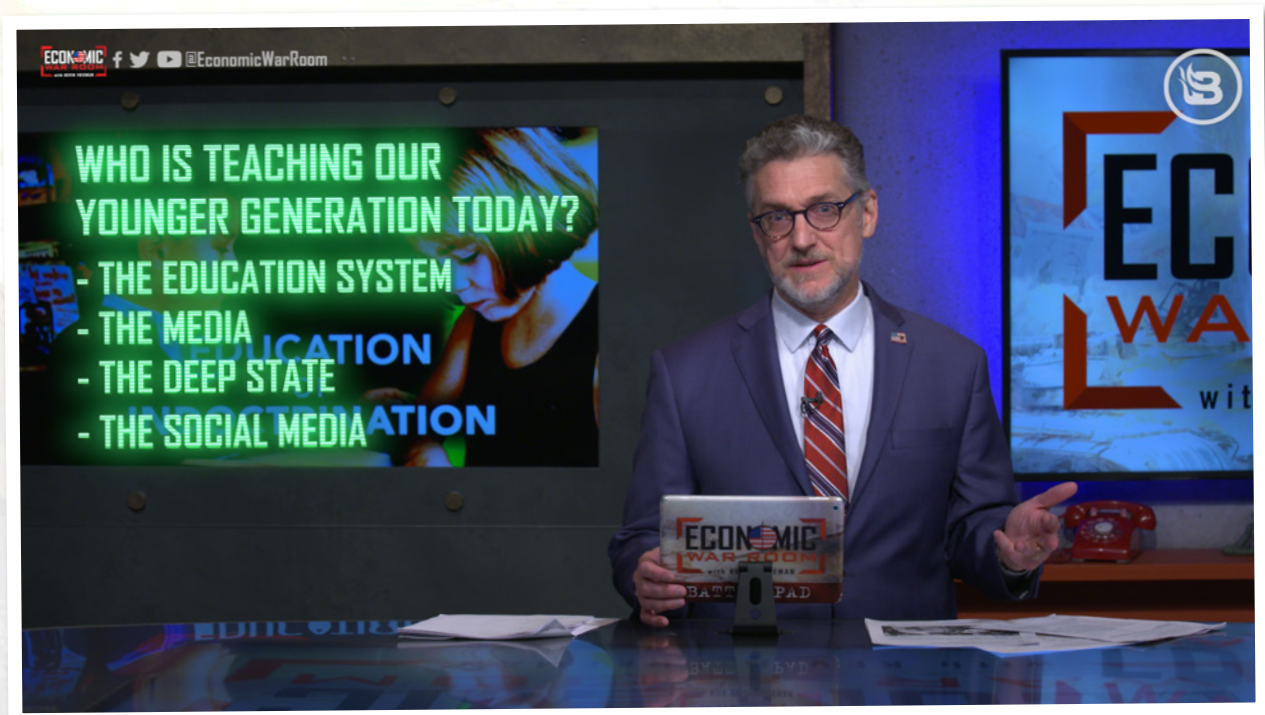

Todd Starnes, recently highlighted this textbook being taught in our high schools. <https://www.toddstarnes.com/campus/new-high-school-textbook-describes-trump-as-mentally-ill-supporters-as-racist/>

New High School Textbook Describes Trump as Mentally Ill, Supporters as Racist

The textbook, published by Pearson Education, is titled, "By the People: A History of the United States." It was first exposed by radio host Alex Clark in 2018.

The final section of the book, titled, "The Angry Election of 2016" is especially critical of the president.

"Most thought that Trump was too extreme a candidate to win the nomination, but his extremism, his anti-establishment rhetoric, and, some said, his not very hidden racism connected with a significant number of primary voters," the author wrote.

In the Economic War Room, we encourage Americans to be the “small ships that make the difference.” You cannot rely on the government or the president to solve your problems. You have to make a difference. It is up to you to help take our country back.

Economic Patriot Action Plan

Step 1: If you have a student in your home, carefully evaluate the best learning options for them. In many cases, public education has become indoctrination. Consider private education and homeschooling options. It is about learning to think intensively combined with a moral education.

Step 2: Consider whether there may be a way to influence your legislatures and even previous colleges or universities you attended. Alumni Associations probably still reach out to you. While the situation in schools of education may seem hopeless, reform, either through the advancement of alternative institutions or through the involvement of legislatures and university trustees, is possible.

Step 3: Look at elected school and trustee positions. The school board in your community is still critical. Colonel Allen West was in the Economic War Room and stated this elected position may be more important than the President, Congress, or Senate. Get involved in the school board and make a real difference in your community.

Step 4: While national testing is guiding curriculum, textbooks still matter. Look at ways you can be involved in curriculum committees of your state, as they still help set the standards. Most textbooks are set to the standards of Texas or California.

Step 5: Help others understand that the indoctrination of our school system is a National Security and Economic Threat. It is now hitting critical mass and a major threat to our Republic. It will impact America and your investments if we do not take a stand now.

Step 6: Consider what can you do now to help strengthen America or even help someone in need. Keep in touch with your congressional representatives. Choose from the list or set your own goals:

→ Get others to sign up and review our weekly Economic War Room [Economic Battle Plans™](#). Each of these will address critical solutions to the threats highlighted on this briefing. Subscribe to our weekly Economic War Room show on TheBlaze at [EconomicWarRoom.com](#).

→ Subscribe to our weekly [Economic War Room show on TheBlaze](#). We need to break the digital ghetto that is limiting free speech regarding truth and liberty.

→ Follow, like, comment and share on [Facebook](#) and [Twitter](#). [We recognize these tools may be compromised at times, but when they are not filtered, they can be major platforms available to reach out to the public.

→ Share this Economic Battle Plan™ and our short video segments on Facebook or YouTube with friends. We set up the Economic War Room to be your resource for information, preparation, and mobilization.

→ Think about ways you can mobilize or weaponize your money towards things that strengthen American. This can be through charitable giving, spending, or investments.

Do this now! Have a financial action plan based on multiple geopolitical scenarios developing now. Advanced preparation is key. Trying to figure what to do when an economic event happens is usually too late.

Talk with your financial advisor as it relates to your savings/ investments. Ensure your advisor understands the potential impact economic/geo-political scenarios could have on your portfolio. LOOK FOR ECONOMIC WAR ROOM'S ADVISOR AND INVESTOR ONLINE TRAINING COURSE LAUNCHING THIS SUMMER.

*Thank you for accepting this mission.
Together, we will make a difference!*
