

Background Briefing: To the American investor, institutions, and pension plans, many Chinese companies look like just any other investment. China is executing their economic war against the US perfectly! Soon, the portfolios of the members of Congress, the entire executive branch, the entire uniformed military, and the entire intelligence community may be invested in companies working against US interest.

With Wall Street's cooperation this could mean our congressmen, and all those people that work in our government have an economic incentive to go soft on China rather than look out for the interests of the United States of America.

This a national security threat and human-rights threat. With these new funds, we literally may be investing in companies under US sanctions.

Consider this, the international retirement portion of 5.7 million federal employees in the Thrift Savings Plan could be funding a company that is building an Intercontinental Ballistic Missile (ICBM) targeted against you, your family, your city, and our military installations.

Roger Robinson, the economic warfare expert that helped bring down the Soviet Union, joins Kevin Freeman to share how China is executing their plan against the US.

Your Mission: China has determined how they can use US investment capital against you. It is time to put an end to China's automatic access to our capital via global index funds. We must act now to stop the Thrift Savings Plan from committing your money to Chinese companies via the MSCI All Country World Index fund.

"Roger, you are, in my estimation, the Leonardo da Vinci of economic warfare. Some of my friends in Washington tell me that if it weren't for the work that you and your team did during the Reagan administration, the Berlin Wall might still be standing." –Kevin Freeman

Ep. 2.69 (OSINT) Open Sourced Intelligence Briefing with highlights, quotes, and summaries of conversations in the *Economic War Room* with Kevin Freeman and Roger Robinson. Roger worked with the National Security Council during the Reagan administration and was an architect of the Cold War strategy that we followed to defeat communism and the Soviet Union. Recognizing Economic Warfare vulnerabilities today, Roger is developing a screening mechanism for foreign investments offered in the US.

- 1. A New Alarm** – Chinese Communist are using US investments, possibly even your money, against you. Currently there is \$3 trillion of financing that we're providing to the Communist Party and the totalitarian Chinese government.
 - China is executing their economic war perfectly. The portfolios of the members of Congress, the entire executive branch, the entire uniformed military, the entire intelligence community may soon be invested in these companies.
 - Money is flowing from American patriotic investors and going into the Chinese communist nation.
 - Roger has identified through extensive research some of the known proliferators that are national security abusers.

Overall, we have an array of national security abusers, many of which are also sanctions violators.

2. Americans are investing money in Chinese and Russian companies sanctioned by our Government. Could this be part of your 401K?

- A closer look at the MSCI All Country World Index funds (which our federal employees are invested in):
 - They have seven companies from Russia alone, all of which are sanctioned by the United States at this time.
 - Seven out of eleven are under U.S. sanctions in the case of China.
- You've got companies like Hikvision that are on the blacklist of the Commerce Department.
- China Mobile is barred from any procurement by U.S. government officials because of national security concerns.
- ZTE, like Huawei, is practically a household name as a serial bad actor and proliferator to Iran, North Korea and elsewhere with our technology and our equipment.

The above are just the beginning. They're also in just this one MSCI index.

"The reason that I'm focusing on this index, because this is the recipient of the retirement funds' international exposure for 5.7 million federal employees in the Thrift Savings Plan of the United States.

And that decision has been made by the board of the Thrift Savings Plan back in November of 2017. It is supposed to be implemented in 2020. And if that happens, if that's permitted to go forward and be implemented, all of the companies that I've mentioned and many of the bad actor categories that I've mentioned, will all be in the portfolios of the members of Congress, the entire executive branch, the entire uniformed military, the entire intelligence community.

If you have any exposure in the international fund of the Thrift Savings Plan, you have no choice. All of the international fund, \$50 billion, will be included in

those in those investments that I've named. Many of the other bad actors can't be named because of lack of time. But that's where we are today. That's how insidious this problem is.

Can you imagine that our soldiers and our congressmen and all those people that work in our government will have an economic incentive to go soft on China, to help China, to support China, rather than look out for the interests of the United States of America?" –Roger Robinson

3. We are investing in human rights abusers and have no idea.

"Hikvision and other such companies have their surveillance cameras every few meters, atop the walls of concentration camps holding well over one million Uyghurs or Muslim majorities in Shenzhen, China." –Roger Robinson

- Retirement dollars, wittingly or unwittingly, are funding companies that are trampling the very human rights that they claim to be championing.

"Not one penny should go to forced abortions, should go to persecuting religious minorities, Christians or Muslim. Not one penny should go to organ transplant harvesting. Not one penny should go to oppressing people and violating human rights. That's so offensive." –Kevin Freeman

4. With the Thrift Savings Plan of the United States, uniformed soldiers will be forced to invest in advanced Chinese weapon systems that could be trained against them.

- 41 of the Intercontinental Ballistic Missiles (ICBMs) featured very prominently in the 70th anniversary Communist Party parade in Beijing were produced by a Chinese firm in the MSCI All Country World ex-U.S. index.

“The former secretary of the Navy wrote an editorial in The Wall Street Journal bemoaning this very fact. He was almost in disbelief that his uniformed sailors and soldiers are going to be unwittingly investing, with no disclosure I might add, in the advanced weapons systems trained against them to take them down.” –Roger Robinson

Lessons in History – A look at the economic war used to defeat the Soviet Union. (Consider the example below and then question the motives China might have in their economic war.)

Roger Robinson shares how during the Reagan administration Economic Warfare was used to take down the Soviet Union.

Energy used as a hard power in economic war.

- » The Soviet Union was focusing on natural gas as their savior for the 21st century and beyond. Roger specifically went after the Siberian gas pipeline project, which would have made Western Europe some 70-75% dependent on Soviet gas.
- » We had the proprietary technology the Soviet Union needed to build the pipeline through the permafrost. The US ended all contracts.
- » Europeans licensed the technology and continued to make sales for the Siberian pipeline. (there was personal economic interest that caused them to put themselves above their national interest.)

- » Reagan was surprised that Europe was not keeping its commitments and created the expansion of sanctions to include US licensees and subsidiaries abroad so they could not use our technology and equipment to supply the Siberian gas pipeline.
- » They tried to sell our equipment despite the sanctions, and we closed the entire marketplace to the offending companies. Companies could either do business with the US or the Soviet Union, but not both.
- » Europe understood after 4 out of 6 of those offending companies in violation of our sanctions went out of business, putting 155,000 Europeans into unemployment.
- » We came to an accommodation of limiting Soviet gas deliveries to Western Europe to 30% of total supplies.
 - We ended subsidies, taxpayer subsidized credits from Western governments.
 - We helped dry up commercial bank lending to the Soviet so that we closed off those exit doors that they had in terms of Western financing.
 - We tightened technology controls.
 - The US went to the Saudis and secretly arranged for the pumping of 2 million barrels more oil a day dropping prices down to \$10 a barrel.

The results:

“With every dollar drop in the price of a barrel of oil, it was costing the Soviets five hundred million to one billion dollars each click, so to speak. So, this was how we put them in an untenable position financially. And they stumbled along for a period of, say, six, seven years, muddled through until they defaulted on \$96 billion in Western debt, something we had predicted. And it was over. Days later, the Soviet Union collapsed, in December of nineteen ninety-one. There were many factors that led to the collapse of the Soviet Union. But I think none more potent than the economic and particularly the financial piece.” –Roger Robinson

Why you should care?

- Ordinary Americans may unwittingly themselves have money invested in Chinese companies that Wall Street has sold them without regard to our nation's security, American values, or even the proper disclosures necessary to prevent accounting frauds.
- There is an economic war being waged against the US, and many need to be "woke" to the real threats.
- Qall Street and Washington policies appear to be helping to fund the economic war against the US – there is a need to be made aware of the true risk of these investments. It is time to put country over short term financial gains.
- This should not be a distant distraction. Where you put your money represents your values. Your fund managers should know who these Chinese and Russian companies are. We must close loopholes, so we no longer fund enemies and adversaries.

In the Economic War Room, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve your problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty.

Action Steps:

Share this battle plan with your friends and your financial advisors.

- 1. Contact your representatives and send this battle plan to them to ensure the changes in the Thrift Savings Plan are corrected.**
- 2. Look for a software tool Roger W. Robinson is developing called Intel Track.** It is a tool that tracks and visually maps every external Chinese transaction and Russian transactions worldwide on a daily basis. It is time for a screening mechanism sensitive to national security issues. Your advisor should use this on your behalf.
- 3. Check with your financial advisor as it relates to foreign index investments and make sure you are in the investments that align with credible companies.** This includes proper auditing and accounting standards as well as alignment with your values. Just because it is a Morgan Stanley Capital International fund index does not mean due diligence has been complete on the companies in the index.
- 4. IT SEEMS OBVIOUS- Do not invest in index funds/companies that are making the missiles pointed against you and your loved ones.** Be aware that economic war against the US can also have a devastating impact.
- 5. Understand the what is really happening with US investments in China and Russia.** Get up to speed with our previous episodes and battle plans on this topic. Review Economic War Room’s **Episode 43** ([Battle Plan 2-43](#)) on “China Investment Threats”, and **Episode 65** on “Funding our Adversaries” ([Battle Plan 2-65](#)).
- 6. Send this battle plan to friends and ask them to sign up for our weekly battle plan updates (<https://www.economicwarroom.com>). Be sure to catch the data and footnotes below for more documentation. We want you to have access to key information to make intelligent decisions.**
- 7. Weaponize your money toward impact investing that strengthens America.**

ECONOMIC BATTLE PLAN™

INVESTING IN OUR ADVERSARY - ROBBIE ROBINSON **2.69**
(ECONOMIC BATTLE PLAN™ POINTS: 100)

We need more Economic Patriots on the team! Consider what you can do now to help strengthen America or even help someone in need. Keep in touch with your congressional representatives. Choose from the list or set your own goals:

- Get others to sign up on our website (<https://www.economicwarroom.com>) and review our free weekly Economic Battle Plans™. Each of these will address critical solutions to the threats highlighted in this briefing.
- Subscribe to [BlazeTV](#) and please use our code **(ECON)** from that link for a **discount and FREE trial.**
- Follow, like, comment, and share on [FB](#) and [Twitter](#). Look for short video segments on [FB](#) and make sure those are shared. (We recognize these tools may be compromised at times, but if they are not filtered, they are the major platforms available to reach out to the public. (Alternatives social platforms above are under EWR consideration)
- Check out [XOTV.me](#), a new free speech video platform Economic War Room is proud to partner with. It is free, but consider making a donation to help with Economic War Room's research and production.
- Share this battle plan and our short video segments on [FB](#) or [YouTube](#) with friends. We set up the Economic War Room to be your resource for information, preparation, and mobilization.
- Do this now! Have a financial action plan based on multiple geopolitical scenarios developed now. Advanced preparation is key. Trying to figure what to do when an economic event happens is usually too late.
- Talk with your financial advisor as it relates to your savings/investments. Ensure your advisor understand the potential impact economic/geo-political scenarios could have on your portfolio. [LOOK FOR ECONOMIC WAR ROOM'S ADVISOR AND INVESTOR ONLINE TRAINING COURSES LAUNCHING SOON.](#)

Shareable Quote:

“US investors through index funds are literally investing in Chinese companies currently sanctioned by our government.”

–Roger W. Robinson, Jr.
