

Reaching Young Americans with Politically Basic Truth

It is no secret that our nation is plagued with financial issues, but where do they come from? For our government, it is the excessive national debt, which is growing at an unholy rate, destroying our economy and threatening our national security. For the American people, financial literacy is in decline as the educational institutions have focused their resources on controlling a generation and radicalizing them with a Marxist agenda, instead of preparing them for real life.

These things have been brought to light by America's watchmen on the walls, individual media groups and podcasts who have refused to bow to mainstream media and have brought truth to light, giving the American people a chance to fight for their liberty. There have already been many shifts in our culture, and the victory of liberty will require that we continue to make the necessary changes, but as we the people band together, our future becomes brighter than ever before.

In this briefing we will discuss the following:

- » National Debt, Economic Policies, Government Efficiency, and Accountability
- » America's Youth: Financial Literacy, Entrepreneurship, and Political Engagement
- » The Role of Media and Podcasts in Political Discourse

YOUR MISSION: Understand the challenges and opportunities in addressing economic issues, empowering youth, and utilizing media to foster informed political dialogue.

WHY YOU SHOULD CARE

- » Unsustainable national debt directly affects taxpayers, limits economic opportunities, and threatens fiscal stability.
- » Youth engagement is crucial for shaping the future; financial literacy and entrepreneurial opportunities empower them to drive economic and social progress.
- » Podcasts and alternative media provide accessible, relatable, and impactful platforms for education and civic engagement.

Ep. 9-329 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and Kyle Campbell. Kyle is a friend of the Economic War Room® and an American Patriot.

Kyle is the host of the Politically Basic podcast where she covers the basics of political issues which affect our lives every day. Just the facts - with the experts!

1. National Debt, Economic Policies, Government Efficiency, and Accountability

The U.S. national debt, currently over \$36 trillion and growing at an alarming rate, poses a critical threat to fiscal stability.

“We’re adding \$1 trillion of debt every hundred days. That’s insane. We’re going to add \$100 trillion in debt over the next 30 years. We will be paying in interest two-thirds of all our tax revenues in very short order.” –Kevin Freeman

Speakers at America Fest stressed the importance of addressing this challenge through increased government efficiency and fiscal accountability.

Initiatives like the Department of Government Efficiency (DOGE), led by Elon Musk aim to streamline federal operations and reduce waste.

Reducing waste and cutting spending are essential for preventing the economic strain that will otherwise burden future generations.

Bold reforms, such as auditing federal agencies and holding them to standards akin to private enterprises, could lead to significant cost reductions and increased transparency.

⚠ Attention: Fiscal responsibility is not an option but a necessity to ensure economic stability and growth.

2. America's Youth: Financial Literacy, Entrepreneurship, Political Engagement

America Fest highlighted the pivotal role of young generations in shaping the nation's future.

As the largest voting cohort, Gen Z must be equipped with the knowledge and skills to navigate complex economic landscapes and engage in meaningful political discourse.

"We have this assumption that our kids are being taught financial literacy in schools. They're not." –Kyle Campbell

The lack of financial literacy in schools has left many ill-prepared to manage debt, understand taxation, or evaluate economic policies.

Entrepreneurial spirit and technological innovation are critical drivers of economic resilience, yet the necessary skills are not often taught in American classrooms.

Empowering youth with financial knowledge and fostering a supportive regulatory environment can unleash their potential to lead the next wave of innovation as their choices determine the future of our nation.

 **Attention: Empowered and informed youth are the foundation for a prosperous and innovative future.**

3. The Role of Media and Podcasts in Political Discourse

Podcasts like Kyle Campbell's [Politically Basic](#) have become influential platforms for breaking down complex political and economic concepts.

By presenting relatable and digestible content, alternative media helps bridge the gap between traditional political discourse and public understanding.

The mainstream media has become a propaganda machine, telling people what to think, feel, or do instead of giving them the information they need to make their own decisions.

The rise of podcasts and other individual media outlets has given the people a way out from under the propaganda system.

“The goal is to just give people the truth, give them the facts, and then let them put it together on their own.” –Kyle Campbell

This approach not only engages younger audiences but also fosters independent thought and civic participation.

The reach and accessibility of podcasts make them a powerful tool for driving informed discussions, countering misinformation, and empowering individuals to engage in political processes with confidence and clarity.

⚠ Attention: Alternative media platforms are reshaping political engagement by making complex issues accessible and actionable.

You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The little ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.]
