

Deep State vs. DOGE: The Battle Lines are Drawn

In an era where economic policies and national governance face unprecedented challenges, there is also an existential power struggle happening between institutional bureaucracy (the “Deep State”) and a push for government efficiency (DOGE). Understanding the dynamics between bureaucratic resistance and innovative policymaking is crucial. This battle is fueled by an unsustainable fiscal path, efforts to roll back regulations, and the critical need to restructure government spending. Understanding these dynamics is crucial to preparing for the future and securing economic stability.

In this briefing we will discuss the following:

- » Why it is “According to Plan”
- » DOGE vs. the Deep State
- » The Solution: Gold and Silver-Based Financial System

YOUR MISSION: Understand the ongoing economic and political battles within the U.S. and consider the implications of returning to a gold and silver standard for personal and national financial stability.

WHY YOU SHOULD CARE

- » The growing national debt and unsustainable fiscal policies directly impact current economic stability and will dramatically affect future generations, reducing economic mobility and increasing financial burdens.
- » Deregulation and energy independence directly influence job opportunities, inflation, and the cost of living.

A gold and silver-based system offers a return to sound money principles providing protection against inflation and economic collapse while also securing personal wealth.

Ep. 9-332 (OSINT) Open-Sourced Intelligence Report. This briefing is an exclusive teaching by Kevin Freeman and includes a review of this year in the Economic War Room®.

1. The Deep State's Plan: A Financial Crisis Engineered for Control

The national debt has surged from \$32.1 trillion in 2023 to nearly \$36.5 trillion today, with projections exceeding \$100 trillion in *additional* deficits over the next 30 years, threatening financial stability.

This fiscal crisis appears to be orchestrated to consolidate power and control by intentionally driving the economy toward collapse.

“The government creates a problem. Then the government solves the problem. And the solution creates a wealth transfer, a consolidation of power, and new problems requiring more government. That’s ‘According to Plan.’” –Kevin Freeman

The historical pattern is clear: financial crises lead to increased government control. By inflating the debt and causing economic turmoil, the Deep State ensures dependency on government intervention.

Attention: The current fiscal path is a deliberate setup for economic chaos and aggregation of power by the government elites, necessitating urgent policy shifts.

2. DOGE vs. the Deep State: A Battle for Government Power and Efficiency

Often referred to as the fourth estate, the “Deep State” is a cadre of unelected bureaucrats with little accountability to the legitimate branches of government and no accountability to the people; it must be reined in for the government to function as specified in the US Constitution.

To counteract bureaucracy and inefficiency, President Trump introduced the Department of Government Efficiency (DOGE).

The DOGE symbolizes an attempt to streamline government operations and counteract the “Deep State” - entrenched bureaucratic resistance to change. Additionally, DOGE will focus on weeding out financial waste and fraud with the goal of cutting government spending dramatically.

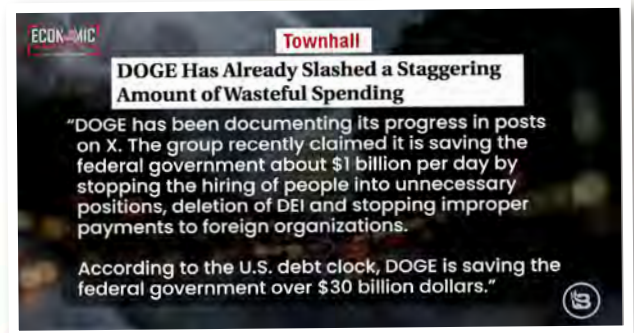

The sole purpose of the bureaucracy is to implement the President’s agency and carry out the laws passed by Congress.

President Trump’s first days have been characterized by a flurry activity to implement many of his priorities as quickly as possible. The “Deep State” must not be allowed to wreak havoc by resisting this agenda.

Trump’s policy agenda includes actions like reducing regulations, promoting energy independence, and cutting government DEI initiatives to foster economic growth.

“The goal is to grow the economy faster than the government, and 5% annual growth is possible. With his [Trump’s] cuts in regulations and the technology advances, coupled with lower taxes and smaller government, our average household wealth will skyrocket. Government debt will become more affordable in a few years, especially with the lower interest rates that will come with less government demand to borrow money. That means *you’ll* have money to borrow.” –Kevin Freeman

The battle between the Deep State and DOGE represents more than just political maneuvering; it is a fundamental struggle over economic freedom and constitutional governance.

America's financial system is at a tipping point, and informed citizens must take action to secure their wealth and protect future generations.

⚠ Attention: The battle between DOGE and the deep state will define future economic policy, directly influencing your personal economic freedom and prosperity.

3. The Solution: Gold and Silver-Based Currency (“Pirate Money”)

A potential solution to economic instability is transitioning back to gold and silver-backed currency, as outlined in the book *Pirate Money*.

Texas and other states are exploring implementing gold and silver as transactional currencies to provide a stable alternative to fiat money.

By securing wealth in tangible assets rather than inflation-prone fiat currency, individuals can safeguard their financial future against government-induced economic instability.

“Other nations are buying gold. Other nations are storing it up. It is something that people can own, and it is now going to be useful money again.” –Kevin Freeman

This approach could safeguard against inflation, secure personal wealth, and align monetary policy with constitutional intent.

⚠ Attention: Gold and silver offer a stable financial foundation, insulating citizens from inflation and centralized control.

You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty.
