

Your Money is NOT Your Property? The Sneaky Fed Plan to Take Your Money

The government has redefined money to justify taking it without due process. The government's stance on money as not being property raises concerns about financial security. The push for centralized control, particularly through digital currencies, is a plan to erode economic freedom. This new strategy is designed to control you through money even without CBDC. The hope? Alternative financial systems such as gold and silver-backed transactions present a viable solution for protecting wealth.

In this briefing we will discuss the following:

- » Government Control Over Money and Personal Wealth
- » The Shift Toward Centralized Control and Loss of Ownership
- » Alternative Financial Systems: Gold, Silver, and Protecting Wealth

YOUR MISSION: Understand how very recent government policies and global trends threaten your financial sovereignty. Discover actionable steps to safeguard your wealth.

WHY YOU SHOULD CARE

- » The government's claim that your money isn't property, paired with the banking system's structure, puts your savings and earnings at risk of seizure or loss without warning.
- » A future where you own nothing and are tracked by digital currencies directly impacts your freedom to live, spend, and save as you choose.
- » Learning about gold and silver and how they can protect your wealth from inflation and overreach, securing your financial future.

1. Government Control Over Money and Personal Wealth

The Justice Department recently argued in a court case that money is not property. This unbelievable position opens a Pandora's Box of frightening possibilities.

It happened in a case against a Maryland landscaper, fined \$55,000 by the Department of Labor, where the DOJ asserted that (because money is created by the government, taxable, and spendable by Congress) it doesn't belong to you.

The DOJ's stance, buried in a footnote, suggests they could seize funds without due process, as seen in the landscaper's seven-year ordeal.

“Money is not necessarily property for constitutional purposes... The DOJ gave three rationales for the argument, all packed into a doorstopper of a footnote. One, the government creates money, so you can't own it. Two, the government can tax your money, so you don't own it. And three, the Constitution allows the government to spend money for the general welfare.” –Kevin Freeman

Instead of facing a trial, being convicted, and expected to pay a fine, the government simply removed \$55,000 from the landscaper's account, essentially functioning as Judge, Jury, and Executioner.

On top of this, when you deposit money in a bank, it becomes the bank's asset—an IOU that you hope they'll honor, backed only by FDIC insurance up to \$250,000.

The banking system worked when Silicon Valley Bank collapsed because depositors could rely on federal backstops. Bu the system depends on your deposits not being yours. Rather, you have an IOU from the bank with FDIC insurance against loss on the first \$250,000. And fortunately, this has proven effective.

This dual reality undermines the notion of money as personal property and exposes a system where your money's safety hinges on institutional goodwill, not individual ownership rights.

 **Attention: If the government can claim control over your money, your financial security will be vulnerable to their decisions.**

2. The Shift Toward Centralized Control and Loss of Ownership

The World Economic Forum (WEF) envisions a future where individuals “own nothing and are happy,” one of renting but never owning.

Their vision is driven by unaffordable housing, car bans, and asset seizures like “the great taking” of stocks and bonds.

Adding to this, Central Bank Digital Currencies (CBDCs) loom as a tool for absolute control, with the Bank for International Settlements admitting they'd track and restrict financial transactions.

“A key difference with the CBDC is that the central bank will have absolute control on the rules and regulations that will determine the use... and we will have the technology to enforce that.”

—Agustín Carstens, BIS General Manager

This shift isn't hypothetical; it's underway. The WEF's vision aligns with policies that are already emerging, while CBDC's potential to monitor every transaction threatens privacy and autonomy.

Though Trump's Executive Order has paused CBDC in the U.S., the idea persists globally, hinting at a future where personal control over wealth fades and is replaced by dependency on centralized systems.

 **Attention: Centralized control through digital currencies and ownership loss could strip you of financial independence by 2030.**

3. Alternative Financial Systems: Gold, Silver, and Protecting Wealth

Amid concerns about government control over money, many advocate for a return to gold and silver-backed financial systems. Historically, gold and silver have retained value, unlike fiat currency, which is prone to inflation.

Under Article One, Section Ten of the Constitution, states can make gold and silver legal tender.

If they then store it in secure facilities, like the Texas Bullion Depository, and make it transactional, the American people would be able to use gold and silver as currency again.

“Constitutional currency is gold and silver... Your state could let you choose to hold your money in the form of gold or silver or paper, and you could spend it as you'd like.” – Kevin Freeman

Using modern technology, citizens could then convert dollars to gold or silver, store it securely, and spend it via debit-like systems, giving all Americans access to a hedge against inflation and government overreach.

The DOJ's claim that money is created and owned by the government cannot be made for gold and silver, as both are immutable elements, created by God.

 **Attention: Constitutional Currency (gold and silver) provides a state-backed way to protect your wealth from inflation and seizure, restoring financial sovereignty.**
