

## Restoring the American Dream with Economic Justice

The American Dream, once a reliable path to upward mobility, has become harder to reach for working families. As the wealth gap widens and government programs proliferate, many Americans feel trapped in a cycle of inflation, regulation, and consumption. Yet some immigrant communities, such as Nigerian Americans and Vietnamese refugees, have achieved remarkable success despite starting with very little. What do they know or do, that others miss?

This Economic Battle Plan™ explores how five free market principles, grouped into three core strategies, can restore financial stability, rebuild the middle class, and shift our economy from one driven by consumption to one built on production and self-reliance. With the right tools and mindset, Americans can break free from systemic dependence and reclaim the promise of prosperity.

### In this briefing we will discuss the following:

- » Restoring Financial Stability and Economic Justice
- » Rebuilding the Middle Class Through Investment Access and Deregulation
- » Ending Dependency by Shifting from Consumption to Production

**YOUR MISSION:** Learn how free market principles can empower you to protect your wealth, seize investment opportunities, and contribute to a thriving, production-driven economy.

### WHY YOU SHOULD CARE

- » Restoring financial stability through sound money and targeted tax policies directly affects your ability to build wealth in our inflationary system that has been punishing savers and wage earners.

- » Gaining access to high-growth investments and reducing regulatory burdens levels the playing field, helping everyday Americans participate in wealth creation and business growth.
- » Understanding how to shift from consumption to production empowers you to reduce dependency, invest wisely, and strengthen both your household and your community.

## 1. Restoring Financial Stability and Economic Justice

At the heart of economic justice lies the integrity of money. Since the U.S. left the gold standard in 1971, the dollar has lost over 90% of its purchasing power.

This has fueled inflation, widened the wealth gap, and contributed to financial instability for working Americans.

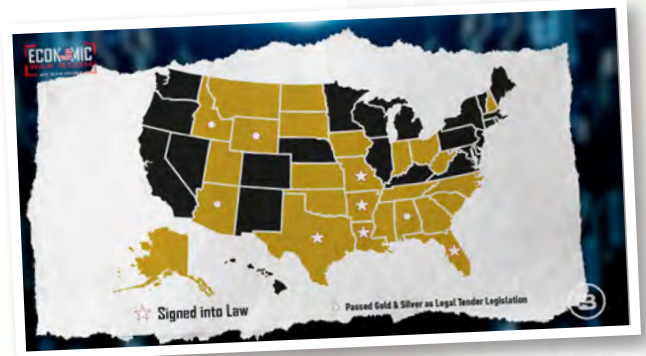

A free market solution to this crisis is Pirate Money: transactional gold and silver that functions as a unit of account, means of exchange, and store of value.

**“What if money could be a great unit of account, an excellent means of exchange, and a good store of value? That’s what we call Pirate Money.” –Kevin Freeman**

By legalizing Pirate Money in states like Arkansas, Florida, Louisiana, Texas, and Missouri, individuals can opt out of an inflationary monetary system and preserve their wealth in a more stable form, gold and silver.

This model challenges the current financialization of the economy, where elites profit from inflation while ordinary Americans are left behind.

Complementing this shift is the One Big Beautiful Bill (OBBB), a sweeping legislative package that delivers tax relief (e.g., \$10,900 for families, no tax on tips).

It also introduces Trump Savings Accounts, pre-funded with \$1,000 for every child born between 2025 and 2028.

These measures promote savings, investment, and financial independence from birth.

**⚠ Attention: Pirate money and tax relief policies like the OBBB provide tools to combat inflation and promote economic justice for all Americans.**

## 2. Rebuilding the Middle Class Through Investment Access and Deregulation

The American middle class is being squeezed out of wealth-building opportunities.

In earlier generations, everyday Americans could invest in high-growth companies like Apple or Microsoft.

**NOTE: Today, private equity—ownership in promising private companies before they go public—is largely restricted to the wealthy due to accredited investor laws.**

The National Security Investment Consultant Institute (NSIC) is working to change this. By allowing everyday investors to access these opportunities, under the guidance of professional financial advisors, the NSIC hopes to democratize capital and help more Americans build wealth.

**“What if average investors were allowed to own shares in private equity? Imagine taking \$1,000 and putting it in the next Apple before it went public.” –Kevin Freeman**

At the same time, overregulation continues to stifle entrepreneurship and reduce wages.

A study from Reason Magazine estimates that federal regulations have reduced average incomes by 75%. In contrast, policies during the first Trump administration, such as removing ten regulations for every new one, helped unleash business innovation and growth.

The OBBB supports these efforts by creating or protecting up to 7.2 million jobs, providing tax deductions for American-made products, and supporting small businesses.

**Attention: Expanding access to private equity and reducing regulations can rebuild the middle class by fostering entrepreneurship and investment opportunities.**

### 3. Ending Dependency by Shifting from Consumption to Production

Modern economic culture has conditioned Americans to be passive consumers, rather than active producers or investors.

The result is a population burdened by debt, filled with unnecessary goods, and increasingly dependent on government welfare programs.

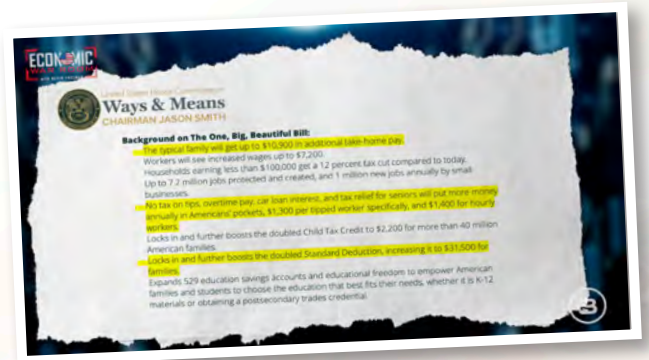

This consumption-first model not only undermines financial stability but also suppresses economic innovation.

“Our whole system is designed to make Americans consumers. We’ve become buyers, and everything in our economy seems to be based on that. We’re people. We’re not mindless shoppers of goods and services... We ought to be producers, not just consumers.” –Kevin Freeman

Shifting toward production means embracing savings, investment, and domestic industry.

The OBBS supports this transition with policies such as tariffs that encourage local manufacturing and tax incentives for purchasing American-made goods.

It also promotes generosity over dependency, advocating for voluntary charity, such as flood relief donations, rather than relying solely on government programs that often exacerbate poverty through inflationary spending.

This mindset shift also requires education reform.

Instead of standardized testing and age-based grade progression, students should be encouraged to advance based on mastery, pursue entrepreneurial skills, and be free from bureaucratic control.

Only then can we unleash the next generation of innovators.

**⚠ Attention: Moving from a consumption-driven to a production-focused economy empowers individuals to save, invest, and reduce dependency on government programs.**
