

Understanding Globalism

In an era where communism, radical Islamism, and unchecked globalism converge to erode national sovereignty, the stakes for individual freedom, economic security, and Judeo-Christian values have never been higher. This Economic Battle Plan™ exposes the century-long push for a one-world system and how it undermines the foundational principles of life, liberty, and the pursuit of happiness. By examining the ideological roots, mechanisms of control, and resistance pathways, readers gain the tools to recognize and counter these assaults on the American way of life.

In this briefing, we will discuss the following:

- » Globalism's Ideological and Historical Roots
- » Tools of Control: Communist Alliances, Immigration, and Climate Policy
- » Preserving Liberty: How to Fight Back

YOUR MISSION: Arm yourself with actionable intelligence to dismantle globalist encroachments in your community, finances, and family—reclaiming the sovereign promise of America for future generations.

WHY YOU SHOULD CARE

- » Globalism's push for centralized control directly threatens U.S. sovereignty and constitutional safeguards, shifting power to international elites and undermining the freedoms of life, liberty, and the pursuit of happiness.
- » These agendas affect you personally through economic risks tied to adversarial regimes, cultural changes from mass migration, and higher costs from climate mandates—reshaping your community, finances, and family security.
- » Understanding the history and strategies behind globalism equips you to recognize propaganda, protect your wealth, defend your children's education, and take practical steps that preserve liberty and prosperity for future generations.

1. Globalism's Ideological and Historical Roots

Globalism is more than international cooperation; it is the ideology that seeks to dismantle nation-states in favor of centralized global governance.

Its advocates envision a one-world political, economic, and even religious order.

This vision not only undermines American independence but also contradicts biblical teaching, which affirms the division of nations as part of God's design.

The modern drive for globalism can be traced back to the early 20th century with the League of Nations.

Though the United States rejected that initial attempt, momentum returned after World War II with the founding of the United Nations.

At the heart of the UN's creation was Alger Hiss, a senior U.S. State Department official and later confirmed Soviet spy for Joseph Stalin.

Hiss served as secretary general of the UN's founding conference, helping draft the charter and embedding globalist priorities into the institution from the start.

“Globalism at its core is just an ideology that holds that we ought to undermine the nation state and move toward what they euphemistically refer to as global governance. Really, we’re talking about global government here.” –Alex Newman

Backed by the Rockefeller family and other elites, the UN was structured not as a neutral peacekeeping body, but as a mechanism to centralize authority beyond the reach of sovereign nations.

Other influential figures, such as John Foster Dulles, and elite gatherings like Bohemian Grove, reinforced this alignment.

These networks worked deliberately to position global governance as the solution to future crises.

“All three—life, liberty, and the pursuit of happiness—are at threat from a one-world government.” –Kevin Freeman

This history shows globalism is not benign cooperation cloaked in ideals of peace and progress.

Instead, it represents a deliberate erosion of self-determination, designed to weaken Western sovereignty and create economic dependencies that favor multinational elites over domestic industries.

Rooted in elite-driven institutions, globalism has always been a calculated assault on national independence.

⚠ Attention: The historical foundations of globalism reveal that today’s push for international governance is not new, but part of a long-planned strategy. Understanding these origins is crucial before examining the modern tools of control—alliances, migration, and climate policy—that continue to advance this agenda.

2. Tools of Control: Communist Alliances, Immigration, and Climate Policy

The globalist agenda is not advanced in theory alone—it is implemented through deliberate tools of control.

Chief among these are communist alliances, weaponized immigration, and climate policy.

Working in concert, they undermine sovereignty, reshape culture, and consolidate power in the hands of unelected elites.

One striking example is the partnership between globalist elites and communist regimes, especially the Chinese Communist Party (CCP).

From Wall Street's financing of the Bolshevik Revolution to BlackRock's modern investments in Chinese state firms, globalists have long used communism as both a demolition tool and a model for control.

Communist China's hybrid of fascism and communism—where markets exist but remain dominated by the state—is openly praised by figures such as David Rockefeller and Klaus Schwab.

American corporations that facilitate these partnerships import authoritarian practices into the West, eroding free markets and strengthening adversaries.

“BlackRock and Larry Fink have been working with the Communist Party and literally bringing that system here, bringing Chinese companies onto our market and getting us invested in them.” –Kevin Freeman

Immigration policy also plays a critical role. While framed as humanitarian relief or an economic necessity, mass migration is deliberately engineered to weaken borders and erode Western Christian culture.

Former UN migration chief Peter Sutherland even admitted the strategy was to break down cultural “shibboleths” and force nations into accepting a “one world” identity.

In Europe, this approach has already led to the removal of Christian symbols to appease incoming populations, producing fragmentation and social upheaval.

The climate agenda may be the most powerful weapon of all. By labeling carbon dioxide—a life-essential gas exhaled by every human—as “pollution,” global actors justify regulating nearly every aspect of life: food, transportation, housing, and energy.

This narrative provides the perfect pretext to empower unelected institutions while weakening national economies, particularly in the United States, to the benefit of China and other rivals.

Even religious institutions are being mobilized under eco-spiritual movements, fracturing families and churches in the process.

“If you submit to the idea that CO₂ is pollution, everything you do now becomes a producer of pollution, and therefore everything you do needs to be under government control.” —Alex Newman

Together, these tools create a cycle of dependency: communist alliances shift economic power abroad, immigration undermines cultural resistance at home, and climate regulations justify global micromanagement of daily life.

The result is not a freer, cleaner, or safer world, but a steadily tightening grip of globalism over nations and individuals alike.

Attention: Through economic partnerships, engineered migration, and fabricated climate crises, globalists deploy interlocking mechanisms to enforce obedience and dismantle autonomy—making vigilance and resistance imperative.

3. Preserving Liberty: How to Fight Back

Defeating globalist strategies requires both awareness and action.

The first step is becoming well-informed: reading history, studying trusted sources, and grounding your understanding in a biblical worldview that reveals the moral and spiritual dimension of this struggle.

Outlets such as The New American and The Epoch Times have been exposing how deeply media and policy are complicit in advancing globalist agendas.

Families are the front line of defense. Global institutions deliberately use schools and entertainment to indoctrinate children into embracing global governance and rejecting traditional values.

Gender ideology and environmental alarmism are often tools for softening resistance.

Parents must protect their children through homeschooling, classical education, or vigilant engagement with local schools.

“Protect your children... The UN and the governments of the world are indoctrinating children not just to submit to this, but to beg for it, to love it, to promote it.” —Alex Newman

Beyond the household, citizens must engage at every level of government—city, county, state, and federal. Local policies, from school boards to county commissions, are often the first line of defense against globalist encroachment.

Networks like the Remnant Alliance, Liberty Pastors, and Patriot Academy strengthen this resistance through prayer, training, and policy advocacy.

Financial independence also plays a crucial role: divesting from CCP-linked funds and prioritizing America-first investments deprives adversaries of resources while protecting household wealth.

“We’ve got the Great Commission. We were instructed by our Lord to go out and make disciples of all nations... It’s our most effective weapon here—we’ve got the sword of the Spirit and the Great Commission.” –Kevin Freeman

Most importantly, resistance is spiritual. While globalists push their “Great Reset,” Christians are called to pursue the “Great Commission.”

This spiritual mission—to disciple nations and stand for truth—is both the compass and the strategy for defending liberty.

With faith as the anchor, individuals and communities can rebuild prosperity and freedom on firm foundations.

Attention: Preserving liberty begins in the home, expands to the community, and is anchored in faith. By prioritizing education, local engagement, and biblical obedience, Americans can reclaim independence and ensure future generations inherit a nation rooted in truth and freedom.
